**Attachment Theory in Adult Mental Health** Adam N. Danquah, Katherine Berry, 2013-10-08 In the fifty years since its inception, John Bowlby's attachment theory has been powerfully influential on developmental psychology and, more recently, mental health. Bringing together the experience of a diverse range of mental health practitioners and researchers who routinely use attachment theory in their own work, *Attachment Theory in Adult Mental Health* provides a guide to using attachment theory in everyday practice. Adam N. Danquah and Katherine Berry present a wide-ranging and practical approach to the topic which includes studies on clinical practice, the provision of mental health services and accommodating intercultural perspectives. Section One covers the basics of attachment theory and practice. Section Two presents clinical problems and presentations including, among others, the treatment of depression, anxiety disorders, psychosis, personality disorder and eating disorders. Section Three addresses the needs of specific populations, discussing the influence of sociocultural factors like gender, ethnicity and age. Finally, Section Four examines the organisation and the practitioner, including using the theory to organise services and how individual therapists can integrate their own attachment histories into their approach. Including the most up-to-date theories and practice in the field, *Attachment Theory in Adult Mental Health* is ideal for psychologists and psychological therapists, counsellors, psychiatrists, occupational therapists, social workers and mental health service managers and commissioners.

*Who Are You?* Alex Custodio, 2020-10-13 The Game Boy Advance platform as computational system and cultural artifact, from its 2001 release through hacks, mods, emulations, homebrew afterlives. In 2002, Nintendo of America launched an international marketing campaign for the Game Boy Advance that revolved around the slogan "Who Are You?"—asking potential buyers which Nintendo character, game, or even device they identified with and attempting to sell a new product by exploiting players' nostalgic connections to earlier ones. Today, nearly two decades after its release, and despite the development of newer and more powerful systems, Nintendo's Game Boy Advance lives on, through a community that continues to hack, modify, emulate, make, break, remake, redesign, trade, use, love, and play with the platform. In this book Alex Custodio traces the network of hardware and software afterlives of the Game Boy Advance platform. Each chapter considers a component of this network—hardware, software, peripheral, or practice—that illuminates the platform's unique features as a computational system and a cultural artifact. Examining the evolution of the design and architecture of Nintendo's handhelds and home consoles, and the constraints imposed on developers and players, for example, Custodio finds that Nintendo essentially embeds nostalgia into its hardware. She explores Nintendo's expansion of the platform through interoperability; physical and affective engagement with the Game Boy Advance; portability, private space, and social interaction; the platformization of nostalgia; fan-generated content including homebrew, hacking, and hardware modding; and e-waste—the final afterlife of consumer electronics. Although the Game Boy Advance is neither the most powerful nor the most popular of Nintendo's handhelds, Custodio argues, it is the platform that most fundamentally embodies Nintendo's reliance on the aesthetics and materiality of nostalgia.

**Parent-Youth Relations** Stephan Wilson, Gary W Peterson, Suzanne Steinmetz, 2012-12-06 Explore the most fundamental human relationship—between parent and child Western social science has long neglected to acknowledge that family relationships must always be examined from a culturally sensitive perspective. Parent-Youth Relations: Cultural and Cross-Cultural Perspectives fills this void by exploring in depth the most fundamental human relationship—between parent and child—in different societies around the world. International experts provide a comprehensive collection of original research and theory on how parental styles and the effects of culture are interconnected. Written from diverse perspectives, this unique resource reveals deep insight into these relationships by focusing on the individuals, the structure of the family, and societal and cultural influences. Parental relations and cultural belief systems both play integral parts on how socialization and development occur in children. Parent-Youth Relations: Cultural and Cross-Cultural Perspectives presents several viewpoints, some comparing similarities and differences across societies or nations, others exploring relationships within a single culture. This probing global look at parent-youth relations provides sensitively nuanced information valuable for

every professional or student in the social sciences. Detailed tables illustrate research data while thorough bibliographies offer opportunities for further study. *Parent-Youth Relations: Cultural and Cross-Cultural Perspectives* explores: parenting style and its effects on children in Chinese culture parenting style in problem-solving situations in Hong Kong cross-national perspectives on parental acceptance-rejection theory multinational studies of interparental conflict, parenting, and adolescent functioning the relationship between parenting behaviors and adolescent achievement in Chile and Ecuador parent-adolescent relations and problem behaviors in Hungary, the Netherlands, Switzerland, and the United States cross-national analysis of family and school socialization and adolescent academic achievement parent-child contact after divorce—from the child's perspective familial impacts on adolescent aggression and depression in Colombia predicting Korean adolescents' sexual behavior from individual and family factors parenting in Mexican society relations with parents and friends during adolescence and early adulthood parent-child relationships in childhood and adulthood and their effect on the parent's marriage the effects of financial hardship, interparental conflict, and maternal parenting in Germany and more original research studies! *Parent-Youth Relations: Cultural and Cross-Cultural Perspectives* presents the freshest research available along with extensive bibliographies, providing essential reading for educators, advanced undergraduates, graduate students, and professionals in family studies, sociology, psychology, and anthropology.

