The Sea at Truro Nancy Willard,2012-10-02 From the acclaimed poet of *In the Salt Marsh* comes a dazzling collection about the magic hiding in the ordinary days of our past and present. Willard turns a keen eye on the natural world that witnesses these revelations, and the myriad, often surprising ways in which it intersects with our own human lot. Willard shows us time and again that “In me nothing of childhood is lost.” She recaptures for us not only the fleeting, distant shreds of a charmed, innocent youth, but brings back the people who have been loved and lost. She tells us of the man whose sister appears to him the night after her memorial service, and of the time her grandfather called her mother three days after he died, “. . . and she with her arms full / of wind-washed laundry / just freed from the line.” She gives back to us Walt Whitman, “eating / his supper from a sheet of brown paper.” She lends voice not only to the loved ones with whom we have parted ways but also to the plant and animal lives that remain a mystery to us despite our close proximity to them. In her able hands “the potato opens its eyes” and the dragonfly stands “well mannered and cautious.” Whether she is musing “What it is to be that crow,” bringing us “the gossip of ants,” or noting that “The sea reads slowly, as old men in libraries / follow the news . . .,” Willard brings extraordinary empathy to every subject she touches, creating fascinating new worlds from the ordinary staples of our daily existence. Finally, she plumbs the ultimate union between the human and natural worlds that she brings into such sharp focus. Grave Last year four men planted you under a stone. Today I plant the dumpy heart of a narcissus. Sharing your bed, it will wake up singing.

**Compliant Mechanisms** Nicolae Lobontiu,2020-11-19 With a rigorous and comprehensive coverage, the second edition of *Compliant Mechanisms: Design of Flexure Hinges* provides practical answers to the design and analysis of devices that incorporate flexible hinges. Complex-shaped flexible-hinge mechanisms are generated from basic elastic segments by means of a bottom-up compliance (flexibility) approach. The same compliance method and the classical finite element analysis are utilized to study the quasi-static and dynamic performances of these compliant mechanisms. This book offers easy-to-use mathematical tools to investigate a wealth of flexible-hinge configurations and two- or three-dimensional compliant mechanism applications. **FEATURES** Introduces a bottom-up compliance-based approach to characterize the flexibility of new and existing flexible hinges of straight- and curvilinear-axis configurations Develops a consistent linear lumped-parameter compliance model to thoroughly describe the quasi-static and dynamic behavior of planar/spatial, serial/parallel flexible-hinge mechanisms Utilizes the finite element method to analyze the quasi-statics and dynamics of compliant mechanisms by means of straight- and curvilinear-axis flexible-hinge elements Covers miscellaneous topics such as stress concentration, yielding and related maximum load, precision of rotation of straight- and circular-axis flexible hinges, temperature effects on compliances, layered flexible hinges and piezoelectric actuation/sensing Offers multiple solved examples of flexible hinges and flexible-hinge mechanisms. This book should serve as a reference to students, researchers, academics and anyone interested to

investigate precision flexible-hinge mechanisms by linear model-based methods in various areas of mechanical, aerospace or biomedical engineering, as well as in robotics and micro-/nanosystems.
