VF-11/111 'Sundowners' 1942-95 Barrett Tillman,2010-03-23 Fighting Squadron 11 was established at San Diego in August 1943, beginning a half-century record that spanned aerial combat in three wars from the piston to the jet age. First deployed to Guadalcanal, the 'Sundowners' flew Grumman Wildcats and completed its tour as the Navy's third-ranking F4F squadron in terms of aerial victories. Upon returning home, the 'Sundowners' transitioned to Hellcats in preparation for a second combat deployment. In 1944-45 the squadron flew from USS Hornet (CV-12), participating in the fast carrier strikes against the Philippines, Formosa and the Asian mainland. It finished the war as the Navy's 11th ranking fighter squadron with 158 credited victories. Redesignated VF-111 in 1948, the 'Sundowners' converted to F9F Panthers and scored history's first jet-versus-jet victory over Korea in 1950. After the armistice, the squadron flew FJ-3 Furies and F11F Tigers, before receiving the world-class F8U Crusader in 1961. During the long Vietnam War, the 'Sundowners' logged six deployments, scoring MiG kills in both F-8s and F-4 Phantom IIs. From 1978 to disestablishment in 1995, the 'Sundowners' flew F-14 Tomcats from USS Kitty Hawk (CV-63) and Carl Vinson (CVN-70), completing a record of 37 deployments from 17 flattops in its 52-year career. From World War 2 until after the Cold War, the 'Sundowners' established an unsurpassed record 'at the tip of the spear' in naval aviation history.

The Living Bread Thomas Merton,1915 The whole problem of our time is the problem of love. How are we going to recover the ability to love ourselves and to love one another? We cannot be at peace with others because we are not at peace with ourselves, and we cannot be at peace with ourselves because we are not at peace with God. There is a distinction between a contrite sense of sin and a feeling of guilt. The former is a true and healthy thing, the latter tends to be false and pathological. The man who suffers from a sense of guilt does not want to feel guilty, but at the same time he does not want to be innocent. He wants to do what he thinks he must not do, without the pain of worrying about the consequences. The history of our time has been made by dictators whose characters, often transparently easy to read, have been full of repressed guilt. They have managed to enlist the support of masses of men moved by the same repressed drives as themselves. Modern dictatorships display everywhere a deliberate and calculated hatred for human nature as such. The technique of degradation used in concentration camps and in staged trials are all too familiar in our time. They have one purpose: to defile the human person.

Pacific Counterblow: The 11th Bombardment Group and the 67th Fighter Squadron in the Battle for Guadalcanal, An Interim Report

Pacific Counterblow - The 11th Bombardment Group And The 67th Fighter Squadron In The Battle For Guadalcanal Anon,2014-08-15 [Illustrated with 6 photos and 3 maps] Originally published shortly after key air campaigns, the Wings at War series captures the spirit and tone of America's World War II experience. Eyewitness accounts of Army Air Forces' aviators and details from the official histories enliven the story behind each of six important AAF operations. Pacific Counterblow tells the story of the Battle for Guadalcanal (1942), focusing on the operations of the 11th Bombardment Group and the 67th Fighter Squadron. Months after the devastation of Pearl Harbor, U.S. forces had crushed the Japanese fleet at Midway and then moved to seize the initiative. AAF commanders in the Pacific sought to prevent the enemy from severing Australia's supply lines. So the B-17s of the 11th Bomb Group and the P-39s and P-400s of the 67th Fighter Squadron, flying from makeshift bases at Espiritu Santo and Henderson Field, began grueling attacks on Japanese shipping between Rabaul, New Britain and the Solomon Islands. After several months of bitter fighting, American forces gained control of Guadalcanal, positioning them to swing forward beyond Rabaul to New Guinea.

The Flying Squadron Richard Woodman,1999-10-01 It is 1811 and Napoleon's French Empire dominates Europe. Desperate to stem the

encroaching French tide and avert war with the emerging power of the United States, the Royal Navy orders Captain Nathaniel Drinkwater to the Chesapeake Bay to heal the rift between London and Washington. Quite by chance, on the banks of the Potomac, Drinkwater discovers the first clue to a bold plan by which the U.S. could defeat the Royal Navy, collapse the British government and utterly destroy the British cause. Amid personal crisis, Drinkwater takes command of a squadron sent against the Americans in the South Atlantic, audaciously risking his reputation and, in a climactic confrontation, coming face-to-face with the horror of an interminable war.

Combat Squadrons of the Air Force; World War II. Maurer Maurer,1969 This collection of squadron histories has been prepared by the USAF Historical Division to complement the Division's book, Air Force Combat Units of World War II. The 1,226 units covered by this volume are the combat (tactical) squadrons that were active between 7 December 1941 and 2 September 1945. Each squadron is traced from its beginning through 5 March 1963, the fiftieth anniversary of the organization of the 1st Aero (later Bombardment) Squadron, the first Army unit to be equipped with aircraft for tactical operations. For each squadron there is a statement of the official lineage and data on the unit's assignments, stations, aircraft and missiles, operations, service streamers, campaign participation, decorations, and emblem.

