Insight Turkey 2019/04 ,2019-12-01 After the dismemberment of the Ottoman State, even though it lost a huge territory, Turkey chose not to pursue an irredentist foreign policy, and although it was a continuation of the Ottoman State, it did not want to maintain the Ottoman heritage. Instead the Republic of Turkey preferred to follow a pro status quo and a comprehensive Westernist foreign policy orientation. When the Soviet Union threatened Turkey in the wake of the Second World War, Turkey needed to officially be part of the Western world. Therefore, it had to accept the subordination to the liberal Western world and a dependent relationship with the United States due to the requirements of the bipolar world system. In spite of the vertical nature of this relationship, both sides benefitted from this strong and sustainable alliance relationship. On the one hand, the Western alliance provided security against the Soviet threat, military and economic support, and political advantages to Turkey. On the other hand, the Western countries gained a great deal from Turkey, who served as the most important NATO ally in the southeastern European front and hosted military air bases against threats coming from the east. Even after the collapse of the Soviet Union and the end of the Cold War, Turkey continued to be a strategic ally of the West. However, after the changes in the global balance of power, the weakening of the American leadership, and the more assertive and competitive foreign policies of other global powers such as Russia and China, Turkey has

decided to search for greater autonomy in its region. Furthermore, the Western states' policies, especially those of the U.S., have forced Turkey to follow a more independent foreign policy in order to be able to counter the increasing political instability in its regions. More specifically, the Western countries have preferred to collaborate with some anti-Turkish regional actors that threaten Turkey's national security. Especially after the Western support for the Fetullah Terrorist Organization (FETÖ) and the Syrian branch of PKK (YPG/PYD), both of which are considered as terrorist organizations by Turkey, the credibility of the Western countries has decreased dramatically in Turkey, leaving no other possible choice than questing for a more autonomous foreign policy. Thus, Turkey has begun to take necessary measures to search for a new and high-level status in the international system. Among others, Turkey has diversified its foreign economic relations and increased its material capacity. To this end, Turkey has begun to develop an Ankara-centered foreign policy and to oppose any developments that are detrimental to its national security. Turkey is still determined to maintain its alliance with the Western countries, but demands to revise the relationship, which became anachronic in the light of developments at a regional and global level. In its search for alternative partners and an independent foreign policy, Turkey has improved its relations with Russia, the main alternative challenger and balancer against the Western/American hegemony. For instance, when the Turkish offer to buy

Patriots was rejected by the U.S government, Ankara reached a deal with Russia to buy S-400 missile defense systems. For many years now, Turkey has been asking for a comprehensive reformation in the international system and for a more inclusive approach in which multilateral international platforms such as the United Nations play a bigger role. Furthermore, since the July 15, 2016 coup attempt, the power of the Turkish Armed Forces (TSK) was consolidated. Three successful operations (Operation Euphrates Shield, Operation Olive Branch, and Operation Peace Spring) were undertaken in northern and northeastern Syria and as a result Turkey has strengthened its position in the Syrian conflict and prevented the projections of other actors involved in the crisis, thus indicating that it is a game changer in the region. Moreover, Turkey has recently initiated the Operation Claw in Northern Iraq against the PKK and has sent two drilling ships (Fatih and Yavuz) and one seismic ship (Barbaros) to the Eastern Mediterranean. In short, when forced, Turkey will be able to take unilateral measures to find solutions for the crises it may face in the future. Notwithstanding these developments, in principle, Turkey never questioned its longtime relations with the West. However, despite its membership of Western regional organizations like NATO, relationship with the Council of Europe and its EU membership process, the Western perception of Turkey has been extremely negative, and Western countries continue to take measures against Ankara. Fearing a loss control over Turkey, the Western powers have been

