Planting the Seeds of SEAD William A. Hewitt,1993 Aircrews had dealt with threats --fighters and anti-aircraft artillery (AAA) --since the beginnings of the use of aircraft in combat, but the introduction of the Soviet-built SA-2 surface- to-air missile (SAM) in the Vietnam War ushered a new and deadly threat into air war over Vietnam. Although it was not an unexpected threat, having earlier shot down two American U-2 reconnaissance aircraft, the US Air Force's tactical forces were largely unprepared. A counter had to be found, and that counter was the Wild Weasel, a specially configured F-100 F aircraft with electronics for detecting and then homing on radar emissions from SAM sites. The Weasel proved to be an effective weapon for suppressing enemy radar and SAM threats. Many changes occurred in the Weasel program. The F-100F airframe was too slow to keep up with the primary attack aircraft of the day, the F-105, so the Weasel electronics were added to an F-105 aircraft designated the EF-105 and later redesignated the F-105G. That airframe had too little life left in it and was itself replaced by the F-4C. Following the Vietnam War, the F-4C was replaced by the current Wild Weasel platform, the F-4G, a modified F-4F platform incorporating more capable electronic gear for employment against the mobile Soviet threats. Along with changes in aircraft came changes in weapons and tactics. The first Weasels employed rockets to mark the target for following attack aircraft who would destroy the SAM sites with bombs or cluster munitions. These tactics required the aircraft to overfly the heavily defended sites, increasing the aircraft's vulnerability to the SAMs and to AAA. The introduction of Shrike anti-radiation missile (ARM) negated the requirement to overfly the site, but its short range required further improvement. The improvement came in the Standard ARM, a missile that was followed by development of the High-Speed Anti- Radiation Missile, or HARM, the weapon of choice for today's Weasel.

Theory to Countermeasures Against New Radars Xixiang Zhang,Kaiqi Xiao,Jie Gu,2022-04-19 This book introduces readers to a range of jamming principles and techniques for new radars, combining a wealth of theoretical analyses, test data, calculations, and charts. With rapid advances in military radar technology, new types of radar are constantly emerging. Therefore, there is an urgent need to carry out effective research on these new radars and to develop corresponding jamming techniques. The main topics covered include development of radar and radar countermeasures; jamming techniques for synthetic aperture radar; jamming techniques for pulse compression radar; jamming techniques for pulse Doppler radar; general jamming techniques for various radars; analysis and calculation of the effective jamming suppression zone and jamming exposure zone for radars installed on different platforms; jamming techniques for phased array radar; jamming techniques for dual (multiple) static radar; and solutions for high equivalent radiation power, high reception sensitivity, and transceiver isolation in jammer design.

Detecting and Classifying Low Probability of Intercept Radar Phillip E. Pace,2009 This comprehensive book presents LPI radar design essentials, including ambiguity analysis of LPI waveforms, FMCW radar, and phase-shift and frequency-shift keying techniques. Moreover, you find details on new OTHR modulation schemes, noise radar, and spatial multiple-input multiple-output (MIMO) systems. The book explores autonomous non-linear classification signal processing algorithms for identifying LPI modulations. It also demonstrates four intercept receiver signal processing techniques for LPI radar detection that helps you determine which time-frequency, bi-frequency technique best suits any LPI modulation of interest.--Publisher.

Douglas A-4 Skyhawk Jim Winchester,2004-09-30 The Skyhawk first entered service with the US Navy almost 50 years ago. It is still in service with various US units and remains the backbone of many of the air forces of those countries to which it has been exported. It was originally conceived as a carrier-borne fighter bomber, but as the aircraft has evolved it has taken on other roles.This is an in-depth look at the design, production, evolution, operation and performance of the aircraft. It will also include first-hand accounts of flying the Skyhawk in action.

Douglas A-4 Skyhawk Jim Winchester,2004-09-30 A detailed look at the combat aircraft designed by the legendary Edward H. Heinemann with one role in mind: tactical nuclear delivery. The Skyhawk first entered service with the US Navy almost 50 years ago. It is still in service with various US units and remains the backbone of many of the air forces of those countries to which it has been exported. "Heinemann's Hot Rod" was never called upon for its original purpose--nuclear delivery from aircraft carriers--but its well-designed airframe proved adaptable to many other uses. This is an in-depth look at the design, production, evolution, operation and performance of the aircraft. It will also include first-hand accounts of flying the Skyhawk in action.

Wild Weasel Fighter Attack Thomas Withington,2008-09-22 An in-depth look at the weaponry, tactics, and combat pilots involved in neutralizing enemy air defenses--from the Vietnam War to today. Detecting and destroying enemy Surface-to-Air Missiles (SAMs) and radar is arguably the most dangerous mission that any pilot can undertake. Tactics differ with air forces, but the general principal is to fly a formation of aircraft into an area where the enemy's air defenses are strong, wait for their radar to illuminate the aircraft and then launch a volley of anti-radiation missiles to destroy the radar and thus blind the SAMs and air defenses. Put simply, without the Suppression of Enemy Air Defenses (SEAD) mission, the loss of other aircraft will be too high and the effectiveness of attack on the enemy too low. Despite the undeniable bravery of the aircrews who flew these missions for the United States Air Force in every conflict since the Vietnam war, and their colleagues in other air forces across the world who have risked their lives in similar missions, the tactics, history, aircraft and weapons of the SEAD mission have seldom benefited from rigorous historical examination. Using interviews with SEAD pilots, industrial experts and historical documents this book for the first time will give a detailed history of the SEAD mission from the Vietnam War to the present day.
