M113 APC 1960-75 Jamie Prenatt,2017-11-30 The M113 is the most widely used and versatile armoured vehicle in the world. Fielded in 1960 as a simple 'battlefield taxi', over 80,000 M113s would see service with 50 nations around the world and 55 years later, many thousands are still in use. In addition to its original role of transporting troops across the battlefield, specialized versions perform a multitude of other functions including command and control, fire support, anti-tank and anti-aircraft defence, and casualty evacuation. This new fully illustrated study examines the service record of the M113 from its initial fielding through to the end of the Vietnam War. It will also describe the many US, South Vietnamese, and Australian variants of the M113 used in the Vietnam War as well as information on tactics, unit tables of organization and equipment, and a selection of engagements in which the M113 played a decisive role.

M113: American Armoured Personnel Carrier Ben Skipper,2021-03-23 The M113 has become as much a recognizable part of the US military machine at war as the Bell UH-1 Iroquois and M16 assault rifle. Earning its stripes in the jungles and highlands of Vietnam, it became the most widely armored vehicle of the campaign. Such was its prowess that the Viet Cong gave it the nickname Green Dragon on account of its ability to go virtually anywhere. Its groundbreaking aluminum hull gives the M113 a relatively low weight of 12ts, this allows it to be easily transported by air and gives it an amphibious ability. The design was also easy to modify and can carry a range of support and indirect fire weapons. From mortars to ballistic missiles, the M113 spawned a progeny of useful and innovative vehicles. The base M113 is lightly armored and safe against only the lightest of small arms fire and shell splinter. As a result a range of up-armor packages have been used in the past, from sandbags to complex appliqué armor. 80,000 M113s of all types have been produced and are in use with over 50 countries, making it one of the most widely used armored fighting vehicles to be produced. Indeed such was its popularity that the US bought their final M113s in as late as 2007. The M113 was designed and developed by the Food Machinery Corporation (FMC) to replace the heavier and less reliable steel-bodied M59 and M75 armored personnel carriers. It was specifically designed to be lighter, air-portable and have amphibious capability. Carrying a crew of two, driver and commander, who manned the M113's only weapon, a .50cal machine gun, the M113 would transport 11 soldiers into combat before withdrawing to the rear. Powered initially by a V8 petrol engine the M113 would be continuously up-engined throughout its frontline and subsequent rear support lifespan. Changes included improved suspension, smoke dischargers and externally fitted fuel tanks. Other changes have included armored commander's turrets and slat armor. This LandCraft title looks at the M113s development where the FMC sought to utilize its chassis into as many roles as possible, from smoke generators to flamethrowers. The book also looks at how the M113 was adapted for use by numerous overseas customers and how these are upgraded to suit local conditions. Finally the title looks at the M113's changing roles in the more sophisticated contemporary battlescape and how it's still providing service in theatres across the world in a variety of roles, both combat and support. For the modeler there is nothing more important than the little things and this image-rich section of Land Crafts M113 title delivers the goods. Filled with crisp photos that show the M113's many details, combined with helpful accompanying text, forms an enviable visual guide for the enthusiast and modeler alike.

Modelling the M113 Series Graeme Davidson,2012-02-20 The M113 family of vehicles has proved to be one of the most popular military designs of the last 40 years. Introduced in the early 1960s, the series has encompassed numerous variants, served in over 50 countries and in several conflicts. This book is designed to appeal to modellers of intermediate skill and features five progressively challenging projects covering a range of different versions of the M113, including reconnaissance, fire support, APC and air defence variants. Step-by-step photos illustrate scratchbuilding, painting and weathering techniques. It also contains detailed listings of all the kits and aftermarket products available for this heavily modelled subject.

Blackhorse Riders Philip Keith,2012-02-14 Winner of the 2013 Silver Medal in History from the Military Writer's Society of America Finalist, 2013 Colby Award Winner of the 2012 USA Best Book Award for Military History Philip Keith's Blackhorse Riders is the incredible true story of a brave military unit in Vietnam that risked everything to rescue an outnumbered troop under heavy fire—and the thirty-nine-year odyssey to recognize their bravery. Deep in the jungles of Vietnam, Alpha Troop, 1st Squadron, 11th Armored Cavalry, the famed Blackhorse Regiment, was a specialized cavalry outfit equipped with tanks and armored assault vehicles. On the morning of March 26, 1970, they began hearing radio calls from an infantry unit four kilometers away that had stumbled into a hidden North Vietnamese Army stronghold. Outnumbered at least six to one, the ninety-man American company was quickly surrounded, pinned down, and fighting for its existence. Helicopters could not penetrate the dense jungle, and artillery and air support could not be targeted effectively. The company was fated to be worn down and eventually all killed or captured. Overhearing the calls for help on his radio, Captain John Poindexter, Alpha Troop's twenty-five-year-old commander, realized that his outfit was the only hope for the trapped company. It just might be possible that they could bust enough jungle by nightfall to reach them. Not making the attempt was deemed unacceptable, so he ordered his men to saddle up. With the courage and determination that makes legends out of ordinary men, they effected a daring rescue and fought a pitched battle—at considerable cost. Many brave deeds were done that day and Captain Poindexter tried to make sure his men were recognized for their actions. Thirty years later Poindexter was made aware that his award recommendations and even the records of the battle had somehow gone missing. Thus began the second phase of this remarkable story: a battle to ensure that his brave men's accomplishments would never be forgotten again. The full circle was completed when President Obama stepped to the podium on October 20, 2009, to award the Alpha Troop with the Presidential Unit Citation: the highest combat award that can be given to a military unit.