trying to prevent Turkey's quest for autonomy and punish any step taken in this regard. Furthermore, they have attempted to create an anti-Turkish regional bloc to contain Turkey's regional effectiveness, i.e. the most recent rapprochement between Israel, Saudi Arabia, the UAE and Egypt. Lastly, Western countries consistently support anti-Turkish forces in the region, including terrorist groups. It should also be noted that, at a time of multi-dimensional and multi-layered global threats and challenges, there is a high level of interdependency between Turkey and its NATO allies. European defense still starts from Turkey, especially when it comes to international terrorism and international migration. Therefore, it is very difficult to initiate a paradigm shift in Turkish-West relations. The only way for both sides to overcome the conflictual issues is to accept the new realities and to redefine the alliance relations. On the one hand, the Western countries should accept the new role that Turkey is determined to play in its regions and take the Turkish security concerns into attention. On the other hand, Turkey needs to continue its contributions to the NATO operations and to challenge the threats emanating from the Middle East, since Ankara cannot confront the regional threats by itself. This new issue of Insight Turkey showcases the emergence of Turkey as a regional power in the changing international system and aims to guide readers through the assortment of obstacles within Turkey's foreign policy and how Turkey's new diplomacy has navigated the nation to a whole new international

arena. Turkey, in a volatile region, has plumbed the depths of autonomy in its foreign policy for the last decade and this has resulted in trouble with Turkey's strategic and NATO ally, the United States. Ali Balcı's commentary elucidates the quest of Turkey's autonomy in the Middle East, where the collaboration with Russia and Iran consolidates its quest. Considering Turkey's partnership with different actors for more autonomy, Balcı elaborates that the interests of Turkey and the U.S. are clashing in a region, where Turkey is a subordinate actor. The Syrian civil war has been a cardinal phenomenon having defined Turkey's relationships with its NATO ally, the U.S., and its neighbor and successor of the Soviet Union, Russia. William Hale canonically expounds how the U.S. has condoned Turkey's security concerns, thereby allowing Turkey to work with Russia in order to ward off the eminent threats emerging from Syria such as ISIS and YPG/PKK. Furthermore, this commentary suggests the tense relationship between Turkey and the U.S. not be taken at face value. As mentioned early, Turkey has been asking for a comprehensive reformation in the international system. The famous motto: "The world is bigger than five," made famous by Turkish President Recep Tayyip Erdoğan highlights the increasing need to reform the international system in favor of justice and fair representation for all members of the UN. The lack of social, economic, or humanitarian elements practiced within global governance continues to divide nations between the 'center' and 'periphery.' Berdal Aral delves deeper into the meaning of this

motto and how domestically this idea emerged with the AK Party's use of morality in governance and connecting more international ties to poorer countries in Asia and Africa. President Erdoğan envisages a more just multipolar world against the damage being done from the privileged few on the Security Council, by reintroducing necessary reforms advocating for peace over power. The relationship between Russia and Turkey has been steadily improving since the fall of the Soviet Union. As cooperation continues to increase, a few hard internal and external challenges have tested whether the relationship between these two great powers can persevere over differing interests. The military-strategic threats these countries face is the main driving force maneuvering these two nations' relationships. The greatest of these came in 2015 with the downing of the Russian SU-24 bomber aircraft over its violations of Turkish airspace, this example alone caused geopolitical escalations that were crucial to resolve diplomatically. Resolution has been found with partnership in Syria and over arms trade as Turkey sees Russia as a path of diversification away from the West. In this regard, Şener Aktürk explores the various challenges endured and the reaction Russia had to the various threats Turkey has faced in recent years. The Eastern Mediterranean has remained one of the main focus areas of international attention due to the abundant amount of gas reserves around the Levant and island of Cyprus. Lately, Turkey has made sure to show its presence in the region at a time when energy security here has been an increasing issue as

global actors compete over resources in the area. Mehmet Efe Biresselioglu discusses Turkey's position in the contested energy-rich region as it continues to secure its interests in North Cyprus and diversify its own energy. As Turkey maximizes its energy potential, the reactions from surrounding states and the EU has hindered any sense of fair resolution to all regional parties. The unresolved dispute over Cyprus and respect for territorial sovereignty continues to be an ongoing dilemma that can see constructive progress made if Turkey is seen as a strategic partner, and not a part of the problem. The Turkish Lira suffered one of its most severe economic shocks in 2018, sending waves of uncertainty of Turkey's economic potential worldwide. Among speculation as to what factors inhibit economic shocks on the Turkish market, Nurullah Gür, Mevlüt Tatlıyer, and Şerif Dilek address the view that geopolitical issues and slowed down reform measures are the main culprits to the depreciation. With the decline of the currency against the dollar, the Turkish government swiftly set to decrease the inflation rate and instill real sector reforms with a developmentalist approach to remedy the situation. Turkey continues to develop financial alternatives with reducing reliance on imports and growing in the export market, learning to safeguard against economic shocks has been a testing ground for the Turkish economy in recent years. Murat Ülgül introduces the importance of personal diplomacy, and how it is an effective tool in the modern world, thus making it no surprise that it has increased in practice within Turkey. Ülgül

