P-39/P-400 Airacobra vs A6M2/3 Zero-sen Michael John Claringbould, 2018-07-26 After the huge advances made in the early months of the Pacific war, it was in remote New Guinea where the advance of Imperial Japanese Naval Air Force (IJNAF) A6M Zero-sen fighters was first halted due to a series of offensive and defensive aerial battles ranging from treetop height up to 30,000 ft. Initially, the IJNAF fought Australian Kittyhawks, but by May 1942 they had fought themselves into oblivion, and were relieved by USAAF P-39 and P-400 Airacobras. The battles unfolded over mountainous terrain with treacherous tropical weather. Neither IJNAF or USAAF pilots had been trained for such extreme conditions, incurring many additional losses aside from those that fell in combat. Using specially commissioned artwork and contemporary photographs and testimony, this fascinating study explains how, despite their initial deficit in experience and equipment, the Airacobras managed to square the ledger and defend New Guinea.

A6M2/3 Zero-sen Michael John Claringbould, 2023-11-23 This book details the exploits of the highly skilled Naval Aviators charged with achieving air supremacy over New Guinea in their A6M2/3 Zero-sens. The combat record of the Zero-sen in New Guinea has mostly been overstated, with little due being given to the constraining conditions under which the fighter operated. The air combats fought over New Guinea in 1942 between Imperial Japanese Naval Air Force (IJNAF) pilots and their Allied counterparts in P-39 Airacobras and P-40 Warhawks were often

'trial and error' affairs, with both belligerents being caught out by weather. This study covers the key role played by governing factors including geography and climatic conditions, and examines the modified tactics employed by IJNAF Zero-sen pilots to help them cope in-theatre through the comprehensive analysis of RAAF, USAAF and Japanese operational after action reports. Using first-hand accounts from both famous aviators and previously unknown RAAF and Japanese pilots, and specially commissioned artwork, leading South Pacific historian and author Michael John Claringbould sheds new light on the air war fought over the wilds of New Guinea during the course of 1942.

P-40E Warhawk vs A6M2 Zero-sen Peter

Ingman, 2020-06-25 The P-40E Warhawk is often viewed as one of the less successful American fighter designs of World War II, but in 1942 the aircraft was all that was available to the USAAC in-theatre. Units equipped with the aircraft were duly forced into combat against the deadly A6M2 Zero-sen, which had already earned itself a near-mythical reputation following its exploits over China and Pearl Harbor. During an eight-month period in 1942, an extended air campaign was fought out between the two fighters for air superiority over the Javanese and then northern Australian skies. During this time, the P-40Es and the Zero-sens regularly clashed without interference from other fighter types. In respect to losses, the Japanese 'won' these engagements, for many more P-40Es were shot down than Zero-sens. However, the American Warhawks provided a potent deterrent that forced the IJNAF to attack

from high altitudes, where crews' bombing efficiency was much poorer. Fully illustrated throughout, and supported by rare and previously unpublished photographs, this book draws on both American and Japanese sources to tell the full story of the clashes between these iconic two fighters in Darwin and the East Indies.

Spitfire VC vs A6M2/3 Zero-sen Peter

Ingman, 2019-05-30 Just weeks after Pearl Harbor, Darwin was mauled by a massive Japanese attack. Without a single fighter to defend Australian soil, the Australian government made a special appeal to Britain for Spitfires. A year later the Spitfire VC-equipped No 1 Fighter Wing, RAAF, faced the battle-hardened 202nd Kokutai of the IJNAF, equipped with A6M2 Zero-sens, over Darwin. This was a gruelling campaign between evenly matched foes, fought in isolation from the main South Pacific battlegrounds. Pilots on either side had significant combat experience, including a number of Battle of Britain veterans. The Spitfire had superior flight characteristics but was hampered by short range and material defects in the tropical conditions, while the Japanese employed better tactics and combat doctrine inflicting serious losses on the over-confident Commonwealth forces. Fully illustrated with detailed full-colour artwork, this is the gripping story of two iconic aircraft facing off against each other above Australia.