Courage in Combat Richard J. Rinaldo,2017-02-15 These stories of military heroism, focusing on members of the Legion of Valor, offer a sweeping study of courage in service to America. Published in conjunction with the Legion of Valor of the United States of America, Courage in Combat shares the stories of military heroes from the Civil War onward. They are recipients of the Medal of Honor, the Distinguished Service Cross, the Navy Cross, and the

Air Force Cross. Their awards are our nation's highest military decorations, given only to one in twenty thousand combatants. Among them are sergeants and generals, as well as corpsmen, civilians, engineers, "grunts," and paratroopers. There are men and women, a mess attendant, aviators, spies and POWs, a cavalry scout, candidates for sainthood, and a president of the United States. The stories of these brave individuals relate personal accounts of heroism, as well as reflections on combat and war. This book also includes a short history of the Legion of Valor, America's oldest military service organization, and an extensive list of its members, past and present. *Courage in Combat* explores the concept of courage through the lives, thoughts, and actions of this elite group—most of whom would say, "I was just doing my job."

Ideology and Criminal Law Stephen Skinner, 2019-09-05 With populist, nationalist and repressive governments on the rise around the world, questioning the impact of politics on the nature and role of law and the state is a pressing concern. If we are to understand the effects of extreme ideologies on the state's legal dimensions and powers – especially the power to punish and to determine the boundaries of permissible conduct through criminal law – it is essential to consider the lessons of history. This timely collection explores how political ideas and beliefs influenced the nature, content and application of criminal law and justice under Fascism, National Socialism, and other authoritarian regimes in the twentieth century. Bringing together expert legal historians from four continents, the collection's 16 chapters examine aspects of criminal law and related jurisprudential and criminological questions in the context of Fascist Italy, Nazi Germany, Nazi-occupied Norway, apartheid South Africa, Francoist Spain, and the authoritarian regimes of Brazil, Romania and Japan. Based on original archival, doctrinal and theoretical research, the collection offers new critical perspectives on issues of systemic identity, self-perception and the foundational role of criminal law; processes of state repression and the activities of criminal courts and lawyers; and ideological aspects of, and tensions in, substantive criminal law.

Texas Aggies in Vietnam Michael Lee Lanning, 2016-10-25 From its inception, graduates of the Agricultural and Mechanical College of Texas, now Texas A&M University, have marched off to fight in every conflict in which the United States has been involved. The Vietnam War was no different. The Corps of Cadets produced more officers for the conflict in Southeast Asia than any institution other than the US service academies. Michael Lee Lanning, Texas A&M University class of 1968, has now gathered over three dozen recollections from those who served. As Lanning points out, "anytime Aggie Vietnam veterans get together—whether it is two or two hundred of them—war stories begin." The tales they relate about the paddies, the jungles, the highlands, the waterways, and the airways provide these veterans with an even greater understanding of the war they survived. They also allow glimpses into the frequent dangers of firefights, the camaraderie of patrol, and often humorous responses to inexplicable situations. These revelations provide insight not only into the realities of war but also speak to the character of the graduates of Texas A&M University. As Lanning concludes, "these war stories are as much a part of service as is that old green duffle bag, a few rows of colorful ribbons, and a pride that does not diminish. In reality, there is only one story about the Vietnam War. We all just tell it differently."

History of Arbovirology: Memories from the Field Nikos Vasilakis, Laura D. Kramer, 2023-05-08 These books bring together a panel of expert arbovirologists who recall the history of arbovirology from very personal perspectives. In these timely volumes, the authors describe seminal moments in their experiences in the field and how they integrated these findings with lab studies to further clarify the ecology and epidemiology of diverse arboviruses. Authors identify the most pressing questions that remain to be answered, providing a basis for current research and a stimulus to engage those entering the field. Over the last 20 years a generational gap has developed between the giants of arbovirus research and discovery and the new generation. This gap developed due to an ebbing of training and investment in passing the scepter to the next generation, leading to a lack of continuity among the generations that threatens to derail the rich history of virus discovery, field epidemiology and understanding of the richness of diversity that surrounds us. This lack of continuity may have immediate and disastrous consequences for public health when yet to be discovered arboviruses emerge. The purpose of these books is to bridge this gap by providing a historical context for the work being done today and provide continuity between the generations. To this end, the books provide a narrative of the thrill of scientific discovery and excitement of field adventures and lab studies of that generation -- essential reading for every arbovirologist, and highly recommended for all virologists and public health officials, as well as those students considering future research options. Volume I consists of the personal reflections of arbovirologists who played a significant role in the advancement of arbovirology across the globe. Volume II transitions to descriptions of region-specific and virus family-specific perspectives of arbovirology, as well as recollections of the early events of molecular advances and pathogenesis studies. Volume I presents personal reflections from arbovirologists key to the understanding and advancement of this field. Offers a comprehensive historical analysis of arbovirology by crucial contributors to this field. First-hand narratives of seminal studies and experiments, illuminating how these have contributed to current knowledge

Days of Valor Robert L. Tonsetic, 2007-01-31 A Vietnam War battalion commander with the 199th LIB recounts the intense combat he saw during the Tet Offensive and NVA attacks in this candid memoir. This visceral combat memoir chronicles the height of the Vietnam War from the nervous period just before the Tet Offensive through the defeat of that campaign and into the lesser-known yet equally bloody NVA offensive of May 1968. On January 30, 1968, Saigon and nearly every provincial capital in South Vietnam came under assault by the Viet Cong. Author Robert L. Tonsetic writes not only from his personal experience as a company commander, but also from extensive research, including countless interviews with other soldiers of the 199th Light Infantry Brigade. The book ends with a brief note about the 199th LIB being deactivated in Spring 1970, furling its colors after suffering 753 dead and some 5,000 wounded. This fascinating book will help to remind us of the sacrifices made by all Vietnam veterans.
