*Snowfall Rates Obtained from Radar Reflectivity Within a 50 Km Range* Roland J. Boucher, 1981 The snowy winter of 1978 in Massachusetts allowed five opportunities to test the dependability of a CPS-9, 3.2-cm radar to determine snowfall rate and total snowfall accumulation at up to seven measuring sites within 50 km of the radar. Spaced at intervals of 0.5 -to 1-h, 166 snowfall-rate measurements yielded a correlation coefficient of 0.88. However, in correlating the total storm snowfall, the amount of radar-measured snowfall above a reference snowfall measurement site was made equal to the snowfall actually measured at this location. This calibration technique improved the storm snowfall correlation coefficient to 0.96.

**Bitcoin: Ayn Rand was wrong, Atlas never shrugged: A 50 year old dream** SAADETTİN KONUKSEVEN, TUNA ÖZEN, 2018-07-17 In Ayn Rand's *Atlas Shrugged*, all the people who work, contribute and produce start disappearing one by one as a result of the government attempting to take over all lines of work. These people are convinced to disappear by a man called John Galt. The whole country asks the same question, which also happens to be the motto for the book: "Who is John Galt?" Due to Bitcoin becoming so well-known and having regular appearances on headlines, everyone started looking for the creator of Bitcoin, who is still a mystery. Just like *Atlas Shrugged*, a similar question gnawed at the minds of people and made headlines: "Who is Satoshi Nakamoto?" Why did we start with such a prologue? Because you cannot understand Bitcoin without reading Ayn Rand and understanding Friedrich Hayek. Because every revolution has an ideal foundation. Even though Bitcoin is a software revolution, it is also an ideal one. A revolution with roots reaching to the first days of humanity. A revolution that will take humans back to their essence. A revolution that may bring Capitalism: The Unknown Ideal, as Ayn Rand calls it. Bitcoin is a revolution against all third parties whom we believe to be trustworthy. It is a revolution against governments, banks, land registry offices, notaries and all intermediaries. It may very well be the foundation of a new world where only those who produce will rise, where borders will disappear; the utopia founded by John Galt for the hard-working people. The media did not say that a revolution has happened when the French Revolution occurred in 1789. People didn't start thinking, "the concept of nation state is born and a new era has begun." Only after 100-150 years it was understood that this movement was a revolution that marked the end of an era and the beginning of a new one. Ayn Rand was wrong. Atlas never shrugged!

**The Book of Potentially Catastrophic Science** Sean Connolly, 2017-03-07 It's never been more important to engage a child's scientific curiosity, and Sean Connolly knows just how to do it—with lively, hands-on, seemingly dangerous experiments that pop, ooze, crash, and teach! Now, the author of *The Book of Totally Irresponsible Science*, takes it one step further: He leads kids through the history of science, and then creates amazing yet simple experiments that demonstrate key scientific principles. Tame fire just like a Neanderthal with the Fahrenheit 451 experiment. Round up all your friends and track the spread of disease using body glitter with an experiment inspired by Edward Jenner, the vaccination pioneer who's credited with saving more lives than any other person in history. Rediscover the wheel and axle with the ancient Sumerians, and perform an astounding experiment demonstrating the theory of angular momentum. Build a simple telescope—just like Galileo's—and find the four moons he discovered orbiting Jupiter (an act that helped land him in prison). Take a less potentially catastrophic approach to electricity than Ben Franklin did with the Lightning Mouth experiment. Re-create the Hadron Collider in a microwave with marshmallows, calculator, and a ruler—it won't jeopardize Earth with a simulated Big Bang, but will demonstrate the speed of light. And it's tasty! By letting kids stand on the shoulders of Aristotle, Newton, Einstein, the Wright brothers, Marie Curie, Darwin, Watson and Crick, and more, *The Book of Potentially Catastrophic Science* is an uncommonly engaging guide to science, and the great stories of the men and women behind the science.

**Flight Craft 6: Ily'yushin/Beriye A-50** Yefim Gordon,2015-04-30 Brought out in the late 1970s as a successor to the obsolete Tu-126 airborne early warning aircraft, the A-50 co-developed by the Il'yushin and Beriye bureaus is one of the most interesting military variants in the field of IL-76 military transport. Differing outwardly from the latter mainly in having a conventional "saucer" rotodome, the A-50 entered flight testing in 1980; the new Soviet AWACS entered service four years later. The improved A-50M was developed several years after that. The type continues in service with the Russian Air Force today, and the fleet is being upgraded to A-50U standard. ??This book describes the A-50's thrilling developmental history, taking in its many variants (including the A-50EI export model for India) and gives an extensive overview of the various scale model kits covering the subject currently available on the market.
