The Donbas Conflict in Ukraine Daria

Platonova, 2021-09-27 This book examines why, when the conflict in eastern Ukraine began in 2014, fighting broke out in the Donetsk region, whereas it did not in Kharkiv city, despite the city, like the Donetsk region, being geographically proximate to Russia and similar in ethnic and linguistic make up. Based on extensive original research, the book argues that a key factor was the nature and behaviour of local elites, with those in Kharkiv having diffuse ties to the centre and therefore being more capable of adapting to sudden, profound regime change at the centre, whereas the elites in the Donetsk region had much more concentrated ties to the centre, were dependent on one network, and therefore were much less able to cope with change. The book thereby demonstrates how crucial for Ukraine are patronal politics, patronage networks, and informal centre-region relations, and that it was these local political circumstances, rather than Russia, which brought about the conflict.

Proceedings of the 2nd International Conference Engineering Innovations and Sustainable

Development Valentina Mantulenko, 2023-07-20 This book presents the contributions from the 2nd International Conference Engineering Innovations and Sustainable Development, held in Samara, Russia on April 20-21, 2023. By presenting international research on various sustainability issues, it includes topics such as current trends in industrial and agricultural development, innovations in the construction and transport sectors, problems concerning the financing of innovative activities and governmental support for innovations, and engineering competences and skills in the era of new technologies. It also covers the economic, environmental, and informational aspects of sustainable development

in the context of innovations. Finally, the book addresses theoretical and practical aspects by studying the phenomenon of sustainability and engineering development in terms of comparing international experiences. It provides significant value for scientists, teachers, and students of higher educational institutions, and specialists, who are researching sustainable development issues in the era of engineering innovations.

The Un-Polish Poland, 1989 and the Illusion of Regained Historical Continuity Tomasz Kamusella, 2017-08-21 This book discusses historical continuities and discontinuities between the Polish-Lithuanian Commonwealth, interwar Poland, the Polish People's Republic, and contemporary Poland. The year 1989 is seen as a clear point-break that allowed the Poles and their country to regain a 'natural historical continuity' with the 'Second Republic,' as interwar Poland is commonly referred to in the current Polish national master narrative. In this pattern of thinking about the past, Poland-Lithuania (nowadays roughly coterminous with Belarus, Latvia, Lithuania, Poland, Russia's Kaliningrad Region and Ukraine) is seen as the 'First Republic.' However, in spite of this 'politics of memory' (Geschichtspolitik) - regarding its borders, institutions, law, language, or ethnic and social makeup - present-day Poland, in reality, is the direct successor to and the continuation of communist Poland. Ironically, today's Poland is very different, in all the aforementioned aspects, from the First and Second Republics. Hence, contemporary Poland is quite un-Polish, indeed, from the perspective of Polishness defined as a historical (that is, legal, social, cultural, ethnic and political) continuity of Poland-Lithuania and interwar Poland.

The Caucasus Emirate Mujahedin Gordon M.

Hahn, 2014-09-29 Russia's North Caucasus mujahedin of the self-declared Caucasus Emirate and the history thereof is part and parcel of the global jihadi revolutionary movement which includes but is no longer led by Al Qaeda. This book corrects the inadequate previous treatments of the violence in the Caucasus, almost all of which explain what ought to be called the rise of jihadism in the Caucasus solely in terms of Russian actions. The author brings the international jihadist and local North Caucasian causes back into the picture, detailing the global Jihadist/Islamist revolutionary movement's propagation of the "jihadi method" and material support to nationalist and Islamic extremists in Chechnya and the Caucasus since the mid-1990s. Like jihadi groups in Afghanistan and Pakistan, Iraq, Syria, and Africa, the Caucasus Emirate is an Al Qaeda ally and de facto affiliate. It represents a threat to Russian, U.S., and international security as evidenced by terrorist plots perpetrated or inspired by it in Belgium, the Czech Republic, Denmark, Spain, Azerbaijan, and Boston.

Bulletin of the Bussey Institution Bussey Institution, 1876

Publications Combined: Russia's Regular And Special Forces In The Regional And Global War On Terror , Over 2,400 total pages ... Russian outrage following the September 2004 hostage disaster at North Ossetia's Beslan Middle School No.1 was reflected in many ways throughout the country. The 52-hour debacle resulted in the death of some 344 civilians, including more than 170 children, in addition to unprecedented losses of elite Russian security forces and the dispatch of most Chechen/allied hostage-takers themselves. It quickly became clear, as well, that Russian authorities had been less than candid about the number of hostages held and the extent to which

