Miss Entropia and the Adam Bomb George Rabasa,2011-04-01 No other obsession strikes as hard as the love that hits a teenaged boy — especially if he's the sort of kid who is no saner than he wants to be. From the moment Adam Webb sees Francine Haggard—in the van that is supposed to return them to the Institute Loiseaux—the two young mental patients are inextricably connected. Adam will never let this girl go. From hiding her in his bedroom to spiriting her away to Minnesota's north woods, "Miss Entropia" becomes the focus of Adam's every thought and of everything he does. He believes her to be a goddess, his own goddess. But the pyromaniacal Miss Entropia will be neither worshiped nor owned. And so Adam's possessiveness is destined to push her to the breaking point. Theirs is an incendiary love story, an unbalanced Romeo and Juliet, that spins and arcs its way strangely toward tragedy.

Pandora's Keepers Brian Van DeMark,2003-06-01 There Were Nine of Them: men with the names Oppenheimer, Teller, Fermi, Bohr, Lawrence, Bethe, Rabi, Szilard, and Compton-brilliant men who believed in science and who saw before anyone else did the awesome workings of an invisible world. They came from many places, some fleeing Nazism in Europe, others quietly slipping out of university teaching jobs, all gathering in secret wartime laboratories to create the world's first atomic bomb. At one such place hidden away in the mountains of northern New Mexico-Los Alamos-they would crack the secret of the nuclear chain reaction and construct a device that incinerated a city and melted its victims so thoroughly that the only thing left was their scorched outlines on the sidewalks. During the war, few of the atomic scientists questioned the wisdom of their desperate endeavor. But afterward, they were forced to deal with the sobering legacy of their creation. Some were haunted by the dead of Hiroshima and Nagasaki and would become anti-nuclear weapons activists; others would go on to build bigger and even deadlier bombs. Some would remain friends; others would become bitter rivals and enemies. In explaining their lives and their struggles, Brian VanDeMark superbly illuminates the ways in which these brilliant and sensitive men came to terms with their horrific creation. The result is spectacular history and a moral investigation of the highest order.

The Atomic Bomb and American Society Rosemary B. Mariner,G. Kurt Piehler,2009 Drawing on the latest research on the atomic bomb and its history, the contributors to this provocative collection of eighteen essays set out to answer two key questions: First, how did the atomic bomb, a product of unprecedented technological innovation, rapid industrial-scale manufacturing, and unparalleled military deployment shape U.S. foreign policy, the communities of workers who produced it, and society as a whole? And second, how has American society's perception that the the bomb is a means of military deterrence in the Cold War era evolve under the influence of mass media, scientists, public intellectuals, and even the entertainment industry? In answering these questions, *The Atomic Bomb and American Society* sheds light on the collaboration of science and the military in creating the bomb; the role of women working at Los Alamos; the transformation of nuclear physicists into public intellectuals as the reality of the bomb came into widespread consciousness; the revolutionary change in military strategy following the invention of the bomb and the development of Cold War ideology; the image of the bomb that was conveyed in the popular media; and the connection of the bomb to the commemoration of World War II. As it illuminates the cultural, social, political, environmental, and historical effects of the creation of the atomic bomb, this volume contributes to our understanding of how democratic institutions can coexist with a technology that affects everyone, even if only a few are empowered to manage it. Rosemary B. Mariner is formerly Joint Chiefs of Staff Chair and Professor of Military Studies for the National War College. She is currently a lecturer in history at the University of Tennessee, Knoxville. G. Kurt Piehler is associate professor of history and former director of the Center for the Study of War and Society at the University of Tennessee, Knoxville, which hosted the conference that formed the basis of this volume. He is the author of *Remembering War the American Way* and *World War II in the American Soldiers' Lives Series* as well as the coeditor, with John Whiteclay Chambers II, of *Major Problems in American Military History*.

This Atom Bomb in Me Lindsey A. Freeman,2019-02-12 *This Atom Bomb in Me* traces what it felt like to grow up suffused with

American nuclear culture in and around the atomic city of Oak Ridge, Tennessee. As a secret city during the Manhattan Project, Oak Ridge enriched the uranium that powered Little Boy, the bomb that destroyed Hiroshima. The city was a major nuclear production site throughout the Cold War, adding something to each and every bomb in the United States arsenal. Even today, Oak Ridge contains the world's largest supply of fissionable uranium. The granddaughter of an atomic courier, Lindsey A. Freeman turns a critical yet nostalgic eye to the place where her family was sent as part of a covert government plan. There was a city devoted to nuclear science within a larger America obsessed with its nuclear prowess. Through memories, mysterious photographs, and uncanny childhood toys, she shows how Reagan-era politics and nuclear culture irradiated the late twentieth century. Alternately tender and alarming, her book takes a Geiger counter to recent history, reading the half-life of the atomic past as it resonates in our tense nuclear present.

