**Air Combat** Dmitriy Khazanov,Aleksander Medved,Edward M. Young,Tony Holmes,2019-01-24 The battle for the skies in World War II fuelled a race between rival air forces to develop ever faster and more capable fighter aircraft – and the struggle for air superiority was never over until the war itself ended. This volume explores four clashes of some of the finest planes and pilots, in key theatres of the war: Spitfires duelling the formidable Bf 109 over the Channel, the Fw 190 battling the Soviet La 5 and 7 on the Eastern Front, the F4F Wildcat in a desperate clash with the legendary A6M Zero-sen, and the F4U Corsair in combat with the second-generation Japanese Ki-84 in the closing days of the war. Fully illustrated with contemporary photographs, maps and colour artwork, Air Combat conveys the full story behind these dramatic aviation duels.

*The First Team and the Guadalcanal Campaign* John B Lundstrom,2005-07-01 From huddled command conferences to cramped cockpits, John Lundstrom guides readers through the maelstrom of air combat at Guadalcanal in this impressively researched sequel to his earlier study. Picking up the story after Midway, the author presents a scrupulously accurate account of what happened, describing in rich detail the actual planes and pilots pitted in the ferocious battles that helped turn the tide of war. Based on correspondence with 150 American and Japanese veterans, or their families, he reveals the thoughts, pressures, and fears of the airmen and their crews as he reconstructs the battles. These are the story of the Wildcat and Zero fighters, and the Dauntless, Avenger, Betty, Kate, and Val bombers. Lavishly illustrated with drawings, maps, and photographs, this fresh look at the campaign set a standard for aviation histories when first

published in 1994.

**Fighter Zero - Mitsubishi A6M** Mantelli - Brown - Kittel - Graf, 2015-05-02 The Mitsubishi A6M Zero was a lightweight fighter that comes with the Dai-Nippon Teikoku Kaigun Koku Hombu, service aircraft of the Imperial Japanese Navy, 1940-1945. The official designation was obtained by dialing the A for aircraft embarked, 6 because it was the sixth model built for the Japanese Navy and the M initial manufacturer: Mitsubishi. The A6M was usually called by the Allies as the Zero, a name sometimes associated by mistake to other fighters such as the Nakajima Ki-43. In addition to zero, the model was called by the Americans with other nicknames, such as Zeke, Hamp and Hap. The Japanese called it Reisen (Zero Fighter), Americans Zeke (diminutive of Zechariah), but it was the same airplane, the small, acrobatic and elusive of the Mitsubishi A6M. Why Zero, and why Zechariah? Zero because it entered service for the Navy Imperiale in the year of Christ 1940, corresponding to the year 2600 the mythological calendar of the Rising Sun; if it entered service in 1936 (2596) it would be called Type 96, if in 1939 (2599) Type 99. As for Zechariah, is explained by the fact that the code allied planes taking Japanese male names if they were fighter - Tony, Oscar, George, Frank - if female bombers - Sally, Betty, Nell, Peggy. For Japan the Zero was, in fact, much more than an airplane, but the symbol of the air power of the Empire. For the Allies it was much more of a relentless opponent, but a nightmare and at the same time a myth.

**P-39/P-400 Airacobra vs A6M2/3 Zero-sen** Michael John Claringbould, 2018-07-26 After the huge advances made in the early months of the Pacific war, it was in remote New Guinea where the advance of Imperial Japanese Naval Air Force (IJNAF) A6M Zero-sen fighters was first halted due to a series of

offensive and defensive aerial battles ranging from treetop height up to 30,000 ft. Initially, the IJNAF fought Australian Kittyhawks, but by May 1942 they had fought themselves into oblivion, and were relieved by USAAF P-39 and P-400 Airacobras. The battles unfolded over mountainous terrain with treacherous tropical weather. Neither IJNAF or USAAF pilots had been trained for such extreme conditions, incurring many additional losses aside from those that fell in combat. Using specially commissioned artwork and contemporary photographs and testimony, this fascinating study explains how, despite their initial deficit in experience and equipment, the Airacobras managed to square the ledger and defend New Guinea.

