Adjuvant Analgesics David Lussier, Pierre Beaulieu, 2015-03-20 Collective knowledge of the origins and pharmacology of pain are evolving rapidly, providing increased hope for better pain management and a far greater quality of life for patients worldwide. However, there are few works

dedicated to guiding primary care practitioners and clinical researchers through the use of adjuvant analgesics. Part of the Oxford American Pain Library, Adjuvant Analgesics provides a detailed discussion of the various classes of these drugs including antidepressants and anticonvulsants, cannabinoids, topical analgesics, and local anesthetics. Chapters cover a basic introduction to adjuvant analgesics for pain control, appropriate clinical applications of the various drug classes in the management of common pain problems, and on drug-drug interactions between adjuvant analgesics and traditional analgesics. Important pain entities such as acute postoperative, cancer-related, neuropathic pain, and fibromyalgia are addressed, filling an important gap in today's medical literature.

Equal Opportunity Peacekeeping Sabrina Karim,Kyle Beardsley,2017 Recent developments such as Sweden's' Feminist Foreign Policy, the Hillary Doctrine, and the integration of women into combat roles in the U.S. have propelled gender equality to the forefront of international politics. The UN Department of Peacekeeping Operations, however, has been integrating gender equality into peacekeeping missions for nearly two decades as part of the women, peace and security agenda that has been most clearly articulated in UNSC Resolution 1325. To what extent have peacekeeping operations achieved gender equality in peacekeeping operations and been vehicles for promoting gender equality in post-conflict states? While there have been major improvements related to women's participation and protection, there is still much left to be desired. Sabrina Karim and Kyle Beardsley argue that gender power imbalances between the sexes and among genders place restrictions on the participation of women in peacekeeping missions. Specifically, discrimination, a relegation of women to safe spaces, and sexual exploitation, abuse, harassment, and violence (SEAHV) continue to threaten progress on gender equality. Using unique

cross-national data on sex-disaggregated participation of peacekeepers and on the allegations of SEAHV, as well as original data from the UN Mission in Liberia, the authors examine the origins and consequences of these challenges. Karim and Beardsley also identify and examine how increasing the representation of women in peacekeeping forces, and even more importantly through enhancing a more holistic value for equal opportunity, can enable peacekeeping operations to overcome the challenges posed by power imbalances and be more of an example of and vehicle for gender equality globally.

Leipzig After Bach Jeffrey S. Sposato, 2018
Leipzig, Germany, is renowned as the city where Johann Sebastian Bach worked as a church musician until his death in 1750, and where Felix Mendelssohn Bartholdy directed the famed Gewandhaus orchestra until his own death in 1847. But the century in between these events was critically important as well. During this period, Leipzig's church music enterprise was convulsed by repeated external threats—a growing middle class that viewed music as an object of public consumption, religious and political tumult, and the chaos of the Seven Years and Napoleonic wars. Jeffrey S. Sposato's *Leipzig After Bach* examines how these forces changed church and concert life in Leipzig. Whereas most European cities saw their public concerts grow out of secular institutions such as a royal court or an opera theater, neither of these existed when Leipzig's first subscription concert series, the Grosse Concert, was started in 1743. Instead, the city had a thriving Lutheran

church-music enterprise that had been brought to its zenith by Bach. Paid subscription concerts therefore found their roots in Leipzig's church music tradition, with important and unique results. These included a revolving door between the Thomaskantor position and the Gewandhaus directorship, as well as public concerts with a distinctly sacred flavor. Late in the century, as church attendance faltered and demand for subscription concerts rose, the Gewandhaus dominated the musical life of Leipzig, influencing church music programming in turn. Examining liturgical documents, orchestral programs, and dozens of unpublished works of church and concert music, *Leipzig After Bach* sheds new light on a century that redefined the relationship between sacred and secular musical institutions.

Ecosocial Theory, Embodied Truths, and the People's Health Nancy Krieger, 2021-09-17 From public health luminary Nancy Krieger comes a revolutionary way of addressing health justice and the embodied truths of lived experience. Since the 1700s, fierce debates in medicine and public health have centered around whether sources of ill health can be attributed to either the individual or the surrounding body politic. But what if instead health researchers measure--and policies address--how people biologically embody their societal and ecological context? *Ecosocial Theory, Embodied Truths, and the People's Health* represents a daring new foray into analyzing how population patterns of health reveal the

intersections of lived experience and biology in historical context. Expanding on Nancy Krieger's original ecosocial theory of disease distribution, this volume lays new theoretical groundwork about embodiment and health justice through concrete and novel examples involving pathways such as workplace discrimination, relationship abuse, Jim Crow, police violence, pesticides, fracking, green space, and climate change. It offers a crucial counterargument to dominant biomedical and public health narratives attributing causality to either innate biology or decontextualized health behaviors and provides a key step forward towards understanding and addressing the structural drivers of health inequities and health justice. Bridging insights from politics, history, sociology, ecology, biology, and public health, *Ecosocial Theory, Embodied Truths, and the People's Health* presents a bold new framework to transform biomedical and population health thinking, practice, and policies and to advance health equity across a deeply threatened planet.

International Migration Law Vincent

Chetail, 2019-04-04 International Migration Law provides a detailed and comprehensive overview of the international legal framework applicable to the movement of persons across borders. The role of international law in this field is complex, and often ambiguous: there is no single source for the international law governing migration. The current framework is scattered throughout a wide array of rules belonging to numerous fields of international law, including refugee law, human rights law, humanitarian law, labour law, trade

law, maritime law, criminal law, and consular law. This textbook therefore cuts through this complexity by clearly demonstrating what the current international law is, and assessing how it operates. The book offers a unique and comprehensive mapping of this growing field of international law. It brings together and critically analyses the disparate conventional, customary, and soft law on a broad variety of issues, such as irregular migration, human trafficking, refugee protection, labour migration, non-discrimination, regional free movement schemes, and global migration governance. It also offers a particular focus on important groups of migrants, namely migrant workers, refugees, and smuggled migrants. It maps the current status of the law governing their movement, providing a thorough critical analysis of the various stands of international law which apply to them, suggesting how the law may continue to develop in the future. This book provides the perfect introduction to all aspects of migration and international law.
