

A380 800

Guy Norris, Mark Wagner

The Airbus A380 Graham M. Simons, 2014-08-13 Every 7 minutes, an A380 takes off or lands somewhere in the world...The Airbus was initially designed and developed in order to provide a contender to the Boeing's growing monopoly of the skies in the biggest large-aircraft market in the world. Ambitious in design, the undertaking seemed mammoth. Yet scores of aviation engineers and pilots worked to get the design off the ground and the Airbus in our skies. This double-decker, wide-body, 4 engine jet airliner promised to redefine expectations when it came to commercial flight. Five years on from its launch, Graham Simons provides us with this, an impressively illustrated narrative history of the craft, its achievements, and the legacy it looks set to provide to a new generation of aviation engineers, enthusiasts and passengers. Operated by airlines such as Emirates, Singapore Airlines, Quantas and Lufthansa, the story of the A380 could be said to represent the story of modern-day travel itself, characterised by major technological advances across the world that constantly push the boundaries of expectation. Sure to appeal broadly across the market, this is very much a commemorative volume, preserving the history of this iconic craft in words and images.

The book combines both concepts and results from recent academic research with applications and case studies from major industry players. Airbus A380 Guy Norris, Mark Wagner, 2005 A revealing, behind-the-scenes look at the development of the biggest commercial aircraft ever built. With 200 colour photos, this book takes readers through the drama of the A380 project, introducing all the key players and unravelling the controversies surrounding its development.

The A380neo Business Case Dr Addison M Schonland, Mr Ernest S Arvai, 2015-01-15 There is significant market pressure coming from Emirates for Airbus to offer an A380neo. Airbus cannot ignore this pressure, because the A380 program is in need of more sales, and currently Emirates represents the shortest path to such orders. An A380neo should be attractive to other A380 operators as well as other airlines considering VLAs. The VLA segment as a niche but is also valid market. This view puts the focus on order volume, rather than order revenues. VLA s have a historical average (1975-2014) order market share of 4%. Based on both the Airbus and Boeing forecast fleet size for 2033 we estimate the VLA segment to be ~1,000 aircraft.

Airline Microeconomics Tony Webber, 2022-07-25 This book presents readers with a technical tool-kit to understand the economics of airlines. It starts by covering the key language and glossary of the air travel business, which is necessary for graduates or first-time employees in aviation to understand the content of conversations, meetings, presentations and internal aviation communications. It then breaks down the complexity of the demand side of the air travel business. The book then analyses revenue over two distinct time horizons, specifically the short and medium runs, recognising the fact that airlines operate to a fixed number of seats over a short horizon because of the way that they schedule services in advance of departure. By combining revenue and costs, the book then analyses airline profit, with a focus on the short run and medium run decision variables that maximise airline profit. The remainder of the book analyses various important topics in air transport economics, including competition in airline markets, key rules, regulations and taxes that affect the return on capital in aviation, the way that airlines form relationships, and the economics of the market for oil and jet fuel, among others.

Building Sustainable Competitive Advantage Dhirendra Kumar, 2016-03-03 In Building Sustainable Competitive Advantage Dhirendra Kumar shows how the Enterprise Excellence (EE) philosophy is a holistic approach for leading an enterprise to total excellence. It does this by focussing on achieving sustainable significant growth in revenue and profitability, reducing the business cycle time, strategically managing the enterprise risk and focusing on the needs of the customer. There may be various organizations within an enterprise but they must all focus on meeting or exceeding customer needs. Therefore, EE is an integrated approach affecting every employee, every functional area and strategy within the organization. Enterprise risk must be identified, assessed and prioritized; developing a growth strategy proposal which leadership has to execute in order to achieve goals. As business leaders spearhead the efforts, they must minimize, monitor and control the probability and/or impact of unfortunate events and maximize the realization of opportunities. The achievements in Enterprise Excellence can range from greater cost efficiencies, improved market perceptions, fundamental changes to markets, to new product and service offerings. There may also be significant upgrades in skills, technology, and business strategies. The scope of Enterprise Excellence can also range from operations activities, to business functions, to overall organization and to the enterprise as a whole. Building Sustainable Competitive Advantage is a comprehensive reference book for practising professionals, teaching faculty, and students alike.

Central Two Zero Seven Nine Out Paul Canning,2021-07-22 What sort of a life do you make for yourself when there is no focus? How does your life pan out as you ride the vicissitudes of a dog eat dog, cut throat employment market? How do you chase your dreams into adulthood to find love, happiness and success, when you carry inside yourself a childhood, dejected, insecure, unstable and with what tiny morsel of confidence you possess – in tatters, because you've been at the mercy of a bullying control freak – your own father? I have survived so much mental anguish with confidence renewed following a difficult and painful education in Blackpool. After handwriting 100 letters, I landed my first job - cutting my teeth as a London-based portrait and wedding photographer in early summer 1986. A life on the ocean wave then beckoned, which turned me from nervous novice ship's photographer to expert smudger working aboard cruise liners worldwide. In 1990 I settled down, met the girl of my dreams and landed a fabulous job – Metropolitan Police Service forensic photographer. In the late 1990s I qualified as a Hendon-based instructor, leaving the police in 2004 to set up a business. If that wasn't enough, I then retrained as a medical photographer in 2008 and I'm now a medical photography manager working for Blackpool Teaching Hospitals NHS Foundation Trust. Both journey and path to success have been a miracle in the making.