Sixty Squadron R.A.F. Group-Captain A. J. L. Scott,2015-01-08 Example in this ebook This book tells the story of Squadron No. 60 of the Royal Flying Corps, afterwards of the Royal Air Force. When the war began, in August 1914, the Royal Flying Corps was a very small body which sent four squadrons on active service and had a rudimentary training organisation at home. In those days the only functions contemplated for an airman were reconnaissance and occasionally bombing. Fighting in the air was almost unknown. The aeroplanes were just flying machines of different types, but intended to perform substantially the same functions. Gradually as the war continued specialisation developed. Fighting in the air began, machine guns being mounted for the purpose in the aeroplanes. Then some aeroplanes were designed particularly for reconnaissance, some particularly for fighting, some for bombing, and so on. It was in the early part of this period of specialisation that Squadron No. 60 was embodied. And, as this narrative tells us, its main work was fighting in the air. It was equipped for the most part with aeroplanes which were called scouts—not very felicitously, since a scout suggests rather reconnaissance than combat. These machines carried only one man, were fast, easy to manœuvre, and quick in responding to control. They were armed with one or two machine guns, and they engaged in a form of warfare new in the history of the world, and the most thrilling that can be imagined—for each man fought with his own hand, trusting wholly to his own skill, and that not on his own element, but in outrage of nature, high in the air, surrounded only by the winds and clouds. The embodiment of the fighting scout squadrons was part of the expansion and organisation of what became the Royal Air Force. Among all the achievements of the war there has been, perhaps, nothing more wonderful than the development of the Royal Flying Corps and the Royal Naval Air Service, and their amalgamation in the great Royal Air Force which fought through the last year of the war. When the war opened, the Royal Flying Corps and the Royal Naval Air Service were bodies of few units, ancillary to the Army and the Navy, of which the control was in the hands of the Army Council and the Board of Admiralty. It was not realised that warfare in the air was a new and distinct type of warfare. Generals who would have laughed at the idea of commanding a fleet, Admirals who would have shrunk from the leadership of an army corps,

were quite unconscious of their unfitness to deal with the problems of aerial war. Every step, therefore, of the organisation and expansion of the flying services had to be conducted under the final control of bodies, kindly and sympathetic indeed, but necessarily ignorant. That the Royal Flying Corps attained to its famous efficiency and was expanded more than a hundredfold should earn unforgetting praise for those who were responsible for leading and developing it. The country owes a great debt, which has not, perhaps, been sufficiently recognised, to Sir David Henderson, whose rare gifts of quick intelligence and ready resource must have been taxed to the utmost in his dual position as head of the Flying Corps and member of the Army Council; to Sir Sefton Brancker, who worked under him in the War Office; and to Sir Hugh Trenchard, who, from the date that Sir David Henderson came back from France to that of the amalgamation of the flying services in the Royal Air Force, was in command in France. It was the administrative skill of these distinguished men that stood behind the work of the squadrons and made possible their fighting or bombing or reconnaissance. And this background of administrative skill and resource must not be forgotten or suffered to be quite outshone by the brilliant gallantry of the pilots and observers. To be continue in this ebook

Commanding an Air Force Squadron Col Usaf Timmons, Timothy,Timothy T. Timmons,2012-08-07 The privilege of commanding an Air Force squadron, despite its heavy responsibilities and unrelenting challenges, represents for many Air Force officers the high point of their careers. It is service as a squadron commander that accords true command authority for the first time. The authority, used consistently and wisely, provides a foundation for command. As with the officer's commission itself, command authority is granted to those who have earned it, both by performance and a revealed capacity for the demands of total responsibility. But once granted, it much be revalidated every day. So as one assumes squadron command, bringing years of experience and proven record to join with this new authority, one might still need a little practical help to success with the tasks of command. This book offers such help. "Commanding an Air Force Squadron" brings unique and welcome material to a subject other books have addressed. It is rich in practical, useful, down-to-earth advice from officers who have recently experienced squadron command. The author does not quote regulations, parrot doctrine, or paraphrase the abstractions that lace the pages of so many books about leadership. Nor does he puff throughout the manuscript about how he did it. Rather, he presents a digest of practical wisdom based on real-world experience drawn from the reflection of many former commanders from any different types of units. He addresses all Air Force squadron commanders, rated and nonrated, in all sorts of missions worldwide. Please also see a follow up to this book entitled "Commanding an Air Force Squadron in the Twenty-First Century (2003)" by Jeffry F. Smith, Lieutenant Colonel, USAF.

Kangaroo Squadron Bruce Gamble,2018-11-20 The dramatic untold story of the first US Army unit to cross the Pacific and strike back at the

Japanese after Pearl Harbor In early 1942, while most of the American military was still in disarray from the devastating attacks on Pearl Harbor and the Philippines, a single squadron advanced to the far side of the world to face America's new enemy. Based in Australia with poor supplies and no ground support, the pilots and crew faced tropical diseases while confronting numerically superior Japanese forces. Yet the outfit, dubbed the Kangaroo Squadron, proved remarkably resilient and successful, conducting long-range bombing raids, armed reconnaissance missions, and rescuing General MacArthur and his staff from the Philippines. Before now, the story of their courage and determination in the face of overwhelming odds has largely been untold. Using eyewitness accounts based on personal diaries, letters, new interviews, and memoirs as well as Japanese sources, historian Bruce Gamble brings to vivid life this dramatic true story. But the Kangaroo Squadron's story doesn't end in World War II. One of the B-17s, crash landed on its first mission, has recently been recovered from jungle swamps. The intertwined stories of the Kangaroo Squadron and the Swamp Ghost are filled with thrilling accounts of aerial combat, an epic jungle survival story, and the powerful mystique of an abandoned bomber that compelled men to possess it at any cost.
