Attachment Theory in Adult Mental Health Adam N. Danquah, Katherine Berry, 2013-10-08 In the fifty years since its inception, John Bowlby's attachment theory has been powerfully influential on developmental psychology and, more recently, mental health. Bringing together the experience of a diverse range of mental health practitioners and researchers who routinely use attachment theory in their own work, *Attachment Theory in Adult Mental Health* provides a guide to using attachment theory in everyday practice. Adam N. Danquah and Katherine Berry present a wide-ranging and practical approach to the topic which includes studies on clinical practice, the provision of mental health services and accommodating intercultural perspectives. Section One covers the basics of attachment theory and practice. Section Two presents clinical problems and presentations including, among others, the treatment of depression, anxiety disorders, psychosis, personality disorder and eating disorders. Section Three addresses the needs of specific populations, discussing the influence of sociocultural factors like gender, ethnicity and age. Finally, Section Four examines the organisation and the practitioner, including using the theory to organise services and how individual therapists can integrate their own attachment histories into their approach. Including the most up-to-date theories and practice in the field, *Attachment Theory in Adult Mental Health* is ideal for psychologists and psychological therapists, counsellors, psychiatrists, occupational therapists, social workers and mental health service managers and commissioners.

Who Are You? Alex Custodio, 2020-10-13 The Game Boy Advance platform as computational system and cultural artifact, from its 2001 release through hacks, mods, emulations, homebrew afterlives. In 2002, Nintendo of America launched an international marketing campaign for the Game Boy Advance that revolved around the slogan "Who Are You?"—asking potential buyers which Nintendo character, game, or even device they identified with and attempting to sell a new product by exploiting players' nostalgic connections to earlier ones. Today, nearly two decades after its release, and despite the development of newer and more powerful systems, Nintendo's Game Boy Advance lives on, through a community that continues to hack, modify, emulate, make, break, remake, redesign, trade, use, love, and play with the platform. In this book Alex Custodio traces the network of hardware and software afterlives of the Game Boy Advance platform. Each chapter considers a component of this network—hardware, software, peripheral, or practice—that illuminates the platform's unique features as a computational system and a cultural artifact. Examining the evolution of the design and architecture of Nintendo's handhelds and home consoles, and the constraints imposed on developers and players, for example, Custodio finds that Nintendo essentially embeds nostalgia into its hardware. She explores Nintendo's expansion of the platform through interoperability; physical and affective engagement with the Game Boy Advance; portability, private space, and social interaction; the platformization of nostalgia; fan-generated content including homebrew, hacking, and hardware modding; and e-waste—the final afterlife of consumer

electronics. Although the Game Boy Advance is neither the most powerful nor the most popular of Nintendo's handhelds, Custodio argues, it is the platform that most fundamentally embodies Nintendo's reliance on the aesthetics and materiality of nostalgia.

***Making Places in the Prehistoric World* Joanna Bruck, Melissa**

Goodman, 2012-10-12 This groundbreaking volume addresses issues central to the study of prehistoric settlement including group memory, the transmission of ideology and the impact of mobility and seasonality on the construction of social identity. Building on these themes, the contributors point to new ways of understanding the relationship between settlement and landscape by replacing Capitalist models of spatial relations with more intimate histories of place.

The Health and Social Needs of Young Adults with Physical Disabilities

Andrew Thomas, Martin Bax, Diane Smyth, 1989 This book addresses a topic that has received surprisingly little attention to date--the health and social needs of young adults with physical disabilities. Following an extensive review of the contemporary literature on the subject, the authors report an in-depth study on a large sample of physically disabled 18- to 25-year olds living in two survey areas, one urban and one semirural. The study, which included pediatric examinations and interviews by a social psychologist, found that a large proportion of subjects face social and medical problems, for instance: They have serious health needs that are not being met by the statutory services; they left school with less than adequate skills to enable them to lead an independent adult life; they are without a daytime occupation or attend day centers that are described as unstimulating places; they do not receive all the financial benefits to which they are entitled; they are isolated from their peers and lack the social skills to interact with others in a positive and successful way. Parents and guardians were also found to receive little physical or emotional support. These findings underline the need for a better system of providing and coordinating services for this client group, and the authors call for the formation, within each local health authority area, of an Adult Disability Service that would have a

clinical and planning role in terms of health care and that would act as a linchpin in the coordination of health, educational, social, and voluntary services. Although this work relates specifically to service provision in the United Kingdom, it is felt that the conclusions and recommendations are also broadly applicable to the situation in other countries.

The Critical Link 4 Cecilia Wadensjö, Birgitta Englund Dimitrova, Anna-Lena Nilsson, 2007-01-01 This book is a collection of papers presented in Stockholm, at the fourth Critical Link conference. The book is a well-balanced mix of academic research and texts of a more practical, professional character. The introducing article explicitly addresses the issue of professionalism and how this has been dealt with in research on interpreting. The following two sections provide examples of recent research, applying various theoretical approaches. Section four reports on the development of current, more or less local standards. Section five raises issues of professional ideology. The final section tells about new training initiatives and programmes. All contributions were selected because of their relevance to the theme of professionalisation of interpreting in the community. The volume is the fourth in a series, documenting the advance of a whole new empirical and professional field. It is of central interest for all people involved in this development, interpreters, researchers, trainers and others.

Linking Adults with Community: Promoting Civic Engagement Through Community Based Learning Susan C. Reed,Catherine Marienau,2008-07-15 *Employing community-based learning with adults* presents unique challenges and opportunities; it requires an analysis of the adult-learning literature as well as identification of service-learning practices that will be effective with adults. In this volume, drawing upon adult-learning and service-learning literature and case studies, scholars and practitioners articulate best practices in community-based adult learning and illustrate its implementation. Adults are increasingly called upon to become involved in the body politic Strengthening their communities promoting change enlivening our democracy Competing with the call for civic engagement are the demanding priorities of modern life that adults face in the workplace, at home, and in their community. Targeting Investments in Children Phillip B. Levine, David J. Zimmerman, 2010-10-15 A substantial number of American children experience poverty: about 17 percent of those under the age of eighteen meet the government's definition, and the proportion is even greater within minority groups. Childhood poverty can have lifelong effects, resulting in poor educational, labor market, and physical and mental health outcomes for adults. These problems have long been recognized, and there are numerous programs designed to alleviate or even eliminate poverty; as these programs compete for scarce resources, it is important to develop a clear view of their impact as tools for poverty alleviation. *Targeting Investments in Children* tackles the problem of evaluating these programs by examining them using a common metric: their impact on earnings in adulthood. The volume's contributors explore a variety of issues, such as the effect of interventions targeted at children of different ages, and study a range of programs, including child care, after-school care, and drug prevention. The results will be invaluable to educational leaders and researchers as well as policy makers.