contends that personal diplomacy explains Turkey's foreign policy better as it is most effective in crisis periods, when there is dominant leadership, and when the political leader is confident about his/her ability to shape policies, all of which are applicable in Turkey. Turkish judiciary faced its biggest crisis on the night of July 15, 2016 during the coup attempt organized by FETÖ members who wanted to bring down the democratically elected government. They, however, did not succeed owing to the sturdy resistance of prosecutors and judges who were determined to uphold the rule of law against the coup-plotters. A prominent lawyer, Hüseyin Aydın, clarifies how the Turkish judiciary has even-handedly conducted the prosecution process since the night of July 15. Convulsed by unrest, Iran has returned to the center of the world's attention. Farhad Rezaei explores Iran's aim towards increasing their militarization, as a means of survival even at the cost of destabilizing its regional neighbors, and international discomfort. Dividing Iran's military doctrine between ideological-political and military-technological, Iran propagates its own notion as an Islamic protectorate and compensates for its military shortcomings, like its relatively weak air force, by bolstering its ballistic sector. To measure Iran's military-technology by taking inventory of Iran's military weaponry shows that they are at a disadvantage in the international realm. Therefore, they frequently resort to asymmetrical warfare with the use of proxy groups and cyberwarfare, where they have found limited success. While Iran is likely to

continue to develop its weaponry, it is disadvantaged by richer neighbors partnered with America, economic sanctions, and the fact that its intentions on growth are seen more as a threat than domestic development. The last piece of this issue brings attention to the Kashmir Crisis –a simmering conflict– which has long been glossed over by many countries and international organizations yet, it has to be addressed due to the human rights violations in the region. The Public Safety Act, which is a preventive detention law and required to comply with the international law, is used as a political tool to realize the objectives of authorities rather than its advocated primary aim of detaining people. Mohamad Aabit Bhat sheds a light on the covert intentions of the law, which has been “enforced” in the disputed territory of Jammu and Kashmir, with a discursive approach. These past years have been a challenging test for Turkish diplomacy, as fluctuating relationships and conflicting interests have been at the foreground, whether it’s in the warzone of Syria or on the international stage at the UN. Insight Turkey’s last issue for 2019 “Turkey’s New Foreign Policy: A Quest for Autonomy” analyses how Turkey with great stamina has proven that it is a strong cooperative player and balancer between the polarities of the world, as a voice for the oppressed and a pillar of strength among the dominant forces in the world.

Battle Of Kuwait City, 1991 André Geraque Kiffer, 2022-02-01 It took place between February 24 and 27, 1991, with its main phase at Kuwait

International Airport. However, much of the fighting actually took place on the airport access routes. Iraqi forces were unable to utilize the advantage that could have been gained through the use of urban warfare - fighting in cities or towns - which could have caused significant casualties to the attacking forces. Trying to simulate the possibility of a strategic Iraqi victory would be unrealistic, considering the military situation at the time. Imagine, then, the possibilities for a costly battle of attrition that would impact the Western media and reduce moral support for the war. So, in due course, we will include in our simulation the use by Iraqis of some of the concepts of Soviet Military Doctrine, which ended up not being tested much on a large scale during the Cold War.

The Guns of August 2008 Svante E. Cornell, S. Frederick Starr, 2015-01-28 In the summer of 2008, a conflict that appeared to have begun in the breakaway Georgian territory of South Ossetia rapidly escalated to become the most significant crisis in European security in a decade. The implications of the Russian-Georgian war will be understood differently depending on one's

narrative of what transpired and perspective on the broader context. This book is designed to present the facts about the events of August 2008 along with comprehensive coverage of the background to those events. It brings together a wealth of expertise on the South Caucasus and Russian foreign policy, with contributions by Russian, Georgian, European, and American experts on the region.

