A-26 Invader Units of World War 2 Jim Roeder, 2013-01-20

Designed to combine the bombing capability of the B-26 Marauder with the versatility of the ground-attack A-20 Havoc, the A-26 Invader would become the USAAF's attack bomber par excellence. Capable of flying low-level strafing or conventional bombing missions by simply changing the nose configuration of the aircraft, the Invader first saw action in 1943 in the Pacific Theatre attacking Japanese-held islands. Arriving in Europe several months later, the A-26 served with distinction for the remainder of World War 2. In fact, the design proved so successful that it would go on to fly combat missions for a further two decades. Written by military aviation expert, Jerry Scutts, and illustrated with brand-new colour profiles and rare photography, this is the first book to focus exclusively on the A-26's missions in World War 2.

A-26/B-26 Invader David Doyle, 2016 The Douglas A-26

Invader served the United States with distinction in various combat roles during World War II, Korea and Vietnam. Originally created as an attack aircraft, with the designation A-26, the Invader was designed to replace the A-20 Havoc, North American B-25 Mitchell and the Martin B-26 Marauder for the U.S. Army Air Forces. However, production delays prevented the aircraft from reaching the field until June 1944. With as many as 14 forward-firing .50 caliber machine guns as well as bombs and rockets, the Invader was well-suited for ground strikes when the Korean War broke out in 1951. The Invader flew into combat and carried the markings of the U.S. Air Force as the re-designated B-26. Later, the French used the Invader during their war in Vietnam. Shortly after the United States entered the conflict, Invaders returned to the sky over Vietnam in the hands of American as well as South Vietnamese crews. In order to base the aircraft type in Thailand, which prohibited USAF bombers, the Invader was once more classified as an attack aircraft, and the A-26 designation returned. This new title is profusely illustrated with more than 175 photos,

35 of which are in vintage color, as well as two color profile illustrations and 10 line drawings.

A-20 Boston at War William N. Hess, 1979 Although built by the U.S. Douglas corporation, the A-20 Boston got its name and had some of its finest moments in British service. The first Bostons arrived in England during the Battle of Britain, when aircraft of all sorts were in short supply. It proved to be one of the best light bombers of the war, serving on nearly all fronts and with most of the Allies. Due to its superior bomb-aimer, Bostons led formations of more modern bombers even in the last months of the war. This classic work, long out of print, also covers later variants of the A-20 design which served in Korea and Vietnam.

Chang'an 26 BCE Michael Nylan, 2015-05-21 During the last two centuries BCE, the Western Han capital of Chang'an, near today's Xi'an in northwest China, outshone Augustan Rome in several ways while administering comparable numbers of imperial subjects and equally vast territories. At its grandest, during the last fifty years or so before the collapse of the dynasty in 9 CE, Chang'an boasted imperial libraries with thousands of documents on bamboo and silk in a city nearly three times the size of Rome and nearly four times larger than Alexandria. Many reforms instituted in this capital in late Western Han substantially shaped not only the institutions of the Eastern Han (25-220 CE) but also the rest of imperial China until 1911. Although thousands of studies document imperial Rome's glory, until now no book-length work in a Western language has been devoted to Han Chang'an, the reign of Emperor Chengdi (whose accomplishments rival those of Augustus and Hadrian), or the city's impressive library project (26-6 BCE), which ultimately produced the first state-sponsored versions of many of the classics and masterworks that we hold in

our hands today. Chang'an 26 BCE addresses this deficiency, using as a focal point the reign of Emperor Chengdi (r. 33–7 bce), specifically the year in which the imperial library project began. This in-depth survey by some of the world's best scholars, Chinese and Western, explores the built environment, sociopolitical transformations, and leading figures of Chang'an, making a strong case for the revision of historical assumptions about the two Han dynasties. A multidisciplinary volume representing a wealth of scholarly perspectives, the book draws on the established historical record and recent archaeological discoveries of thousands of tombs, building foundations, and remnants of walls and gates from Chang'an and its surrounding area.

B-26 Invader Units over Korea Warren

Thompson,2000-09-25 Although a hangover from World War II, the seemingly antiquated B-26 Invader proved to be one of the hardest-worked assets employed by the UN forces in Korea for the duration of the conflict. Indeed, B-26s of the 3rd Bomber Group had the distinction of being the first aircraft to drop ordnance on the North Koreans within hours of the communist invasion of the south. Capable of dropping bombs and napalm, firing off unguided rockets or simply strafing targets with its battery of .50-cal Browning guns, the B-26 was equally as effective during the day or at night. Over 200 bomber and reconnaissance variants saw action in Korea, and many were adorned with some of the most colourful nose art ever carried by American combat aircraft in any war. This volume includes a gallery of this artwork, with text outlining the exploits of the pilots featured, and appendices listing the units involved.

INTRODUCTION This manual is the text for your training as a A-26 pilot and airplane commander. The Air Forces' most experienced training and supervisory personnel have collaborated to make it a

complete exposition of what your pilot duties are, how each will be performed, and why it must be performed in the manner prescribed. The techniques and procedures described in this book are standard and mandatory. In this respect the manual serves the dual purpose of a training checklist and working handbook. Use it to make sure that you learn everything described herein. Use it to study and review the essential facts concerning everything taught. Such additional self-study and review will not only advance your training, but will alleviate the burden of your already overburdened instructors. This training manual does not replace the Technical Orders for the airplane, which will always be your primary source of information concerning the A-26 so long as you fly it. This is essentially the textbook of the A-26. Used properly, it will enable you to utilize the pertinent Technical Orders to even greater advantage