they were prepared to deal with the situation. Amid grief, calls for retaliation, and demands for reform, one of the more telling reactions in terms of hardening public perspectives appeared in a national poll taken several days after the event. Some 54% of citizens polled specifically judged the Russian security forces and the police to be corrupt and thus complicit in the failure to deal adequately with terrorism, while 44% thought that no lessons for the future would be learned from the tragedy. This pessimism was the consequence not just of the Beslan terrorism, but the accumulation of years of often spectacular failures by Russian special operations forces (SOF, in the apt US military acronym). A series of Russian SOF counterterrorism mishaps, misjudgments, and failures in the 1990s and continuing to the present have made the Kremlin's special operations establishment in 2005 appear much like Russia's old Mir space station—wired together, unpredictable, and subject to sudden, startling failures. But Russia continued to maintain and expand a large, variegated special operations establishment which had borne the brunt of combat actions in Afghanistan, Chechnya, and other trouble spots, and was expected to serve as the nation's principal shield against terrorism in all its forms. Known since Soviet days for tough personnel, personal bravery, demanding training, and a certain rough or brutal competence that not infrequently violated international human rights norms, it was supposed that Russian special operations forces—steeped in their world of “threats to the state” and associated with once-dreaded military and national intelligence services—could make valuable contributions to countering terrorism. The now widely perceived link between “corrupt” special forces on the one hand, and counterterrorism failures on the other, reflected the further erosion of Russia's national

security infrastructure in the eyes of both Russian citizens and international observers. There have been other, more ambiguous, but equally unsettling dimensions of Russian SOF activity as well, that have strong internal and external political aspects. These constitute the continuing assertions from Russian media, the judicial system, and other Federal agencies and officials that past and current members of the SOF establishment have organized to pursue interests other than those publicly declared by the state or allowed under law. This includes especially the alleged intent to punish by assassination those individuals and groups that they believe have betrayed Russia. The murky nature of these alleged activities has formed a backdrop to other problems in the special units.

Proceeding of the International Science and Technology Conference "FarEastCon 2021" Denis B. Solovev, Viktor V. Savaley, Alexander T. Bekker, Valery I. Petukhov, 2022-02-26 This book presents the proceedings of the International Science and Technology Conference "FarEastCon 2021," which took place on October 5-8, 2021, in Vladivostok, Russian Federation. The book discusses modern achievements and promising research in the sphere of intelligent technologies in solving real, applied problems in various fields of industry and economic policies of different countries. Identity in Persian Egypt Bob Becking, 2020-08-04

In this book, Bob Becking provides a comprehensive and up-to-date overview of the origins, lives, and eventual fate of the Yehudites, or Judeans, at Elephantine, framed within the greater history of the rise and fall of the Persian Empire. The Yehudites were among those mercenaries recruited by the Persians to defend the southwestern border of the empire in the fifth century BCE. Becking argues that this group, whom some label as the first “Jews,” lived on the island of Elephantine in relative peace with other ethnic groups under the aegis of the *pax persica*. Drawing on Aramaic and Demotic texts discovered during excavations on the island and at Syene on the adjacent shore of the Nile, Becking finds evidence of intermarriage, trade cooperation, and even a limited acceptance of one another’s gods between the various ethnic groups at Elephantine. His analysis of the Elephantine Yehudites’ unorthodox form of Yahwism provides valuable insight into the group’s religious beliefs and practices. An important contribution to the study of Yehudite life in the diaspora, this accessibly written and sweeping history enhances our understanding of the varieties of early Jewish life and how these contributed to the construction of Judaism.

Popular Biopolitics and Populism at Europe’s Eastern Margins Andrey Makarychev,2022-03-16 In this groundbreaking book, Andrey Makarychev approaches populism through a critical biopolitical lens and shows that populist narratives are grounded intrinsically in corporeality, sexuality, health, bodily life and

religious practices. The author demonstrates that populism is a phenomenon deeply rooted in mass culture. He compares three countries -- Estonia, Ukraine and Russia--that all share post-Soviet experiences offering a broad spectrum of populist discourses. The three case studies display the interconnection between biopower and populism through references to culture, media, art, theatrical performances and literature, raising new questions and directions for understanding traditional accounts of populism. This work was supported by European Union's Horizon 2020 research and innovation programme under grant agreement No. 822682: Populist rebellion against modernity in 21st-century Eastern Europe: neo-traditionalism and neo-feudalism - POPREBEL.

EU Mediation Law Handbook Nadja Alexander, Sabine Walsh, Martin Svatos, 2017-03-15 Mediation is rapidly becoming a norm in cross-border dispute resolution among European Union (EU) Member States. Accordingly, an important question for legal advisers to ask themselves is: Which jurisdiction offers the best legal framework to support a potential future mediation of my client's dispute? This book responds to this question by examining the law on mediation in each Member State on a chapter-by-chapter basis. Each country analysis applies the book's overarching principle of a specially designed Regulatory Robustness Rating System, which is thoroughly explained in an introductory chapter. This framework offers a highly effective way to analyse the quality and robustness of each of the EU's twenty-nine national jurisdictions' legal frameworks relevant to mediation (including legislation, case law, practice directions, codes of conduct, standards, and other regulatory instruments) and factor such an analysis into choices about governing law in mediation clauses and other agreements. Among the issues and topics

covered are the following: • congruence of domestic and international legal frameworks; • transparency and clarity of content of mediation laws; • standards and qualifications for mediators; • rights and obligations of participants in mediation; • access to mediation services; • access to internationally recognised and skilled mediators; • enforceability of clauses and mediated settlement agreements; • confidentiality and flexibility; • admissibility of evidence from mediation in subsequent proceedings; • impact of commencement of mediation on litigation limitation periods; • relationship and attitude of courts to mediation; and • regulatory incentives for legal advisers to engage in mediation. This detailed analysis clearly allows users and other regulatory stakeholders to look closely and critically at regulatory regimes for mediation in order to make informed choices and develop appropriate strategies in relation to the law that governs their mediation. This is the first book to consider authoritatively what makes good mediation law and what makes a jurisdiction attractive for cross-border mediation purposes in terms of its regulatory framework. As a resource that identifies potential strengths and weaknesses of each EU Member State's regulatory regime, it has no peers and will be welcomed and put to use by the alternative dispute resolution community in Europe and beyond.