TM 9-331 155-MM Howitzer M1 and 155-MM Howitzer Carriage M1: Technical Manual War Department, 2013-05-01 The 155-mm Howitzer M1 was first produced in 1942 as a medium artillery piece. It saw service with the US Army during World War II, the Korean War, and the Vietnam War, before being replaced by the M198 Howitzer. The gun was used by the armed forces of many nations, and in some countries, it still remains in service. The 155-mm Howitzer was developed as an afterthought. A new carriage was under development for much of the 1930s for the existing World War I era M1918 until 1939 when it was realized that it did not seem logical to put a new carriage underneath an obsolete howitzer. Consequently, development began anew with a carriage designed to be used for the 155-mm Howitzer. This was completed by May 15th, 1941 when the Howitzer M1 on the Carriage M1 was standardized. The howitzer

itself differed from the older model by a lengthened barrel of twenty calibers and a new breech mechanism. Uniquely, it was the sole 'slow-cone' interrupted screw mechanism to enter service after 1920. This meant that two separate movements were necessary to open the breech, versus the single movement of the 'steep cone' mechanism that simultaneously rotated and withdrew the breech. Created in 1943, this technical manual reveals a great deal about the 155-mm Howitzer M1's design and capabilities. Intended as a manual for those charged with operation and maintenance, it details many aspects of its assembly, ammunition, and accessories. Originally labeled restricted, this manual was declassified long ago and is here reprinted in book form. Care has been taken to preserve the integrity of the text.

The King of Terror William J. Moylan, 2013-02-22
This book is only aimed at identifying who the two kings of the four lined prophecy, the king of terror, by Nostradamus, really are. It takes further the investigation of these two kings than others have done. It looks to the ancient antiquity, the Roman Empire era to the present day combining secular, biblical and ancient historians to form a base as proof for the reader leaving no doubt as to their identity and the uncertain future that is just ahead. This is a book of its time and that time is now as these kings kingdoms, now forming, slowly but surely are manoeuvring into position for the last giant war of wars before the return of Jesus Christ. It is a book, that as events in the world start to unravel

around the middle east, will come to be in great demand. It will come into its own. Presently the general public is completely unaware of the future that is coming for them. Led by political world leadership that cannot see the truth because of their own hypocrisy and greed for power. Their human nature will be led into a nuclear holocaust by a cunning dark and deceitful person, the king of terror. Identifying just as importantly where their kingdoms are today. Looking at the events and characters during the month of July 1999 filtering out anyone or thing that may be identified as the king of terror. Through using proven sources from secular, biblical history, with ancient reliable historians such as Titus Josephus, the book sets out methodically to prove the two blocks of nations that make up these kings kingdoms today. The European Super State that is now forming and the Shanghai Cooperation Organisation (SCO) group of nations. The prior kingdom is the king of terrors kingdom and the latter SCO being the kingdom of the Mongols he brings back to life. Obviously the kingdom of the Mongols is long gone, as Mongolia is but a tiny nation, but the descendents of this middle age Mongol empire all exist together in the SCO grouping of nations. The European Union Super State that is forming is led by a nation whos history of warfare goes back from two world wars to the sacking of the Jerusalem temple in 70 A.D. and further back to the times of Abraham. This is Germany. This can be proven through secular historians and of course biblical too. Which combine in the book. Also in this prophecy is the

