Arab-Israeli Military Forces in an Era of Asymmetric Wars Anthony H. Cordesman,2006-09-30 The reality of the Arab-Israeli balance now consists of two subordinate balances: Israel versus Syria and Israel versus the Palestinians. The book analyzes these two balances in detail and their impact on defense planning in each country and on the overall strategic risk to the region as a whole. It covers military developments in each of six states- Egypt, Israel, Jordan, Lebanon, Syria, and Palestine-and provides an analytical view with charts and tables of how the changing natures of the military and political threats faced by each is impacting its military force

readiness and development. The book has the most comprehensive data on past, current, and future military force structure currently available, drawn from the widest range of sources. Responding to the most recent of events in the region, this book is the first to deal with the effects on the Arab-Israeli military balance of the strategic uncertainty created by the Iraqi insurgency and the Iranian nuclear program. It also studies how the Gaza pullout, the Syrian withdrawal from Lebanon, the changing political landscape in Israel, and the threat of nuclear proliferation are having impacts on the Egyptian-Israeli and Jordanian-Israeli peace accords and the prospects for a settlement between the Palestinians and Israelis. The roles of Hezbollah, Hamas, and Palestinian Islamic Jihad are analyzed in light of the changing political landscape in both Israel and Palestine. Given the role of Syria in the Palestinian-Israeli affairs, the book also explores the ways that internal instability in Lebanon could escalate into a regional conflict.

The Book of the Carnation R.P. Brotherston, 1923

The Panjshir Valley 1980-86 Mark Galeotti, 2021-10-28 An in-depth look at the struggle between the charismatic rebel commander Ahmad Shah Massoud, 'The Lion of Panjshir', and the Soviet forces who fought to control the Panjshir Valley in Afghanistan. When the Soviets rolled into Afghanistan in 1979, they believed if they took the cities, the country would follow. They were wrong. The Red Army found itself in a bloody stalemate in the Afghan mountains, in the strategically vital Panjshir Valley, where they faced the most able and charismatic of the rebel commanders: Ahmad Shah Massoud, the 'Lion of Panjshir'. Time and again the Soviets and their Afghan counterparts sought to take control of the Panjshir, and time and again the rebels either rebuffed their clumsy attempts or ambushed and evaded them, only to retake the valley as soon as Moscow's attention was elsewhere. Over time, the rebels acquired new weapons and developed their own tactics - as did the Soviets. The Panjshir was not just a pivotal battlefield, it also shaped the subsequent Afghan civil wars that followed Soviet withdrawal, and the military thinking that is still informing the new Russian military. Featuring striking colour artwork battlescenes and detailed maps of the fighting, this is a compelling study of one of the hardest fought struggles of the Soviet War in Afghanistan.

Gulf Military Forces in an Era of Asymmetric Wars Anthony H.

Cordesman, Khalid R. Al-Rodhan, 2007 The significance of the Persian Gulf to international peace and security and to the global energy market cannot be overstated. Events such as the attacks of September 11 and the rise in energy demand and prices have only highlighted the importance of stability in the Gulf to the health of the global economy. This book demonstrates that the nature of military and political threats in the Gulf states (Bahrain, Saudi Arabia, Iran, Iraq, Qatar, Yemen, and the UAE) has shifted during the past three years. Although the threat from Saddam Hussein's Iraq, which produced three recent, major conventional wars-Iran-Iraq (1980-88), Persian Gulf (1990), and Iraq (2003)-has largely disappeared, it has been replaced by concerns over the asymmetric warfare conducted by terrorist organizations and

over the proliferation of WMDs by both states and terrorists. These developments are affecting the defense planning and strategic posture of each country, and this book analyzes developments in the force structures of the Gulf states and their ability to deal with this shift in the nature of threat. The military and security forces of the Gulf states must evolve to adapt to the changing nature of the threat and take into account the risk of the Iraqi insurgency and the uncertainty surrounding Iraq's future. The key areas covered in this book include the internal terrorist threat to Saudi Arabia and the Gulf states; the impact of Iran's nuclear program and the risk it poses to energy and internal security in the Gulf area; and border disputes within the region that could develop into conflict. In addition, the book studies the impact of the Iraq War on regional security and the fear of the insurgency spilling over into neighboring states. Cordesman and Al-Rodhan demonstrate a shift toward using internal security services to deal with the threat of extremism and asymmetric warfare. They also suggest that high energy prices and export revenues provide the Gulf countries the opportunity to upgrade their military forces and deal with their undercapitalization as a result of low oil prices in the 1990s. Moreover, they insist that the future of Iraq, the strategic and nuclear posture of Iran, and the terrorist threat will remain major risks and uncertainties in the short to medium run.

The Iraqi Threat and Saddam Hussein's Weapons of Mass Destruction Stephen E. Hughes, 2002 The Iraqi Military and its Weapons of Mass Destruction, Saddam Hussein and Bin Laden alliance.

NATO and Warsaw Pact Armoured Fighting Vehicles of the Cold War Michael Green, 2024-01-30 While tanks were the most recognized armored vehicles during the Cold War, NATO and Warsaw Pact (WP) armies fielded a wide array of armored fighting vehicles (AFVs). These included armored cars, armored personnel carriers (APCs), anti-aircraft vehicles and self propelled artillery. Over the Cold War years nations both progressively developed series of AFVs and introduced entirely new ranges. APCs, vital to all frontline units, evolved from machine gun-armed battlefield taxis such as the US M113 and Soviet BTR-60 series into sophisticated infantry fighting vehicles. The Soviet BMP-1, US Bradley M2/M3, West German Marder and British Warrior and CVR series were classic examples of the latter, with numerous variants. The Soviet BRDM-2 series was the most numerous armored car. The British Army fielded the Saladin, Ferret and Fox and the German Army introduced the eight-wheeled Luchs and tracked SPZ11-2 Kurz. Early anti-aircraft vehicles, such as the American M42 with two 40mm Bofors, were superseded by the formidable Soviet ZSU-23-4 Shilka and the West German Gepard with radar-guided guns. This authoritative and superbly illustrated book covers the full range of AFVs in service with NATO and WP armies over the four decades of the Cold War. It will be an invaluable addition to the libraries of the expert and layman alike.

Soviet Cold War Weaponry Anthony Tucker-Jones, 2015-05-20 The T-54, T-62 and T-72 main battle tanks along with the personnel carriers, assault guns, self-propelled guns and anti-tank missiles that are illustrated in this photographic history represent the high point in the design and manufacture of armoured vehicles by the Soviet Union during the Cold War. Although the superpowers never came to blows, the 'Cold War' was far from cold, as numerous 'hot' proxy wars were fought in Africa and the Middle East, and these conflicts employed the Soviet weaponry that is shown in action in the colour and black-and-white photographs selected for this book. Between the 1950s and 1980s Soviet and Warsaw Pact countries produced thousands of tanks and armoured vehicles ready for the Third World War. They embarked on a technological arms race with the NATO allies in an attempt to counter each new piece of equipment as it appeared in service. Much of this Soviet weaponry has achieved almost iconic status and, despite its age, remains in service with armies, guerrilla forces and terrorist organizations around the world today. It is also of enduring interest to collectors, re-enactors and modellers who are fascinated by the military equipment of the late twentieth century.
