Three Wheelers Malcolm Bobbitt,2004-03 Three-wheelers have played an intrinsic part in the history of the motor vehicle. The Morgan 3 Wheeler Peter Dron,2022-05-18 New updated and revised edition! In the early years of the 21st century, the Morgan Motor Company decided to return to the configuration of its origins, with a new 3 Wheeler. One reason for this decision was that it could no longer sell its four-wheelers in the USA, due to the costs of meeting increasingly restrictive legislation on emissions and accident safety becoming prohibitive for a small manufacturer. The 3 Wheeler, classed as a motorcycle, bypasses these complex requirements. By coincidence, an American three-wheeler, the Liberty Ace (itself a modernised recreation of the V-Twin Morgan Super Sports of the 1930s) was selected as the starting point. Morgan then designed and engineered the new model in an astonishingly short period. The management thought it might sell a few hundred 3 Wheelers; however, orders flooded in after its launch at the 2011 Geneva Motor Show, leading to considerable complications. This is the story of how all that happened and how an eccentric sports car with an American engine and a Japanese gearbox is, nevertheless, quintessentially English.

The A-Z of Three-wheelers Elvis Payne,2014-01-20 ... The three-wheeler car, in its various guises and names, has had a much undervalued influence on the development of the present day motorcar. the start of the Industrial Revolution and the world's first self propelled vehicle (Cugnot's three wheeler of 1769), to the Concept cars of the future, these vehicles have changed motoring history ...

Three-Wheelers Ken Hill,2011-09-20 It is generally accepted that Karl Benz was the inventor of the motor car in 1885 but it is less well known that his car was a three-wheeler. Starting with the developments in the early years, this book puts three-wheelers in their historical context and describes the companies which produced them. For the first twenty-five years three and four wheel designs were developed side by side but the three-wheeler had severe bodywork limitations and four wheels gave a far more stable platform on which to build. Motoring at this time was limited to the wealthy and manufacturers began to realise that there was potentially an enormous market for cars at a reasonable price. For twenty years the light car, cyclecar, three-wheeler and motorcycle competed for this market until they were eclipsed by the mass-produced, £100 motor car. Since the Second World War many attempts have been made to revive the three-wheeler but the days when one in ten of vehicles on the road was a three-wheeler have gone.