last line, that war would reign before and after July 1999. Which is an important part of the prophecy. These reasons are given in the book as a spiritual war that has existed between God and satanic forces for possibly millions of years. These evil forces objected to Gods plan for mankind and have since the rebellion of Lucifer been at war with God. This war is now in its final stage in our age though now a physical one too. It is Satans physical opposite of Jesus Christ that will rule the coming European Super State. The reason for this objection against Gods plan for man by Lucifer is outlined in the book. How the world has been led by a great Religious deception ever since. Lucifers plan to make man destroy itself through nuclear war. This war is at a pivotal stage with the war in Syria today. Which will bring about an alliance of nations that has never before existed. That of Sunni Muslim nations and the European Super State together against Shia Iran and its Shanghai Cooperation Organisation (SCO) allies. This Sunni and European alliance will win this war against Iran and then through nuclear holocaust destroy the United States, United Kingdom and Israel. This will bring a greater war with the SCO nations. The SCO will sweep through Europe then into the middle east, where the European antichrist will have set up his base. The two groups then try to confront Jesus Christ at his second coming and lose. Throughout the book it goes out of its way to give back up analysis to the events just explained. To some who read this book, it will not be to their spiritual or religious beliefs. To others will be a great

deed for

Service of the Piece 105-MM Howitzer Motor Carriage M7 Priest Field Manual: FM 6-74 War Department, 2013-09 The 105-mm Howitzer Motor Carriage M7 was an American self-propelled artillery vehicle produced during World War II. It was called the Priest by the British Army, due to the pulpit-like machine gun ring. The first M7s produced were modified M3 Lee medium tanks. The M7 went through a fairly rapid shift from being based on the M3, to having more in common with the M4 Sherman. The first major example was an adoption of the M4's three piece housing, single piece casting and suspension. In British service, some M7s carried a radio set, which took the place of twenty-four rounds of ammunition. In U.S. service, the M7 was a resounding success. During the Battle of the Bulge, each U.S. armored division had three battalions of M7s, giving them unmatched mobile artillery support. A total of 3,490 M7s were built and they proved to be reliable, continuing to see service in the U.S. and allied armies well past World War II. Created in 1944, this field manual reveals a great deal about the Priest's design and capabilities. The manual prescribes the duties to be performed in the service of the M7, by firing battery personnel. Originally labeled restricted, this manual was declassified long ago and is here reprinted in book form. Care has been taken to preserve the integrity of the text.

War in Ukraine Tom Cooper, Adrien Fontanellaz, Edward Crowther, Milos Sipos, 2023-05-18 On 24 February 2022, eight years after invading the Crimean Peninsula of Ukraine and organizing an

illegal referendum in support of a subsequent Russian annexation, President of the Russian Federation Vladimir Putin ordered a full-scale invasion of Ukraine. Both Western and Russian intelligence services expected the invasion to quickly topple the democratically elected government in Kyiv and, with the help of collaborators, to overrun the Ukrainian armed forces in a matter of between 3 and 14 days. Early on 24 February, the Armed Forces of the Russian Federation (VSRF) launched a series of missile and artillery strikes on the main air bases and dozens of other military facilities in Ukraine. Immediately afterwards, the VSRF launched a ground invasion, with its forces advancing on Kyiv, Chernihiv, Kharkiv, Mariupol, Melitopol, and Kherson. Although following a build-up that had begun in April 2021, and expected by many, the onslaught still came as a major surprise for the Ukrainian government, the Ukrainian armed forces, and the majority of its allies in the West, and also for the mass of officers and other ranks of the VSRF, many of whom believed that they were only to participate in exercises. However, the deeper the Russians rolled into Ukraine, the more resistance they encountered: while some Russian units performed as expected, elsewhere whole armies began falling apart when ordered to advance at maximum possible speed without the necessary firepower and logistic support. After suffering catastrophic losses while failing to reach downtown Kyiv, and failing to reach and enter Chernihiv and Kharkiv, the war in northern and north-eastern Ukraine quickly settled down into a

bloody stalemate. In the south, the Russians initially advanced at an astonishing rate, securing Melitopol during the second day of their invasion, and Kherson only a few days later. It was only once President Putin attempted to accelerate the rate of advance through ordering heliborne operations deeper into Ukraine that the VSRF suffered a severe blow in the fighting for Voznesensk and Mykolaiv, and its advance in this part of the country also came to an end. Richly illustrated with color photography and full color artworks, and providing a detailed study of the organization and order of battle of the armed forces involved on both sides, Volume 2 of War in Ukraine provides the first detailed account of the first two weeks of the Russian invasion of Ukraine in 2022.

