In this book, a systematic scientific understanding of GovTech is formed, the central place of Big Data in this system is substantiated, and modern experience in the functioning and development of this system is considered in detail. The contribution of the book to the literature is to bridge the gap between theory and practice of GovTech through a comprehensive study of all its manifestations in the three parts of the book. **Popular Biopolitics and Populism at Europe’s Eastern Margins** Andrey Makarychev,2022-03-16 In this groundbreaking book, Andrey Makarychev approaches populism through a critical biopolitical lens and shows that populist narratives are grounded intrinsically in corporeality, sexuality, health, bodily life and religious practices. The author demonstrates that populism is a phenomenon deeply rooted in mass culture. He compares three countries -- Estonia, Ukraine and Russia--that all share post-Soviet experiences offering a broad spectrum of populist discourses. The three case studies display the interconnection between biopower and populism through references to culture, media, art, theatrical performances and literature, raising new questions and directions for understanding traditional accounts of populism. This work was supported by European Union’s Horizon 2020 research and innovation programme under grant agreement No. 822682: Populist rebellion against modernity in 21st-century Eastern Europe: neo-traditionalism and neo-feudalism – POPREBEL.

**The Donbas Conflict in Ukraine** Daria Platonova,2021-09-27 This book examines why, when the conflict in eastern Ukraine began in 2014, fighting broke out in the Donetsk region, whereas it did not in Kharkiv city, despite the city, like the Donetsk region, being geographically proximate to Russia and similar in ethnic and linguistic make up. Based on extensive original research, the book argues that a key factor was the nature and behaviour of local elites, with those in Kharkiv having diffuse ties to the centre and therefore being more capable of adapting to sudden, profound regime change at the centre, whereas the elites in the Donetsk region had much more concentrated ties to the centre, were dependent on one network, and therefore were much less able to cope with change. The book thereby demonstrates how crucial for Ukraine are patronal politics, patronage networks, and informal centre-region relations, and that it was these local political circumstances, rather than Russia, which brought about the conflict.

*Resemblance and Reality in Greek Thought* Arum Park,2016-09-13 Resemblance and Reality in Greek Thought follows the construction of reality from Homer into the Hellenistic era and beyond. Not only in didactic poetry or philosophical works but in practically all genres from the time of Homer onwards, Greek literature has shown an awareness of the relationship between verbal art and the social, historical, or cultural reality that produces it, an awareness that this relationship is an approximate one at best and a distorting one at worst. This central theme of resemblance and its relationship to reality draws together essays on a range of Greek authors, and shows how they are unified or allied in posing similar questions to classical literature.

*Maya Glyphs* Linda Schele,1982-11-01 The key to the study of the language and history of the Classic Maya (A.D. 293–900) is the verb. Maya Glyphs: The Verbs is a comprehensive study of the verb morphology and syntax of the Maya writing system. Linda Schele's summary of methodology makes available in a single place many important discoveries and approaches to the Maya language. Hers is the first sourcebook to include so broad a range of dates and to identify for the first time so many Maya rulers and events. The admirably lucid text provides an excellent introduction to Maya hieroglyphics for the beginner, and, for the experienced Mayanist, it offers a fascinating explanation of methodology, including paraphrasing, and important information about syntactical structures, special verbal constructions, and literary conventions. Schele's extensive catalog of known verbal phrases is useful for a variety of purposes. Because it is organized according to verbal affix patterns, it provides the only available source for the distribution of such patterns in the writing system. At the same time it registers the date of each event, its agent and patient (if recorded), the dedication date of the monument on which the glyphs occur, and a pictorial illustration, rather than a T-number transcription, of each example. Extensive notes treating problems of dating, interpretation, and dynastic information contain theories about the meaning and function of the events

recorded in the Maya inscriptions.

**Bringing Global Governance Home** Laura A. Henry,Lisa McIntosh Sundstrom,2021-10-07 The world's problems--climate change, epidemics, and the actions of multinational corporations--are increasingly global in scale and beyond the ability of any single state to manage. Since the end of the Cold War, states and civil society actors have worked together through global governance initiatives to address these challenges collectively. While global governance, by definition, is initiated at the international level, the effects of global governance occur at the domestic level and implementation depends upon the actions of domestic actors. NGOs act as mediators between global and domestic political arenas, translating and adapting global norms for audiences at home. Yet the role of domestic NGOs in global governance has been neglected relatively in previous research. Bringing Global Governance Home examines how NGO engagement at the global level shapes domestic governance around climate change, corporate social responsibility, HIV/AIDS, and sustainable forestry. It does so by comparing domestic reception of global standards and practices in the BRICS states (Brazil, Russia, India, China, and South Africa). These newly emerging global powers, representing a range of regime types, aspire to become global policy makers rather than mere policy takers and have banded together through periodic summits to devise alternative approaches to economic development and global challenges. Nevertheless, these countries still engage the world primarily through existing global governance institutions that they did not create themselves. Ultimately, this book explores the interplay of international and domestic factors that allow domestically-rooted NGOs to participate globally, and the extent to which that participation shapes their ability to mediate and promote global governance perspectives within the borders of their own countries with varying regimes and state-society relations.

**The Caucasus Emirate Mujahedin** Gordon M. Hahn,2014-09-29 Russia’s North Caucasus mujahedin of the self-declared Caucasus Emirate and the history thereof is part and parcel of the global jihadi revolutionary movement which includes but is no longer led by Al Qaeda. This book corrects the inadequate previous treatments of the violence in the Caucasus, almost all of which explain what ought to be called the rise of jihadism in the Caucasus solely in terms of Russian actions. The author brings the international jihadist and local North Caucasian causes back into the picture, detailing the global Jihadist/Islamist revolutionary movement’s propagation of the “jihadi method” and material support to nationalist and Islamic extremists in Chechnya and the Caucasus since the mid-1990s. Like jihadi groups in Afghanistan and Pakistan, Iraq, Syria, and Africa, the Caucasus Emirate is an Al Qaeda ally and de facto affiliate. It represents a threat to Russian, U.S., and international security as evidenced by terrorist plots perpetrated or inspired by it in Belgium, the Czech Republic, Denmark, Spain, Azerbaijan, and Boston.

**Digital Technologies in the New Socio-Economic Reality** Svetlana Igorevna Ashmarina,Valentina Vyacheslavovna Mantulenko,2021-11-16 This book contains contributions from the IX International Scientific Conference “Digital Transformation of the Economy: Challenges, Trends and New Opportunities,” which was organized by Samara State University of Economics (SSEU, Samara, Russia), 2021, and devoted to the 90th anniversary of this higher education institution. Digital technologies became even more in demand during the pandemic, when companies, state authorities, and educational organizations were forced to switch to a remote format of work. The “forced” digitization of the usual ways of activity required rapid and decisive changes. Understanding the ongoing digital transformation implies the relevance of further in-depth research of this issue in the context of various socioeconomic systems, interdisciplinary interactions, and cooperation between scientists and practitioners. The book is an attempt to analyze these changes and consider them from the point of view of various scientific areas (economics, management, education, law, sociology, and others). This book addresses theoretical and practical aspects by studying the digital technology application in terms of the new socioeconomic reality development: big data in the digital economy, data collection and exchange, artificial intelligence, intelligent communications, digital platforms and strategies for the sustainable development of socioeconomic systems, and new requirements of professional and business education. It provides significant value for scientists, teachers, and students of higher educational institutions.
