On Thom Spectra, Orientability, and Cobordism Yu. B. Rudyak, 2007-12-12

Rudyak's groundbreaking monograph is the first guide on the subject of cobordism since Stong's influential notes of a generation ago. It concentrates on Thom spaces (spectra), orientability theory and (co)bordism theory (including (co)bordism with singularities and, in particular, Morava K-theories). These are all framed by (co)homology theories and spectra. The author has also performed a service to the history of science in this book, giving detailed attributions.

Piecewise Linear Structures on Topological Manifolds Yuli Rudyak, 2015-12-28

' The study of triangulations of topological spaces has always been at the root of geometric topology. Among the most studied triangulations are piecewise linear triangulations of high-dimensional topological manifolds. Their study culminated in the late 1960s–early 1970s in a complete classification in the work of Kirby and Siebenmann. It is this classification that we discuss in this book, including the celebrated Hauptvermutung and Triangulation Conjecture. The goal of this book is to provide a readable and well-organized exposition of the subject, which would be suitable for advanced graduate students in topology. An exposition like this is currently lacking. Contents: Preface Introduction Graph Architecture of the Proof Normal Invariant Applications and Consequences of the Main Theorem Appendix: Quinn's Proof of Product Structure Theorem Readership: Researchers working in

manifolds, algebraic topology, and K-theory. Key Features: First systematic treatment of the subject
New treatment of certain topics
Keywords: Hauptvermutung; Triangulation Conjecture'

The Structure of Classical Hebrew Poetry: Isaiah 40-55 M.C.A.

Korpel, Johannes de Moor, 2021-11-15 Exegesis starts with the delimitation of the pericope to be interpreted. Yet the principles for selecting passages which form the part of departure for the exegete are seldom made explicit and if one compares various commentaries and Bible translations, it soon becomes apparent that this lack of methodical transparency gives rise to a lot of confusion and dissent. In this work the authors make use of text divisions found in ancient Hebrew, Greek and Syriac manuscripts of Isaiah 40-55 (Deutero-Isaiah). For the first time the poetic structure of the text is based on controllable evidence which is roughly 500-1000 years older than the medieval Masoretic manuscripts on which all modern editions are based. The results are astonishing and raise the question why this type of evidence has been largely neglected thus far.

Algebraic Topology Martin C. Tangora, 1993 This book consists of twenty-nine articles contributed by participants of an International Conference in Algebraic Topology held in July 1991 in Oaxtepec, Mexico. In addition to papers on current research, there are several surveys and expositions on the work of Mark Mahowald, whose sixtieth birthday was celebrated during the conference. The conference was truly international, with over 130

mathematicians from fifteen countries. It ended with a spectacular total eclipse of the sun, a photograph of which appears as the frontispiece. The papers range over much of algebraic topology and cross over into related areas, such as K -theory, representation theory, and Lie groups. Also included is a chart of the Adams spectral sequence and a bibliography of Mahowald's publications.

Shattered Life Nathan Goethe,

Ceramic Integration and Joining Technologies Mrityunjay Singh, Tatsuki Ohji, Rajiv Asthana, Sanjay Mathur, 2011-10-11 This book joins and integrates ceramics and ceramic-based materials in various sectors of technology. A major imperative is to extract scientific information on joining and integration response of real, as well as model, material systems currently in a developmental stage. This book envisions integration in its broadest sense as a fundamental enabling technology at multiple length scales that span the macro, millimeter, micrometer and nanometer ranges. Consequently, the book addresses integration issues in such diverse areas as space power and propulsion, thermoelectric power generation, solar energy, micro-electro-mechanical systems (MEMS), solid oxide fuel cells (SOFC), multi-chip modules, prosthetic devices, and implanted biosensors and stimulators. The engineering

challenge of designing and manufacturing complex structural, functional, and smart components and devices for the above applications from smaller, geometrically simpler units requires innovative development of new integration technology and skillful adaptation of existing technology.

The Algebra of Secondary Cohomology Operations Hans-Joachim

Baues,2006-06-12 The algebra of primary cohomology operations computed by the well-known Steenrod algebra is one of the most powerful tools of algebraic topology. This book computes the algebra of secondary cohomology operations which enriches the structure of the Steenrod algebra in a new and unexpected way. The book solves a long-standing problem on the algebra of secondary cohomology operations by developing a new algebraic theory of such operations. The results have strong impact on the Adams spectral sequence and hence on the computation of homotopy groups of spheres.

Elements of Homology Theory Viktor Vasil'evich Prasolov,2007 The book is a continuation of the previous book by the author (Elements of Combinatorial and Differential Topology, Graduate Studies in Mathematics, Volume 74, American Mathematical Society, 2006). It starts with the definition of simplicial homology and cohomology, with many examples and applications. Then the Kolmogorov-Alexander multiplication in cohomology is introduced. A significant part of the book is devoted to applications of simplicial homology and cohomology to obstruction theory, in particular, to characteristic classes of vector bundles. The later chapters are concerned with singular homology and cohomology, and Čech and de Rham cohomology. The book ends with various applications of homology to the topology of manifolds, some of which might be of interest to experts in the area. The book contains many problems; almost all of them are provided with hints or complete solutions.