*Making Places in the Prehistoric World* Joanna Bruck, Melissa Goodman, 2012-10-12 This groundbreaking volume addresses issues central to the study of prehistoric settlement including group memory, the transmission of ideology and the impact of mobility and seasonality on the construction of social identity. Building on these themes, the contributors point to new ways of understanding the relationship between settlement and landscape by replacing Capitalist models of spatial relations with more intimate histories of place.

*The Health and Social Needs of Young Adults with Physical Disabilities* Andrew Thomas, Martin Bax, Diane Smyth, 1989 This book addresses a topic that has received surprisingly little attention to date--the health and social needs of young adults with physical disabilities. Following an extensive review of the contemporary literature on the subject, the authors report an in-depth study on a large sample of physically disabled 18- to 25-year olds living in two survey areas, one urban and one semirural. The study, which included pediatric examinations and interviews by a social psychologist, found that a large proportion of subjects face social and medical problems, for instance: They have serious health needs that are not being met by the statutory services; they left school with less than adequate skills to enable them to lead an independent adult life; they are without a daytime occupation or attend day centers that are described as unstimulating places; they do not receive all the financial benefits to which they are entitled; they are isolated from their peers and lack the social skills to interact with others in a positive and successful way. Parents and guardians were also found to receive little physical or emotional support. These findings underline the need for a better system of providing and coordinating services for this client group, and the authors call for the formation, within each local health authority area, of an Adult Disability Service that would have a clinical and planning role in terms of health care and that would act as a linchpin in the coordination of health, educational, social, and voluntary services. Although this work relates specifically to service provision in the United Kingdom, it is felt that the conclusions and recommendations are also broadly applicable to the situation in other countries.

*The Critical Link 4* Cecilia Wadensjö, Birgitta Englund Dimitrova, Anna-Lena Nilsson, 2007-01-01 This book is a collection of papers presented in Stockholm, at the fourth Critical Link conference. The book is a well-

balanced mix of academic research and texts of a more practical, professional character. The introducing article explicitly addresses the issue of professionalism and how this has been dealt with in research on interpreting. The following two sections provide examples of recent research, applying various theoretical approaches. Section four reports on the development of current, more or less local standards. Section five raises issues of professional ideology. The final section tells about new training initiatives and programmes. All contributions were selected because of their relevance to the theme of professionalisation of interpreting in the community. The volume is the fourth in a series, documenting the advance of a whole new empirical and professional field. It is of central interest for all people involved in this development, interpreters, researchers, trainers and others.

**Linking Adults with Community: Promoting Civic Engagement Through Community Based Learning** Susan C. Reed, Catherine Marienau, 2008-07-15 *Employing community-based learning with adults* presents unique challenges and opportunities; it requires an analysis of the adult-learning literature as well as identification of service-learning practices that will be effective with adults. In this volume, drawing upon adult-learning and service-learning

literature and case studies, scholars and practitioners articulate best practices in community-based adult learning and illustrate its implementation. Adults are increasingly called upon to become involved in the body politic Strengthening their communities promoting change enlivening our democracy Competing with the call for civic engagement are the demanding priorities of modern life that adults face in the workplace, at home, and in their community. In community-based learning, universities partner with local organizations and nonprofits to provide experiences that promote the growth and development of both students and community residents. Careful project design is crucial to the accomplishment of these laudable outcomes. This volume provides a valuable guide to service-learning professionals meeting these challenges. This is the 118th volume in the Jossey-Bass quarterly report series New Directions for Adult and Continuing Education, an indispensable series that explores issues of common interest to instructors, administrators, counselors, and policymakers in a broad range of adult and continuing education settings, such as colleges and universities, extension programs, businesses, libraries, and museums.

**Targeting Investments in Children** Phillip B. Levine, David J.

Zimmerman, 2010-10-15 A substantial number of American children experience poverty: about 17 percent of those under the age of eighteen meet the government's definition, and the proportion is even greater within minority groups. Childhood poverty can have lifelong effects, resulting in poor educational, labor market, and physical and mental health outcomes for adults. These problems have long been recognized, and there are numerous programs designed to alleviate or even eliminate poverty; as these programs

compete for scarce resources, it is important to develop a clear view of their impact as tools for poverty alleviation. Targeting Investments in Children tackles the problem of evaluating these programs by examining them using a common metric: their impact on earnings in adulthood. The volume's contributors explore a variety of issues, such as the effect of interventions targeted at children of different ages, and study a range of programs, including child care, after-school care, and drug prevention. The results will be invaluable to educational leaders and researchers as well as policy makers.

**Asthma** E. Sherwood Brown, 2003-01-01 The relation between psychiatric disorders and general medical conditions is currently a topic of much interest. This volume includes a broad range of papers dealing with psychosocial issues in the morbidity of asthma, depressive symptoms which appear to be more common in asthma patients than in the general population, the link between asthma and anxiety disorders, or side effects of corticosteroid therapy. Furthermore, one paper looks at problems with adherence to treatment and the interaction between patient and provider and another one presents a model of changing human health behavior. Emotional disturbances contributing to several primarily psychogenic illnesses that mimic asthma are also covered. Each chapter includes an overview of the field for those with minimal knowledge of the topic. This book is written by experts for clinicians, general practitioners, mental health professionals, allergists, pulmonologists, and primary care practitioners involved in treating asthma patients especially with a view to the psychological aspects and their influence on the disease.