**Kamikazes, Corsairs, and Picket Ships** Robin L. Rielly, 2008-09-05 The untold story of ferocious air and naval combat during the WWII Battle of Okinawa—drawn from primary sources and survivor interviews. This is the story of an overlooked yet significant aerial and naval battle during the American assault on Okinawa in the spring of 1945. While losses to America's main fleet are well recorded, less well known is the terrific battle waged on the radar picket line, the fleet's outer defense against Japanese marauders. Weaving together the experiences of the ships and their crews—drawn from ship and aircraft action reports, ship logs, and personal interviews—historian Robin L. Rielly recounts one of the most ferocious air and naval battles in history. The US fleet—and its accompanying airpower—was so massive that the Japanese could only rely on suicide attacks to inflict critical damage. Of the 206 ships that served on radar picket duty, twenty-nine percent were sunk or damaged by Japanese air attacks, making theirs the most hazardous naval surface duty in World War II. The great losses were largely due to relentless kamikaze

attacks, but also resulted from the improper use of support gunboats, failure to establish land-based radar at the earliest possible time, the assignment of ships ill-equipped for picket duty, and, as time went on, crew fatigue. US air cover during the battle is also described in full, as squadrons dashed from their carriers and land bases to intercept the Japanese swarms, resulting in constant melees over the fleet.

*Guadalcanal 1942–43* Mark Stille, 2019-11-28 The campaign for Guadalcanal, which stretched from August 1942 until February 1943, centered on Henderson Field. The airfield was captured by the US on 8 August and placed into operation by 20 August. As long as the airfield was kept operational and stocked with sufficient striking power, the Japanese could not run convoys with heavy equipment and large amounts of supplies to the island. Instead, they were forced to rely on night runs by destroyers which could not carry enough men or supplies to shift the balance decisively against the American garrison on the island. The American air contingent on the island, named the 'Cactus Air Force', comprised Marine, Navy and Army Air Force units. It had the challenging mission of defending the airfield against constant Japanese attacks, and more importantly, of striking major Japanese attempts to reinforce the island. The mission of neutralizing Henderson Field fell primarily to the Imperial Navy's Air Force flying out of airfields in the Rabaul area. The units charged with this mission were among the most accomplished in the entire Imperial Navy with a high proportion of very experienced pilots and a superb air superiority fighter (the famous 'Zero'). However, the distance from Rabaul to Guadalcanal handicapped Japanese operations and their primary bomber was terribly vulnerable to interception. This book traces the air campaign from both sides and explores the factors behind the American victory and the Japanese defeat.

The text is supported by full-colour illustrations and contemporary photography.

**A6M2/3 Zero-sen** Michael John Claringbould, 2023-11-23 This book details the exploits of the highly skilled Naval Aviators charged with achieving air supremacy over New Guinea in their A6M2/3 Zero-sens. The combat record of the Zero-sen in New Guinea has mostly been overstated, with little due being given to the constraining conditions under which the fighter operated. The air combats fought over New Guinea in 1942 between Imperial Japanese Naval Air Force (IJNAF) pilots and their Allied counterparts in P-39 Airacobras and P-40 Warhawks were often 'trial and error' affairs, with both belligerents being caught out by weather. This study covers the key role played by governing factors including geography and climatic conditions, and examines the modified tactics employed by IJNAF Zero-sen pilots to help them cope in-theatre through the comprehensive analysis of RAAF, USAAF and Japanese operational after action reports. Using first-hand accounts from both famous aviators and previously unknown RAAF and Japanese pilots, and specially commissioned artwork, leading South Pacific historian and author Michael John Claringbould sheds new light on the air war fought over the wilds of New Guinea during the course of 1942.

**F4F Wildcat vs A6M Zero-sen** Edward M. Young, 2013-08-20 The Grumman F4F Wildcat and the Mitsubishi A6M Zero-sen were contemporaries, although designed to very different requirements. The Wildcat, ruggedly built to survive the rigors of carrier operations, was the best carrier fighter the US Navy had available when the USA entered World War II, and it remained the principal fighter for the US Navy and the US Marine Corps until 1942–43. With a speed greater than 300mph, exceptional manoeuvrability,

long range, and an impressive armament the slick Zero-sen could out-perform any Allied fighter in 1941–42. The battles between the Wildcat and the Zero-sen during 1942 represent a classic duel in which pilots flying a nominally inferior fighter successfully developed air-combat tactics that negated the strengths of their opponent.

