Twelve Years a Slave Solomon Northup,2024-01-04

Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped,

sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

*Unmanned Aircraft Systems in the Cyber Domain*

Randall Nichols, Hans Mumm, Wayne Lonstein, Julie Ryan, Candice Carter, John Paul Hood, 2019-07-26

Unmanned Aircraft Systems are an integral part of the US national critical infrastructure. The authors have endeavored to bring a breadth and quality of information to the reader that is unparalleled in the unclassified sphere. This textbook will fully immerse and engage the reader / student in the cyber-security considerations of this rapidly emerging technology that we know as unmanned aircraft systems (UAS). The first edition topics covered National Airspace (NAS) policy issues, information security (INFOSEC), UAS vulnerabilities in key systems (Sense and Avoid / SCADA), navigation and collision avoidance systems, stealth design, intelligence, surveillance and reconnaissance (ISR) platforms; weapons systems security; electronic warfare considerations; data-links, jamming, operational vulnerabilities and still-emerging political scenarios that affect US military / commercial decisions. This second edition discusses state-of-the-art technology issues facing US UAS designers. It focuses on counter unmanned aircraft systems (C-UAS) - especially research designed to mitigate and terminate threats by SWARMS. Topics include high-altitude platforms (HAPS) for wireless communications; C-UAS and large scale threats; acoustic countermeasures against SWARMS and

building an Identify Friend or Foe (IFF) acoustic library; updates to the legal / regulatory landscape; UAS proliferation along the Chinese New Silk Road Sea / Land routes; and ethics in this new age of autonomous systems and artificial intelligence (AI).

Our Entangled Future Ann El Khoury, Karen O'Brien, Nicole Schafenacker, 2019-10-11 We live our lives through stories. They shape how we see the world, how we relate to it, and not the least, how we engage with it. Now more than ever, we need compelling stories that inspire both individual and collective action. The nine short stories presented in Our Entangled Future are rooted in the complex reality of the climate crisis. Rather than painting a dystopic future, they present agency-driven characters whose insights will inspire readers to contemplate and realize the potential for quantum social change. Our Entangled Future: Stories to Empower Quantum Social Change is part of the AdaptationCONNECTS research project, which is funded by the University of Oslo and the Research Council of Norway. AdaptationCONNECTS focuses on the relationship between adaptation and transformations to sustainability and explores the contributions of creativity, collaboration, empowerment, and new narratives. It also investigates the potential for new paradigms or thought patterns to shape the future, including those based on ideas drawn from quantum social science. The research engages with a growing recognition that to adapt successfully to climate change, we need to adapt to the very idea that we are creating the future right now. Adaptation is about transformation at the deepest levels, and there is no better way to transform than by telling new stories about ourselves and our significance in an entangled future. Could the use of new metaphors and images really contribute to a different narrative about

climate change? We announced a call for short stories related to the notion of quantum social change, fully recognizing the ambiguity of the term. We wanted stories to explore a quantum paradigm and were curious about the different ways that this would be interpreted. We deliberately pitched the call to both writers and researchers, in recognition that many of those who work daily with climate change are engaging with wider and deeper solution spaces. We sought stories that engage with creative agility to reimagine the world from the perspective of a new paradigm. Each story is paired with an original image of visual art, that relates to entanglement and the natural environment. The nine short stories featured in *Our Entangled Future* present a revitalizing view of our world and the context in which we find ourselves. Together, these stories help to convey our deepest values as humans and our greatest potential to respond collectively to climate change.