Hiroshima John Hersey, 2020-06-23 Hiroshima is the story of six people—a clerk, a widowed seamstress, a physician, a Methodist minister, a young surgeon, and a German Catholic priest—who lived through the greatest single manmade disaster in history. In vivid and indelible prose, Pulitzer Prize-winner John Hersey traces the stories of these half-dozen individuals from 8:15 a.m. on August 6, 1945, when Hiroshima was destroyed by the first atomic bomb ever dropped on a city, through the hours and days that followed. Almost four decades after the original publication of this celebrated book, Hersey went back to Hiroshima in search of the people whose stories he had told, and his account of what he discovered is now the eloquent and moving final chapter of Hiroshima.

The Armageddon Secret Robert Burnham, 2021-10-14 1938: In a Berlin lab three years before America's entry into World War II, Hitler's scientists were first on the planet to release the atom's energy. Suddenly, Germany was the only nation racing to find the secret to the ultimate weapon. If the Nazis' quest couldn't be checked, civilization would vanish. German general Ludwig Beck's heroic Black Orchestra Underground fighters swore to topple Hitler before he extinguished humanity. That much is history. In the heart of the terror-slammed German capital, Alex Drake, an American expat journalist with an old and very personal hatred of the Nazis, is recruited by Black Orchestra. Their network of spies has uncovered the existence of Hitler's atom bomb project, but no German atomic scientist can be trusted to help them disrupt it. They must have a channel to America to piece together the knowledge essential to block this menace as they battle the Gestapo, betrayal from within, and their own demons to stop the German atomic bomb. Success or failure of their struggle to derail Hitler's ultimate weapon lies with the widow of a fallen Black Orchestra member. Her courage and intelligence will ultimately decide the fate of humanity. The keystone for creating the atomic bomb: The Armageddon Secret.

Atomic Bomb Cinema Jerome F. Shapiro, 2013-05-13 Unfathomably merciless and powerful, the atomic bomb has left its indelible mark on film. In Atomic Bomb Cinema, Jerome F. Shapiro unearths the unspoken legacy of the bombing of Nagasaki and Hiroshima and its complex aftermath in American and Japanese cinema. According to Shapiro, a Bomb film is never simply an exercise in ideology or paranoia. He examines hundreds of films like Godzilla, Dr. Strangelove, and The Terminator as a body of work held together by ancient narrative and symbolic traditions that extol survival under devastating conditions. Drawing extensively on both English-language and Japanese-language sources, Shapiro argues that such films not only grapple with our nuclear anxieties, but also offer signs of hope that humanity is capable of repairing a damaged and divided world. www.atomicbombcinema.com

Atomic Bomb Island Don A. Farrell, 2021-01-15 Atomic Bomb Island tells the story of an elite, top-secret team of sailors, airmen, scientists, technicians, and engineers who came to Tinian in the Marianas in the middle of 1945 to prepare the island for delivery of the atomic bombs then being developed in New Mexico, to finalize the designs of the bombs themselves, and to launch the missions that would unleash hell on Japan. Almost exactly a year before the atomic bombs were dropped, strategically important Tinian was captured by Marines—because it was only 1,500 miles from Japan and its terrain afforded ideal runways from which the new B-29 bombers could pound Japan. In the months that followed, the U.S. turned virtually all of Tinian into a giant airbase, with streets named after those of Manhattan Island—a Marianas city where the bombs could be assembled, the heavily laden B-29s could be launched, and the Manhattan Project scientists could do their last work. Don Farrell has done this story incredible justice for the 75th anniversary. The book is a thoroughly researched, beautifully illustrated mosaic of the final phase of the Manhattan Project, from the Battle of Tinian and the USS Indianapolis to Hiroshima and Nagasaki.

The Unfinished Atomic Bomb David Lowe, Cassandra Atherton, Alyson Miller, 2017-12-26 In its diversity of perspectives, *The Unfinished Atomic Bomb: Shadows and Reflections* is testament to the ways in which contemplations of the A-bomb are endlessly shifting, rarely fixed on the same point or perspective. The compilation of this book is significant in this regard, offering Japanese, American, Australian, and European perspectives. In doing so, the essays here represent a complex series of interpretations of the bombing of Hiroshima, and its implications both for history, and for the present day. From Kuznick's extensive biographical account of the Hiroshima bomb pilot, Paul Tibbets, and contentious questions about the moral and strategic efficacy of dropping the A-bomb and how that has resonated through time, to Jacobs' reflections on the different ways in which Hiroshima and its memorialization are experienced today, each chapter considers how this moment in time emerges, persistently, in public and cultural consciousness. The discussions here are often difficult, sometimes controversial, and at times oppositional, reflecting the characteristics of A-bomb scholarship more broadly. The aim is to explore the various ways in which Hiroshima is remembered, but also to consider the ongoing legacy and impact of atomic warfare, the reverberations of which remain powerfully felt.
