*52 Lessons from a Card Deck* Ravi Raman,2022-05-11 52 Lessons From a Card Deck aims to increase awareness of the game of Contract Bridge amongst established, upcoming, and newcomers to the game. Established players need to understand how to position the game to newcomers, upcoming players will increase awareness of their game, and newcomers will clear a lot of myths and misunderstandings about the game. The book is written in 52 chapters, symbolising a deck of cards, and each chapter conveys how the game can relate to some aspect of life, work, or daily activities. It is presented in an easy-to-read format in a conversational mode between four upcoming bridge players at a fictitious club called Sarangapani Club. Each chapter has five messages under the title "Honour Cards." These messages were used for marketing bridge education classes seminars (Parisamvad) and practical learning (Spardha Shikshan) sessions. They emphasise that the game has a lot of variety, depth, and challenges and can also be used as a competitive sport or as a social gathering to make a network of friends. Each message connects some concept with bridge and is presented in two styles –essay format and comments by faculty members.

*Seamless Learning in the Age of Mobile Connectivity* Lung-Hsiang Wong,Marcelo Milrad,Marcus Specht,2014-11-02 The book departs from the approach of related titles by focusing on describing and reflecting upon the notion of seamless learning with regard to salient characteristics of learner mobility and bridging of learning experiences across learning spaces. It is the first such work that is solely dedicated to research on and the practice of seamless learning, uniquely combining interpretations, visions, and past research on and practices in seamless learning from diversified perspectives. The book also strikes a good balance between theoretical and practical perspectiveness, going beyond a collection of reports on specific research projects. Instead of thick descriptions of research processes and findings, readers will find significant insights and food for thought intended to inspire further advances in the research on and practice of seamless learning.

*The Theory of Gambling and Statistical Logic* Richard A. Epstein,2012-12-28 Early in his rise to enlightenment,

man invented a concept that has since been variously viewed as a vice, a crime, a business, a pleasure, a type of magic, a disease, a folly, a weakness, a form of sexual substitution, an expression of the human instinct. He invented gambling. Recent advances in the field, particularly Parrondo's paradox, have triggered a surge of interest in the statistical and mathematical theory behind gambling. This interest was acknowledged in the motion picture, 21, inspired by the true story of the MIT students who mastered the art of card counting to reap millions from the Vegas casinos. Richard Epstein's classic book on gambling and its mathematical analysis covers the full range of games from penny matching to blackjack, from Tic-Tac-Toe to the stock market (including Edward Thorp's warrant-hedging analysis). He even considers whether statistical inference can shed light on the study of paranormal phenomena. Epstein is witty and insightful, a pleasure to dip into and read and rewarding to study. The book is written at a fairly sophisticated mathematical level; this is not Gambling for Dummies or How To Beat The Odds Without Really Trying. A background in upper-level undergraduate mathematics is helpful for understanding this work. Comprehensive and exciting analysis of all major casino games and variants Covers a wide range of interesting topics not covered in other books on the subject Depth and breadth of its material is unique compared to other books of this nature Richard Epstein's website: [www.gamblingtheory.net](http://www.gamblingtheory.net)

*The Elite* Leigh Neville, 2019-11-28 Using rare and previously unpublished images from around the world, *The Elite: The A-Z of Modern Special Operations Forces* is the ultimate guide to the secretive world of modern special operations forces. It sends the reader back in time to operations such as Eagle Claw in Iran and the recapture of the Iranian Embassy in London and then forward to recent operations against al-Shabaab and Islamic State. Entries also detail units ranging from the New Zealand SAS Group to the Polish GROM, and key individuals from Iraq counter-terrorism strategist General Stanley McChrystal to Victoria Cross recipient SASR Corporal Mark Donaldson. Answering questions such as how much the latest four-tube night vision goggles worn by the SEALs in Zero Dark Thirty cost, which pistol is most widely employed by special operators around the world and why, and if SOF still use HALO jumps, this book is the definitive single-source guide to the world's elite special forces.
