Walter S. Dunn Jr.

Stalin's Keys to Victory Walter Scott Dunn,2007 When Hitler invaded the Soviet Union in June 1941, the German Army annihilated a substantial part of the Red Army. Yet the Soviets rebounded to successfully defend Moscow in late 1941, defeat the Germans at Stalingrad in 1942 and Kursk in 1943, and deliver the deathblow in Belarus in 1944 ... Walter Dunn examines these four pivotal battles and explains how the Red Army lost a third of its prewar strength, regrouped, and beat one of the most highly trained and experienced armies in the world--Page 4 of cover.

**M4 (76mm) Sherman Medium Tank 1943-65** Steven J. Zaloga,2013-08-20 The M4 Sherman tank was the mainstay of the Western allies between 1942 and 1945. Fast and modern it was a big success and was transported as far afield as Russia and North Africa. The American Chief of Staff claimed in November 1943 it was 'hailed widely as the best tank on the battlefield today...'. However, by the Normandy invasion of June 1944 this was not the case: the new German heavy tanks such as the Panther and Tiger were completely outclassing the Sherman. This title covers the M4 version armed with the 76 mm gun, examining developments such as the HVSS suspension, using much new archive material.

**Red Army Weapons of the Second World War** Michael Green,2022-09-21 While the Red Army's arsenal at the start of the Second World War included weapons dating back to the Great War or earlier, the 1930s' modernization program had introduced the automatic Tokarev pistol and self-loading Tokarev rifle. Its small arms were soon replaced by mass-produced sub-machine guns, such as the PPSH 1941, nicknamed the 'PePeSha,'. Supplementing the submachine guns, the Degtyarev Light Machine Gun DP-27. Fitted with a circular pan magazine, it received the not-unsurprising nickname 'Record Player.' New mortars and towed artillery pieces, ranging from 76mm to 203mm, entered service in the pre-war years. In addition to a wide range of towed, self-propelled and anti-tank guns, the Soviets fielded the Katyusha rocket launchers in 1941, nicknamed the 'Stalin's organ' by the Germans. The 1930s saw the introduction of the BT light tank series. The iconic T-34 medium tank series came into service in late 1940, joined by the IS-2 heavy tank from early 1944, the prefix letters 'IS' translates to Joseph Stalin. These formidable AFVs led the Red Army to victory in May 1945 over Nazi Germany. All these weapons and more are covered with numerous images in this authoritative overview of the subject.

**Shelldrake** Harold A. Skaarup,2012-02 Shelldrake is an informative and detailed synopsis of the carefully preserved and restored guns and artillery on display in Canada. The Royal Regiment of Canadian Artillery is represented by a long and distinguished line of gunners with historical ties back to the days before Canada's Confederation. The honour of defending Canada while standing steady to support operations overseas in peace and war continues to this day. In doing so, it is necessary to remember that the weapons of war are an integral part of what keeps this nation safe, although the examples that have been used to make it so are few and far between. The descriptions of Canadian artillery and the places of honour where they can be viewed highlights the importance of the equipment that brought our nation forward at key turning points in history when our guns were in use as tools of war at home and overseas. This guide book will show the interested reader where to find examples of the historical guns preserved in Canada, and perhaps serve as a window on how Canada's military contribution to security in the world has evolved.--Page 4 of cover.

The United States Marine Corps in the Korean War Michael Green,2021-03-19 This pictorial history covers the US Marine Corps' outstanding contribution, organization, tactics, fighting doctrine and weaponry during the Korean War. On June 25, 1950, the North Korean Army invaded South Korea. Among the US forces sent to South Korea was the 1st Marine Division. In September 1950, the Division audaciously landed deep behind enemy lines at Inchon port, throwing the North Korea Army into disarray. In November 1950, the Chinese Army invaded North Korea with eight divisions tasked with the destruction of the 1st Marine Division at the Chosin Reservoir. The Marines made a 78-mile fighting withdrawal in arctic conditions before being evacuated by the US Navy. In February 1951, the 1st Marine Division returned to combat assisting Eighth (US) Army to repulse five Chinese Army offensives over four months. By November 1951, the large-scale operations by the opposing sides had ended, replaced by a stalemate which lasted until the 27 July, 1953 armistice. With rare wartime images, this volume vividly chronicles the bitter three-year conflict.

**SU-76 Assault Gun** Steven J. Zaloga,2019-05-30 The SU-76 assault gun was the second most widely manufactured Soviet armoured fighting vehicle of World War II, out-numbered only by the legendary T-34. Inspired in part by the German Marder series of tank destroyers, Soviet designers realized that the chassis of the obsolete T-70 light tank could be adapted to a much more substantial gun if it was placed in a fixed casemate rather than in a turret. This led to the design of the SU-76, which saw its combat debut at Kursk in the summer of 1943. The SU-76 was deployed primarily as an infantry direct support weapon, becoming the infantry tank of the Red Infantry, much as the StuG III became the infantry tank of the German infantry. Featuring full colour artwork and written by an expert on tank warfare during World War II, this fascinating study describes one of the Soviet Union's most important armoured vehicles during its struggle with Nazi Germany.