Armies of Russia's War in Ukraine Mark Galeotti, 2019-06-27 Explaining and illustrating the immediate background to the current Russian invasion of Ukraine, this book investigates the Ukrainian and Russian regular and irregular forces which have been fighting in the Donbas region since 2014. In February 2014, street protests in Kyiv and other Ukrainian cities led to the ousting of the Russian-backed President Yanukovich. Simultaneously, Russia carried out an almost-bloodless seizure of Ukraine's Crimean peninsula. Ukraine's 'Euromaidan Revolution' would see many changes to the country's constitution, and a turn towards the West for civic assistance and military training. Meanwhile, a violent reaction in the mainly Russian-speaking south-eastern industrial Donbas region led to a local armed counter-

revolution, backed by Russia from April 2014. This conflict became an essential example of Russia's policy of so-called 'hybrid warfare', which pursues its strategic aims by a blend of propaganda and misinformation with the clandestine deployment of Special Forces and regular troops, alongside 'deniable' proxies and mercenaries. Meanwhile, Ukraine's efforts to reform its government culminated in the landslide election of President Zelensky in April 2019. Using his extensive contacts in both Russia and Ukraine, Prof Mark Galeotti presents a thorough and intriguing primer on all the forces involved in the conflict up to 2018. Supported by orders-of-battle, colour photos and specially commissioned artwork, his book also analyses the background and the stuttering progress of the war, and addresses the Russian military capabilities which are today being tested in all-out battle.

Armies of the Iran–Iraq War 1980–88 Chris McNab, 2022-01-20 Driven by the Iranian Revolution of 1979 and the insecurities it provoked in Saddam Hussein's Iraqi dictatorship, the Iran–Iraq War would become the largest conventional conflict of the period. Curiously little-known considering its scale and longevity, the struggle between Iran and Iraq was primarily fought along the 1,458km border in a series of battles which, despite both sides being armed with modern small arms, armour and aircraft, often degenerated into attritional struggles reminiscent of World War I. Such a comparison was underlined by frequent periods of

deadlock, the extensive use of trenches by both sides, and the deployment of chemical weapons by Iraq. Fully illustrated with specially commissioned artwork, this study investigates the organization, appearance and equipment of the ground forces of both sides in the Iran–Iraq War, including Iraq's Republican Guards and Iran's Pasdaran or Islamic Revolutionary Guard Corps. The war resulted in stalemate with some half a million dead and at least as many wounded. The financial costs incurred in waging such a long and debilitating war were one of the spurs that led Saddam Hussein to invade Kuwait barely two years later, setting in motion one of the defining currents of recent Middle-Eastern history.

Team Yankee Harold Coyle, 2016-09-09 This revised and updated edition of the classic Cold War novel *Team Yankee* reminds us once again might have occurred had the United States and its Allies

taken on the Russians in Europe, had cooler geopolitical heads not prevailed. For 45 years after World War II, East and West stood on the brink of war. When Nazi Germany was destroyed, it was evident that Russian tank armies had become supreme in Europe, but only in counterpart to US air power. In 1945 US and UK bombers sent a signal to the advancing Russians at Dresden to beware of what the Allies could do. Likewise when the Russians overran Berlin they sent a signal to the Allies what their land armies could accomplish. Thankfully the tense standoff continued on either side of the Iron Curtain for nearly half a century. During those years, however, the Allies beefed up their ground capability, while the Soviets increased their air capability, even as the new jet and missile age began (thanks much to captured German scientists on both sides). The focal point of conflict remained central Germany—specifically the flat plains of the Fulda Gap—through which the Russians could pour all the way to the Channel if the Allies proved unprepared (or unable) to stop them. Team Yankee posits a conflict that never happened, but which very well might have, and for which both sides prepared for decades. This former New York Times bestseller by Harold Coyle, now revised and expanded, presents a glimpse of what it would have been like for the Allied soldiers who would have had to meet a relentless onslaught of Soviet and Warsaw Pact divisions. It takes the view of a US tank commander, who is vastly outnumbered during the initial onslaught, as the Russians pull out all the cards learned in their successful war against

Germany. Meantime Western Europe has to speculate behind its thin screen of armor whether the New World can once again assemble its main forces—or willpower—to rescue the bastions of democracy in time.