**Fighter Zero** Mantelli - Brown - Kittel - Graf, 2017-03-05 From the attack on Pearl Harbor to the last desperate defense in the face of massive Allied bombings and suicide attacks against the enemy squadrons, the Mitsubishi A6M Reisen (baptized Rei-sen, ie hunting zero with reference to the year 2600 calendar Japanese, 1940 AD) took part in almost all major actions of naval Japanese. Its fabulous maneuverability and its exceptional autonomy were legendary, and made the Zero symbol of air power of the Rising Sun, as to make it as famous as the Spitfire or Bf. 109. Zero earned fame with a series of brilliant victories against all allied aircraft in the first months of the war in the Pacific, and since he found difficulty Japanese Navy to commission another modern fighter capable of competing with the new Allied aircraft that appeared in the Pacific towards the end of 1942, the Mitsubishi A6M had to endure in large part the weight of the operations until the end of the conflict. For Japan, the Zero was, in fact, much more than an airplane, but the symbol of the Empire air power; for the Allies was much more of a relentless opponent but a nightmare, and at the same time a myth. For a long time were the virtues attributed largely imaginary, since its unique and indisputable qualities were exceptional maneuverability and an equally exceptional autonomy. The Mitsubishi A6M Zero was one of those planes that could not raise more mixed reviews, now ignored, feared now, finally, ridiculed, and then again taken into consideration, mythologized,

analyzed critically, overrated, underrated, and so on seamless. When hostilities began with the outbreak of World War II, the Zero was considered the best fighter in the world based on aircraft carriers, because they associated an excellent maneuverability granted very extensive. In the first air combat, the Zero gained a legendary reputation, but in 1942 the new combat tactics enabled the Allied pilots to engage in duels more balanced terms.

Hirohito's War Francis Pike, 2016-09-08 Named one of Foreign Affairs' Best Books of 2016 In his magisterial 1,208 page narrative of the Pacific War, Francis Pike's *Hirohito's War* offers an original interpretation, balancing the existing Western-centric view with attention to the Japanese perspective on the conflict. As well as giving a 'blow-by-blow' account of campaigns and battles, Francis Pike offers many challenges to the standard interpretations with regards to the causes of the war; Emperor Hirohito's war guilt; the inevitability of US Victory; the abilities of General MacArthur and Admiral Yamamoto; the role of China, Great Britain and Australia; military and naval technology; and the need for the fire-bombing of Japan and the eventual use of the atom bomb on Hiroshima and Nagasaki. *Hirohito's War* is accompanied by additional online resources, including more details on logistics, economics, POWs, submarines and kamikaze, as well as a 1930-1945 timeline and over 200 maps.

*Mitsubishi A6M Zero* James D'Angina, 2016-10-20 Unquestionably the most iconic Japanese fighter of World War II, the Mitsubishi A6M Rei-Sen, Type Zero fighter was used from the initial raid on Pearl Harbor up to the Kamikaze attacks at the end of the war. Facing off against the likes of the Wildcat, Corsair and even the Spitfire, the Zero gained a legendary reputation amongst Allied pilots due to its incredible

manoeuvrability. Detailed analysis of its technical qualities show why the Zero was so feared, but also pinpoints the weaknesses that would eventually be its downfall as Allied pilots learned how to combat it. A selection of historical photographs and unique artwork accompany the analysis as James D'Angina delves into the history of the premier Axis fighter of the Pacific Theatre, exploring the design and combat effectiveness of the Zero as well as the tactics developed by Allied pilots to counter it.

