Genetic Effects on Aging David E. Harrison, 1990-08-09 This volume provides background knowledge useful to those setting out to do genetic studies of aging in mammals, and raises vital questions: How many genes are important in mammalian aging? What are the optimal methods for their study? To what degree are patterns of aging, and patterns of growth and development part of the same process? Do patterns of development predict subsequent patterns of growth and aging? Are there a few fundamental aging processes, or does every biological system age? The rapid rate of progress in this field required a new volume with a new approach, based on the combination of classical genetics and the powerful new tools of molecular genetics. Although mammalian systems are emphasized, representatives of the advanced genetic studies in *Drosophila* and other model systems are included. The purpose is to enrich and stimulate genetic studies of mammalian aging by suggesting and evaluating future possibilities.

Your Seven-Year-Old Louise Bates Ames, Carol Chase Haber, 2012-01-18 *Your Seven-Year-Old* is devoted to the delightful but often anxious and withdrawn child of Seven. Although any seven-year-old will have moments of exuberance, security, and happiness, in general this is an age of introspection. As it begins, parents and teachers may welcome the quiet after the tussles and tangles of Six. But once the child of Seven starts to withdraw it's almost as though he doesn't know where or when to stop. Seven-year-olds feel picked on by family, friends, and teachers alike; they worry that no one likes them; they expect every little task to prove too difficult to handle; tears come easily at this age. With wit and wisdom, Dr. Ames of the highly respected Gesell Institute and Carol Chase Haber offer insights into what children this age are feeling and thinking, and how parents can best deal with these moody, serious Sevens. Included in this book: • New body awareness • Sulking • Concerns about fairness • Stories from real life • Fascination with horror, gore • Threats of running away from home • Life in the second grade • Books for Sevens and the parents of Sevens "Louise Bates Ames and her colleagues synthesize a lifetime of observation of children, consultation, and discussion with parents. These books will help parents to better understand their children and will guide them through the fascinating and sometimes trying experiences of modern parenthood."—Donald J. Cohen, M.D., Director, Yale Child Study Center, Irving B. Harris Professor of Child Psychiatry, Pediatrics, and Psychology, Yale School of Medicine

Perimetry Update 1998/1999 Michael Wall, John M. Wild, 1999 The topics presented at the XIIIth Symposium embraced all aspects of perimetric science. A total of ten sessions were held and covered: fundamentals of perimetry, visual psychophysics, new perimetric techniques, new algorithms for estimating threshold, perimetric variability, color perimetry, optic nerve head imaging, and visual field investigation in glaucoma and in retinal and neurological disorders. The new perimetric techniques included frequency doubling technology, flicker perimetry and pupil perimetry. The new algorithms included the Swedish Interactive Threshold Algorithm (SITA) and Tendency Orientated Perimetry (TOP). The session on perimetric variability addressed some of the issues contributing to short-term fluctuation, and also contained papers on the use of univariate linear regression of point-wise sensitivity against time to follow-up for the identification of progressive visual field loss. The session on color perimetry was almost exclusively concerned with Short Wavelength Automated Perimetry (SWAP), particularly in glaucoma and high risk ocular hypertension. However, one group described a seemingly promising additional use for SWAP; namely, in the detection of diabetic macular edema. The presentations within the imaging session described the latest morphometric and topographic parameters derived by optic nerve head and nerve fiber layer analysis, and compared these structural measures with those of the functional assessment.
