Model Rules of Professional Conduct American Bar Association. House of Delegates, Center for Professional Responsibility (American Bar Association), 2007 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

The Uncertain Alliance Herbert Druks, 2001-06-30 This critical examination of American-Israeli relations from the last year of the Kennedy administration to the last year of Bill Clinton's tenure in office is a companion volume to Herbert Druks' previous book *The Uncertain Friendship: The U.S. and Israel from Roosevelt to Kennedy*. Based upon extensive research of archival sources and interviews of those who made this history happen, such as Harry S. Truman, Averell Harriman, Yitzhak Rabin, and Yitzhak Shamir, this study provides a challenging examination of key events and issues during the last three decades, including JFK and Israel's nuclear research, Johnson and the Six Day War, Kissinger-Nixon and the Yom Kippur War, the rescue at Entebbe, Begin's decision to liberate Lebanon from the PLO, Bush and Iraq, and the Land for Peace formula. In addition to this comprehensive narrative account, Druks does not shy away from the tougher questions that plague the history of the two nations. What was the nature of the friendship and alliance

that Israel achieved with the United States? Did that friendship and alliance help sustain Israel's independence, or did it merely turn Israel into a vassal state of the American empire? Did Israel have another viable alternative? What may lie in store for the future of American-Israeli relations?

Restoring the Balance John Andrew Morrow, 2016-04-26

Restoring the Balance is a penetrating reflection upon the reality of Islam in the modern world. Addressing a myriad of pressing issues that impact Muslims in the East, West, North, and South, it tackles topics that are both difficult and troubling, threading its way through a mine-field of religious, cultural, and ideological issues with courage, balance, caution, and concern. In a world of extremes, which pits religious fundamentalists against radical reformists, it calls upon Muslims to maintain the middle ground, using the Qur'an and the Sunnah to guide to a return of the Prophet's Islam.

The Arab Spring, Democracy and Security Efraim

Inbar, 2013 This volume analyzes the political, economic and strategic dimensions of the recent upheavals in the Middle East known as the Arab Spring. Mass demonstrations in many Arab states challenged the political status quo and the existing political and cultural system in the region. While it is too early to offer a definitive analysis of the impact of the widespread discontent in the Arab world, the trajectory of the events indicates regime change in several states, containment of political unrest in most states, increase in Islamic tendencies, centrifugal tendencies in a number of political units and deterioration of economic conditions. This volume presents an initial assessment by a selected group of Israeli scholars of the implications of the Arab Spring. The chapters focus on important issues such as democratization, the role of economic factors in political change and explanations for variations in regime stability in the Middle East. Taking an international relations perspective, the book not only examines the evolving regional balance, but also explores the

link between external and internal politics and the implications of terrorism for regional security. The chapters also address the implications of the Arab Spring for Israel and its chances of existing peacefully in the region. This volume will be of much interest to students of Middle East politics, international security, foreign policy and international relations.

Neighborliness Erdman Pandero,2017-12-08 The communities in the Southern Philippines are wounded and scarred by the never-ending atrocities between the Philippine Government and Muslim rebel groups who are fighting for their land, their identity and their autonomy. The neighborhood communities between Muslims and Christians are the most affected in the atrocities. It affects the way they live, move and act as neighbors to one another. The neighborliness in the region changes as the landscape of the political and social arena changes. Thus, it is but proper that the healing and reconciliation begins in the same scarred and wounded neighborhoods. This study identifies three narratives of neighborliness in the region; (1) the intentional communities established during the American regime, (2) the neighborliness introduced by the Bishops and the Ulama in response to the document *Nostra Aetate*, and (3) the proposed neighborliness anchored in the document *A Common Word Between Us and You*. The Basic Ecclesial Communities and the Ummah are the communities at the frontier of this new neighborliness. These are the communities who are challenged to live the spirituality of reconciliation as they live this new neighborliness.

Essays in Islamic Philology, History, and Philosophy Alireza Korangy, Wheeler M. Thackston, Roy P. Mottahedeh, William Granara,2016-05-24 The articles in this volume are dedicated to Professor Ahmad Mahdavi Damghani for the breadth and depth of his interests and his influence on those interests. They attest to the fact that his fervor and rigorously surgical attention to detail

have found fertile ground in a wide variety of disciplines, including (among others) Persian literature and philology; Islamic history and historiography; Arabic literature and philology; and Islamic philosophy and jurisprudence. The volume has brought together some of the most respected scholars in the fields of Islamic studies and Islamic literatures, all his prior students, to contribute with articles that touch on the fields Professor Mahdavi Damghani has so permanently touched with his astonishing scholarship and attention to detail.