Modelling the Mitsubishi A6M Zero Brian Criner, 2012-08-20 The A6M Rei Shiki Sento Ki (meaning Type Zero fighter) was the result of an order by the Imperial Japanese Navy for a low-wing monoplane with superior speed, range, climbing powers, and manoeuvrability. It famously served as a fighter escort during the attack on Pearl Harbor in December 1941, and ended the war as the kamikaze plane of choice. This book provides a detailed guide to modelling this popular aircraft across a variety of scales, and features an A6M2-N

Rufe, a kamikaze A6M5c, an A6M2 model 21, and a captured A6M5b of TAIC #7, as well as a gallery and walkaround section.

Mitsubishi A6M Zero James D'Angina, 2016-10-20
Unquestionably the most iconic Japanese fighter of World War II, the Mitsubishi A6M Rei-Sen, Type Zero fighter was used from the initial raid on Pearl Harbor up to the Kamikaze attacks at the end of the war. Facing off against the likes of the Wildcat, Corsair and even the Spitfire, the Zero gained a legendary reputation amongst Allied pilots due to its incredible manoeuvrability. Detailed analysis of its technical qualities show why the Zero was so feared, but also pinpoints the weaknesses that would eventually be its downfall as Allied pilots learned how to combat it. A selection of historical photographs and unique artwork accompany the analysis as James D'Angina delves into the history of the premier Axis fighter of the Pacific Theatre, exploring the design and combat effectiveness of the Zero as well as the tactics developed by Allied pilots to counter it.

A6M Zero-sen Aces 1940-42 Nicholas

Millman,2019-04-18 The Mitsubishi A6M Zero-sen was Japan's Spitfire. In continuous development and operational service from the time of the Sino-Japanese war in 1940 to the end of the Pacific War in 1945, it is held in almost mythical awe, similar to Britain's legendary fighter aircraft. At the time of its operational debut the fighter's design features offered the revolutionary combination of an all-round vision canopy, cannon armament and a jettisonable drop tank giving it phenomenal range. Together with the flying and tactical proficiency of superbly trained pilots, this made the Zero-sen a true strategic fighter,

spearheading Japan's offensive in the Pacific. It was also the mount of a plethora of successful and flamboyant naval aces engaged in both sea and land campaigns. This volume covers the use of the A6M2 variant from its debut in China to the Solomons Campaign, and also tells the story of the A6M2 fighter aces of the 4th and Tainan Kokutai.

F4F Wildcat vs A6M Zero-sen Edward M.

Young, 2013-08-20 The Grumman F4F Wildcat and the Mitsubishi A6M Zero-sen were contemporaries, although designed to very different requirements. The Wildcat, ruggedly built to survive the rigors of carrier operations, was the best carrier fighter the US Navy had available when the USA entered World War II, and it remained the principal fighter for the US Navy and the US Marine Corps until 1942–43. With a speed greater than 300mph, exceptional manoeuvrability, long range, and an impressive armament the slick Zero-sen could out-perform any Allied fighter in 1941–42. The battles between the Wildcat and the Zero-sen during 1942 represent a classic duel in which pilots flying a nominally inferior fighter successfully developed air-combat tactics that negated the strengths of their opponent.

Mitsubishi A6M Zero Artur Juszczak, 2015 The illustrated technical history of the most famous

Japanese warplane of World War Two. The different versions of the plane, from the 1940 prototypes to the final aircraft of 1945 are described and illustrated; all the changes in specification, equipment and performance are recorded. Drawings and data from the original technical manuals, full dimensional details and photographs of surviving examples preserved in aviation museums illustrate all aspects of the airframe, inside and out. Wartime photographs and many pages of color illustrations complete the book's comprehensive coverage. More than 30 color profiles. Profusely illustrated with photos, including a comprehensive walk-around section showing all aspects of the airframe, and diagrams from official manuals. Includes 1/72nd and 1/48th scale plans, and color profiles showing many of the colorful schemes applied to the ZERO by its users.
