Carnivore Behavior, Ecology, and Evolution John L. Gittleman,2019-05-15 Because carnivores are at the top of the food chain, their status is an important indicator of the health of the world ecosystem. They are intensely interesting to zoologists and uniquely intriguing to the general public. Devoted primarily to terrestrial carnivores, this volume focuses on such themes as carnivore reintroduction programs and the ethics of studying carnivores, drawing examples from a variety of species. The need to evaluate new conceptual ideas and empirical data inspired this volume of Carnivore Behavior, Ecology, and Evolution, a complement to the original book. In the eight years since publication of the first volume, conservation has emerged as a thematic imperative. The study of carnivores has become even more important in raising and resolving crucial biological problems. Differential rates of mortality in the giant panda and other endangered carnivores are now known to influence dispersal and life history patterns basic to these species' survival. Reintroduction efforts of the black-footed ferret and the red wolf are establishing essential guidelines for preservation and management of endangered species. Studies of the African lion and the dwarf mongoose illustrate the power of new genetic techniques of DNA fingerprinting for understanding the evolution of social behavior.

Ritual, Text and Law Richard F. Gyug,2017-11-28 Reflecting the range of their honorand's interests, the essays in Ritual, Text and Law provide a stimulating and panoramic exploration of the interrelated fields of liturgy and canon law in the Middle Ages, chiefly through the scrutiny of texts and their transmission. Roger Reynolds' scholarly work has not only considered the relations between law and liturgy, but has also focused on liturgical practice and the evolution of rituals, paleography and the often complicated relationships between canonical collections, in particular the southern Italian Collection in Five Books. Due in large part to Reynolds' research, the fields of medieval canon law and liturgy are now recognized as fundamental elements of medieval religious and intellectual history that shed light on medieval Christian belief and practice. The studies are grouped thematically under the headings of 'Ritual' and 'Text and Law'. Each section has an introduction by the editors, in which they survey recent developments in the study of medieval canon law and liturgy with reference to Reynolds's own research, provide historical context for the individual studies, and draw attention to the ways in which the studies reflect current concerns. Individually, the contributors offer new viewpoints on key issues and questions relating to medieval religious, cultural and intellectual history, particularly of the period c.900-1200, and especially the Italian peninsula. Collectively they illuminate the interaction of medieval Christianity and its rituals, as well as the relationship of the secular and the sacred as transmitted in liturgico-canonical texts from the time of the early church to the 14th century.

Capital Women Jan Luiten van Zanden,Tine De Moor,Sarah Carmichael,2019-02-14 How women increasingly became economic agents in early modern Europe is the focus of this stimulating book, which highlights how female agency was crucial for understanding the development of the Western European economy and sheds light on economic development today. Jan Luiten van Zanden, Tine De Moor and Sarah Carmichael argue that over centuries a European Marriage Pattern developed, characterized by high numbers of singles among men and women, high marriage ages among men and women, and neolocality, where the couple forms a new nuclear household and did not co-reside with the parents of either bride or groom. This was due to the influence of the Catholic Church's teachings of marriage based on consensus, the rise of labor markets, and institutions concerning property transfers between generations that enhanced wage labor by women. Over time an unprecedented demographic regime was created and embedded in a highly commercial environment in which households interacted frequently with labor, capital and commodity markets. This was one of the main causes of the gradual move away from a Malthusian state towards an economy able to generate long-term economic growth. The authors explore how the pattern was influenced by and influenced female human capital formation, access to the capital market, and participation in the labor market. They use numerous measures of economic activity, including the unique Girlpower-Index that measures the average age at first marriage of women minus the spousal age gap, with higher absolute age at marriage and lower spousal age gap both indicating greater female agency and autonomy. The book also examines how this measure can increase understanding of contemporary dynamics of women and the economy. The authors thus shed light on the degree to which women are allowed to play an influential role in and on the economy and society, which varies greatly from one society to another.

Instead of focusing on ways to evict or eradicate wildlife encroached on by urban development, this unique work took a holistic, ecosystems approach. Gathering information from more than five hundred academic sources and the popular media, this book educated us on the complete nature of the problem. See what's new in the Second Edition: New information garnered from secondary data sets Added contributions from an extended list of leading wildlife specialists Original research conducted by the authors and their students New chapters on urban soils, urban waters, and zoonotic diseases More perspective essays and case studies Single species profiles in each chapter that focus on management issues Numerous tables examining trends by species and by region Through discussions of past and present approaches in the United States, the book explores the changing landscape of wildlife management and future approaches. Urban habitats and hazards are defined in terms of green and gray spaces. Sociopolitical issues are discussed in terms of wildlife management, stakeholder responsibilities, and legal considerations. And wildlife are viewed as adaptive inhabitants of an evolving ecosystem rather than as interlopers in a humans only world. The author maintains a blog exploring wildlife in our own backyard.

Derezotes, helps readers understand the causes and treatment of historical trauma at an individual, group, and community level and demonstrates how a participatory, strengths-based approach can work effectively in its treatment. The first to offer a combination of theory, literature review, and practice knowledge on dialogue, this book begins with a definition of historical trauma and transformation, includes the dialogue necessary to aid in transformation (such as self-care, self-awareness and professional self- development). The author proposes six key models of dialogue practice—psychodynamic, cognitive behavioral, experiential, transpersonal, biological, and ecological—and shows how these models can be used to help transform sociohistorical trauma in clients. He then applies these six dialogue models to five common practice settings, including work with community divides, social justice work, peace and conflict work, dialogues with populations across the lifespan, and community therapy.