**The 3rd SS Panzer Regiment** Pierre Tiquet,2020-07-30 "A fascinating look into the experiences of the men of an elite armored unit that fought on the Eastern Front, written essentially in their own words." —AMPS The 3rd SS Panzer Regiment was part of the Totenkopf Division—one of the thirty-eight Waffen-SS divisions active during World War II. Notorious for its brutality, most notably a mass execution of British prisoners in the Battle of France, Totenkopf had a fearsome reputation. The 3rd SS Panzer Regiment was formed in France in late 1942, and transferred to the Eastern Front in early 1943, where it fought for the rest of the war. The regiment participated in a number of battles, and would be reduced and rebuilt a number of times. The panzers of 3rd SS Panzer Regiment fought at Kharkov, took part in Operation Citadel, fought in the battle of Krivoi Rog, and the relief of the Korsun Pocket. The regiment then retreated over the Dniester. They fought in Poland against the Russian advance, before being moved to Hungary where they participated in the attempt to relieve Budapest. They eventually surrendered in Czechoslovakia to the 11th US Armored Division. This book tells the story of the 3rd SS Panzer Regiment through the words of the veterans themselves. Among the veterans whose accounts are included are Walter Weber, a member of a tank crew in 5. Kompanie who recounts their optimism and high spirits at the start of Operation Citadel as the Germans made initial advances, followed by retreat as winter set in and the Russians began to push them back. Unterscharführer Stettner recalls the fierce tank battles and the difficulties advancing across minefields and evading an often well-concealed

foe. Corporal Fritz Edelmann records the attempts to relieve Budapest in 1945 that Totenkopf took part in, which ended in encirclement, defeat and surrender to the Americans on May 9, 1945. In addition, it is illustrated with a wealth of contemporary photographs, original documents, and artifacts.

Panther Michael Green,Gladys Green,2012-07-20 Author Mike Green provides new insights into the creation and ultimate failure of the German Panther tank. In most people's opinion, the German Panther tank was the most elegant tank design of World War II. It embodied a balance of firepower, armor protection, and mobility unmatched by any other tank of the period. Yet, it was not the war-winner it might have been. Author Mike Green examines the disparity between the potential of the Panther design and the actuality of the fielded Panther tank in this book. Though many viewed the Panther as an engineering masterpiece and a technological breakthrough, it failed to meet expectations on the battlefield, and thus proved a major setback to Hitler's dreams of world domination. Green explores the evolution, and devolution, of the Panther, providing keen insight and new reasons for its ultimate failure.

**Berlin Blockade** Gerry van Tonder,2017-04-30 When the world held its breath It is 25 years since the end of the Cold War, now a generation old. It began over 75 years ago, in 1944long before the last shots of the Second World War had echoed across the wastelands of Eastern Europewith the brutal Greek Civil War. The battle lines are no longer drawn, but they linger on, unwittingly or not, in conflict zones such as Iraq, Somalia and Ukraine. In an era of mass-produced AK-47s and ICBMs, one such flashpoint was Berlin.Allied agreements entered into at Teheran, Yalta and Potsdam for the carving up of postwar Berlin now meant nothing to the Soviet conquerors. Their victory had cost millions of Russian lives troops and civilians so the hammer and sickle hoisted atop the Reichstag was more a claim to ownership than success. Moscows agenda was clear and simple: the Western Allies had to leave Berlin. The blockade ensued as the Soviets orchestrated a determined program of harassment, intimidation, flexing of muscle, and Socialist propaganda to force the Allies out. Truman had already used the atomic bomb: Britain and America would not be cowed. Historys largest airborne relief program was introduced to save the beleaguered city. In a war of attrition, diplomatic bluff and backstabbing, and mobilizing of forces, the West braced itself for a third world war.

**Hitler's Nemesis** Walter S. Dunn Jr.,2009-02-02 Details on the Soviet infantry, armor, artillery, and cavalry formations that waged World War II on the Eastern Front Fills a major gap in our understanding of the Red Army Based on painstaking archival research Hitler's Nemesis traces the development of the Russian army in reaction to the rise of Hitler, Germany's invasion of the Soviet Union in June 1941, and the progression of World War II over the following four years. Caught by surprise in 1941, the Red Army teetered on the brink of destruction before bouncing back to defend Moscow, defeat the Germans at Stalingrad and Kursk, and annihilate the German Army in 1944-45. This is the story of how the Soviets staged this miraculous turnaround.

*Soviet Airborne Forces 1930-91* David Campbell,2020-02-20 Established in 1932, the Vozdushno-desantnye voyska ('air-landing forces', or VDV) of the Red Army led the way in airborne doctrine and practice. Though they were initially handicapped by a lack of infrastructure, due in part to a turbulent political climate in the 1930s, they still conducted major drops during World War II, including at the Dnepr River in September 1943. After the war ended, the VDV became independent of the Air Force and were elevated to the role of strategic asset. The newly rebuilt divisions were now organized and trained to conduct deep insertions behind enemy lines, attacking command-and-control facilities, lines of communication, and key infrastructure targets such as nuclear power plants. This training came into play in numerous Cold War confrontations, including Soviet operations in Hungary (1956) and Czechoslovakia (1968). During the Soviet war in Afghanistan (1979-89), the VDV proved to be the most formidable of the Mujahideen's opponents, with the development of the air assault concept - the transport, insertion and support of air-landed troops by helicopter rather than parachute. This title explores the development of the VDV from their conception in 1930 to their role in the Cold War and in the later invasion of Afghanistan. Supported by contemporary photography and specially commissioned artwork of uniforms and battlescenes, this title is a comprehensive and engaging guide to the history of airborne forces in the Soviet period.