**Blazing Star, Setting Sun** Jeffrey Cox, 2020-06-25 From popular Pacific Theatre expert Jeffrey R. Cox

comes this insightful new history of the critical Guadalcanal and Solomons campaign at the height of World War II. Cox's previous book, *Morning Star, Rising Sun*, had found the US Navy at its absolute nadir and the fate of the *Enterprise*, the last operational US aircraft carrier at this point in the war, unknown. This second volume completes the history of this crucial campaign, combining detailed research with a novelist's flair for the dramatic to reveal exactly how, despite missteps and misfortunes, the tide of war finally turned. By the end of February 1944, thanks to hard-fought and costly American victories in the first and second naval battles of Guadalcanal, the battle of Empress Augusta Bay, and the battle of Cape St George, the Japanese would no longer hold the materiel or skilled manpower advantage. From this point on, although the war was still a long way from being won, the American star was unquestionably on the ascendant, slowly, but surely, edging Japanese imperialism towards its sunset. Jeffrey Cox's analysis and attention to detail of even the smallest events are second to none. But what truly sets this book apart is how he combines this microscopic attention to detail, often unearthing new facts along the way, with an engaging style that transports the reader to the heart of the story, bringing the events on the deep blue of the Pacific vividly to life.

**World War II Fighter Planes Spotter's Guide** Tony Holmes, 2021-02-04 World War II saw pilots from around the world battling in the skies over Europe, Asia and Africa, with victory resting upon their nerve, skill and the capabilities of some of history's most iconic aircraft. In the chaos of battle, it was vital that they could quickly identify friend from foe. But do you know your Hurricane from your Bf 109, or what the legendary P-51 Mustang looks like? Do you know the wingspan of the A6M Zero-sen, or how fast it could

fly? **THE WORLD WAR II FIGHTER PLANES SPOTTER'S GUIDE** answers all of these questions and more, providing essential information on over 90 legendary aircraft, from the celebrated Spitfire to the jet-powered Me 262. Featuring full-colour artwork to aid recognition, as well as all the details you need to assess their performance, this is the perfect pocket guide to the Allied and Axis fighters of World War II.

**Zero** Robert C. Mikesh, 1994 The most in-depth combat and development history of the Japanese Zero ever assembled! This superb history is told through first-person interviews with Zero pilots and the U.S. airmen who fought against them. Includes cutaway drawings, serial number lists, detailed appendices, and a registry of surviving planes. Contains exquisite cutaway drawings by Rukyu Watanabe. Foreword by Saburo Sakai.

American Amphibious Gunboats in World War II Robin L. Rielly, 2013-05-17 As the United States began its campaign against numerous Japanese-held islands in the Pacific, Japanese tactics required them to develop new weapons and strategies. One of the most crucial to the island assaults was a new group of amphibious gunboats that could deliver heavy fire close in to shore as American forces landed. These gunboats were also to prove important in the interdiction of inter-island barge traffic and, late in the war, the kamikaze threat. Several variations of these gunboats were developed, based on the troop carrying LCI(L). They included three conversions of the LCI(L), with various combinations of guns, rockets and mortars, and a fourth gunboat, the LCS(L), based on the same hull but designed as a weapons platform from the beginning. By the end of the war the amphibious gunboats had proven their worth.

Modelling the Mitsubishi A6M Zero Brian Criner, 2012-08-20 The A6M Rei Shiki Sento Ki (meaning

Type Zero fighter) was the result of an order by the Imperial Japanese Navy for a low-wing monoplane with superior speed, range, climbing powers, and manoeuvrability. It famously served as a fighter escort during the attack on Pearl Harbor in December 1941, and ended the war as the kamikaze plane of choice. This book provides a detailed guide to modelling this popular aircraft across a variety of scales, and features an A6M2-N Rufe, a kamikaze A6M5c, an A6M2 model 21, and a captured A6M5b of TAIC #7, as well as a gallery and walkaround section.

The Black Sheep Bruce Gamble, 2007-12-18 With their renowned squadron leader Greg “Pappy” Boyington, Marine Fighting Squadron (VMF) 214 was one of the best-known and most colorful combat units of World War II. The popular television series *Baa Baa Black Sheep* added to their legend—while obscuring the truly remarkable combat record of the Black Sheep and Boyington. A retired naval flight officer and former historian for the Naval Aviation Museum Foundation, Bruce Gamble provides a highly readable account that serves to both correct and extend the record of this premier fighting force.