Digital Technologies in the New Socio-Economic Reality Svetlana Igorevna Ashmarina, Valentina Vyacheslavovna Mantulenko, 2021-11-16 This book contains contributions from the IX International Scientific Conference "Digital Transformation of the Economy: Challenges, Trends and New Opportunities," which was organized by Samara State University of Economics (SSEU, Samara, Russia), 2021, and devoted to the 90th anniversary of this higher education institution. Digital

technologies became even more in demand during the pandemic, when companies, state authorities, and educational organizations were forced to switch to a remote format of work. The “forced” digitization of the usual ways of activity required rapid and decisive changes. Understanding the ongoing digital transformation implies the relevance of further in-depth research of this issue in the context of various socioeconomic systems, interdisciplinary interactions, and cooperation between scientists and practitioners. The book is an attempt to analyze these changes and consider them from the point of view of various scientific areas (economics, management, education, law, sociology, and others). This book addresses theoretical and practical aspects by studying the digital technology application in terms of the new socioeconomic reality development: big data in the digital economy, data collection and exchange, artificial intelligence, intelligent communications, digital platforms and strategies for the sustainable development of socioeconomic systems, and new requirements of professional and business education. It provides significant value for scientists, teachers, and students of higher educational institutions.

Alternative Paths to Influence Giulio M. Gallarotti, 2023-06-06 This book offers new and cutting-edge analyses of under-explored subjects

and issues in the realm of soft power. It attempts to fill significant scholarly gaps in understanding the process by which soft power is created, as well as gaps in demonstrating its impact. Soft power is one of the most influential ideas in the study of international politics over the past thirty years. Can nations attain their most vital foreign policy objectives in agreeable ways? Advocates of the concept of soft power have vociferously answered in the affirmative. After many years of thinking in the field of international affairs that the only effective path to influence in international politics was military and economic power, the idea of soft power offers new and exciting possibilities of gaining such influence through a more benign path, one that elevates cooperation and esteem as preferred alternatives to violence, threat and military capacity. This book posits that the realization of the full potential of soft power as a foundation for international relations is a crucial goal for our present world, one beset by war and planetary crises. The book will be of special interest to researchers across political science, international relations, cultural studies and foreign policy. It was originally published as a special issue of the Journal of Political Power.

Neoliberalism and Post-Soviet Transition Wumaier Yilamu, 2017-12-06 This collection emphasizes a cross-disciplinary approach to the problem of scale, with essays ranging in subject matter from literature to film, architecture, the plastic arts, philosophy, and scientific and political writing. Its contributors consider a variety of issues provoked by the sudden and pressing shifts in scale brought on by globalization and the era of the Anthropocene, including: the difficulties of defining the concept of scale; the challenges that shifts in scale pose to knowledge formation; the role of scale in mediating individual

subjectivity and agency; the barriers to understanding objects existing in scalar realms different from our own; the role of scale in mediating the relationship between humans and the environment; and the nature of power, authority, and democracy at different social scales.

Advances in Remote Sensing for Forest Monitoring

Prem C. Pandey, Paul Arellano, 2022-10-11

Advances in Remote Sensing for Forest Monitoring An expert overview of remote sensing as applied to forests and other vegetation In Advances in Remote Sensing for Forest Monitoring, a team of distinguished researchers delivers an expansive and insightful discussion of the latest research on remote sensing technologies as they relate to the monitoring of forests, plantations, and other vegetation. The authors also explore the use of unmanned aerial vehicles and drones, as well as multisource and multi-sensor data - such as optical, SAR, LIDAR, and hyperspectral data. The book draws on the latest data and research to show how remote sensing solutions are being used in real-world settings. It offers contributions from researchers and practitioners from a wide variety of backgrounds and geographical regions to provide a diverse and global set of perspectives on the subject. Readers will also find: A thorough introduction to forest monitoring using remote sensing including recent advances in remote sensing technology Comprehensive explorations of sustainable forest management to enhance ecosystem services and livelihood security using a geospatial approach Case studies of monitoring the biochemical and biophysical parameters of forests, including carotene and xanthophyll content Practical advice on how to apply machine learning tools to remote sensing data Perfect for postgraduates, lecturers, and researchers in the fields of environmental science, forestry, and natural resource management, Advances in Remote

Sensing for Forest Monitoring will also earn a place in the libraries of professionals and researchers working with remote sensing technology.

métete ahora
la piedrecita
en el bolsillo

y llévala
contigo siempre
cuando durante
el día te pase
algo que te
haga infeliz
mete la mano en