Argument Structure and Grammatical Relations Pirkko Suihkonen, Bernard Comrie, Valery Solovyev, 2012 This book is a collection of articles dealing with various aspects of grammatical relations and argument structure in the languages of Europe and North and Central Asia (LENCA). Topics covered with respect to individual languages are: split-intransitivity (Basque), causativization (Agul), transitives and causatives (Korean and Japanese), aspectual domain and quantification (Finnish and Udmurt), head-marking principles (Athabaskan languages), and pragmatics (Eastern Khanty and Xibe). Typology of argument-structure properties of 'give' (LENCA), typology of agreement systems, asymmetry in argument structure, typology of the Amdo Sprachbund, spatial realtors (Northeastern Turkic), core argument patterns (languages of Northern California), and typology of grammatical relations (LENCA) are the topics of articles based on cross-linguistic data. The broad empirical sweep and the fine-tuned theoretical analysis highlight the central role of argument structure and grammatical relations with respect to a plethora of linguistic phenomena.

Activity Recognition in Pervasive Intelligent

Environments Liming Chen, Chris D. Nugent, Jit Biswas, Jesse Hoey, 2011-05-04 This book consists of a number of chapters addressing different aspects of activity recognition, roughly in three main categories of topics. The first topic will be focused on activity modeling, representation and reasoning using

mathematical models, knowledge representation formalisms and AI techniques. The second topic will concentrate on activity recognition methods and algorithms. Apart from traditional methods based on data mining and machine learning, we are particularly interested in novel approaches, such as the ontology-based approach, that facilitate data integration, sharing and automatic/automated processing. In the third topic we intend to cover novel architectures and frameworks for activity recognition, which are scalable and applicable to large scale distributed dynamic environments. In addition, this topic will also include the underpinning technological infrastructure, i.e. tools and APIs, that supports function/capability sharing and reuse, and rapid development and deployment of technological solutions. The fourth category of topic will be dedicated to representative applications of activity recognition in intelligent environments, which address the life cycle of activity recognition and their use for novel functions of the end-user systems with comprehensive implementation, prototyping and evaluation. This will include a wide range of application scenarios, such as smart homes, intelligent conference venues and cars.

Multidimensional Functional Assessment of Older

Adults Gerda G. Fillenbaum,2013-05-13 Reliable, easily administered, and objective ways of assessing the well-being of the elderly and their use of, and need for, services are rare. The author of this study provides current information on the Multidimensional Functional Assessment of Older Adults (MFAQ) -- the most widely used questionnaire of its type. This volume discusses ways in which the procedure has been used and can be used by clinicians, program evaluators and planners. The book also examines OARS (Older Americans Resources and Services Program) MFAQ and how it permits assessment of the level of functioning in five areas: social, economic, mental health, physical health and self-care. Readers will find detailed and updated information on administration, hand and computer-based scoring, as well as use of the questionnaire.

The Dynamics of Disability National Research

Council,Division of Behavioral and Social Sciences and Education,Committee on National Statistics,Institute of Medicine,Board on Health Care Services,Committee to Review the Social Security Administration's Disability Decision Process Research,2002-09-16 The Society Security disability program faces urgent challenges: more people receiving benefits than ever before, the prospect of even more claimants as baby boomers age, changing attitudes culminating in the Americans With Disabilities Act. Disability is now understood as a dynamic process, and Social Security must comprehend that process to plan adequately for the times ahead. The Dynamics of Disability provides expert analysis and recommendations in key areas: Understanding the current social, economic, and physical environmental factors in determining eligibility for disability benefits. Developing and

implementing a monitoring system to measure and track trends in work disability. Improving the process for making decisions on disability claims. Building Social Security's capacity for conducting needed research. This book provides a wealth of detail on the workings of the Social Security disability program, recent and emerging disability trends, issues and previous experience in researching disability, and more. It will be of primary interest to federal policy makers, the Congress, and researchers—and it will be useful to state disability officials, medical and rehabilitation professionals, and the disability community.

Disabled People, Work and Welfare Grover, Chris, Piggott, Linda, 2015-07 This is the first book to challenge the idea that paid work should be seen as an essential means to independence and self-determination for the disabled. Writing in the wake of attempts in many countries to increase the employment rates of disabled people, the contributors show how such efforts have led to an overall erosion of financial support for the disabled and increasing stigmatization of those who are not able to work. Drawing on sociology and philosophy, and mounting a powerful case for the rights of the disabled, the book will be essential for activists, scholars, and policy makers.
