Aircraft Valuation in Volatile Market Conditions Bijan Vasigh,Farshid Azadian,2022-03-15 This book provides indispensable knowledge for practitioners in aircraft financing. It presents an innovative framework that treats valuation analysis as a systematic effort in problem-solving directed at rational financial decision-making. It incorporates much of the modern approach to financial investment decision-making. It proposes essential tools of flexibility, adaptability, and commonality of aircraft financial analyses that apply to an almost infinite variety of valuation problem situations. Once these connections have been introduced, the reader will be equipped with an understanding of the underlying concepts of aircraft valuation processes and techniques and the subsequent financing alternatives available to fund aircraft assets. This is an essential book for airline professionals, aircraft leasing companies, consultants, bankers, government officials, and students of aircraft finance. It is an approachable resource for those without a formal background in finance.

The World's Most Powerful Civilian Aircraft Paul E. Eden,2016-12-15 The World's Most Powerful Civilian Aircraft profiles many types, from cargo transports and freighters, through flying boats, passenger airliners, and business jets. Featured aircraft include the Ford Trimotor "Tin Goose," one of the great workhorses of early aviation history; the supersonic Tupolev Tu-144 "Charger" and Concorde, Cold War competitors in aviation excellence; and the most popular passenger aircraft of the present, including the Boeing 747 and Airbus A380. Each entry includes a brief description of the model's development and history, a profile view, key features, and specifications. Packed with more than 200 artworks and photographs, this is a colorful guide for the aviation enthusiast.

Airline Competition: Deregulation's Mixed Legacy George Williams,2017-07-05 Arguing that full deregulation of the airline industry leads to the production of excess capacity, Williams surveys the tactics and strategies of airline carriers to global deregulation. Focusing primarily on United States and European carriers, he compares the two industries, finding that Europeans have emulated US strategies in the aftermath of liberalization. Aside from the cavil about excess capacity, Williams views deregulation as a good thing, arguing that it leads to lower fares and more competition. What is needed, he suggests, is a global deregulation that would allow for worldwide consolidation of the airline industry.

Aerospace Marketing Management Philippe Malaval,Christophe Bénaroya,2012-12-06 Aerospace Marketing Management is a marketing manual devoted to: -the aeronautics sector: parts suppliers, aircraft manufacturers, and airlines, -the space sector: suppliers, integrators, and service providers. It presents the essentials of marketing from basic concepts such as segmentation, positioning and the marketing plan, to the product policy, pricing, distribution and communication. This book also includes specific chapters on project marketing, brand policy, gaining loyalty through maintenance and training, compensation, and alliance strategies. The different chapters show the new changes due to Internet: -e-procurement for the purchase strategy, -interactive communication with websites, -e-ticketing for the airlines to reach final consumers.

Air Transportation John Wensveen,2023-05-24 Now in its ninth edition, Air Transportation: A Global Management Perspective by John Wensveen is a well-proven, accessible textbook that offers a comprehensive introduction to the theory and practice of air transport management. In addition to explaining the fundamentals, the book transports the reader to the leading edge of the discipline, using past and present trends to forecast future challenges and opportunities the industry may face, encouraging the reader to think deeply about the decisions a manager implements. The word Global has been added to the subtitle for this edition, reflecting an increased emphasis on worldwide operations, including North America, Latin America/Caribbean, Europe, Asia-Pacific, the Middle East, and Africa. The ninth edition focuses on the Age of Acceleration, addressing trends related to emerging technologies, such as autonomy, artificial intelligence, augmented reality, virtual reality, 3-D printing, data analytics, blockchain, cybersecurity, etc. New material includes extra information on airport management and operations, air carrier business models, aviation risk, safety and security, and how changing political landscapes impact the aviation industry. Enhanced content is supported by the addition of new chapters and online supplemental resources, including PowerPoint presentations, chapter quizzes, exam questions, and links to online resources. This wide-ranging textbook is appropriate for nearly all aviation programs that feature business and management. Its student-friendly structure and style make it highly suitable for modular courses and distance-learning programs, or for self-directed study and continuing personal professional development.
