**The Theory of H(b) Spaces:** Emmanuel Fricain, Javad Mashreghi, 2016-10-20 An H(b) space is defined as a collection of analytic functions that are in the image of an operator. The theory of H(b) spaces bridges two classical subjects, complex analysis and operator theory, which makes it both appealing and demanding. Volume 1 of this comprehensive treatment is devoted to the preliminary subjects required to understand the foundation of H(b) spaces, such as Hardy spaces, Fourier analysis, integral representation theorems, Carleson measures, Toeplitz and Hankel operators, various types of shift operators and Clark measures. Volume 2 focuses on the central theory. Both books are accessible to graduate students as well as researchers: each volume contains numerous exercises and hints, and figures are included throughout to illustrate the theory. Together, these two volumes provide everything the reader needs to understand and appreciate this beautiful branch of mathematics.

*The Concept of >Ruach Ra'ah< in Contemporary Rabbinic Responsa (1945-2000)* Leon Mock,2021-10-04 The concept of 'Ruakh Ra'ah' (Evil Spirit), is extremely rare in the Tanach, but is found much more frequently in post-Biblical rabbinic literature and even more in publications by rabbis of the last two centuries. This study focuses on the quite neglected period of responsa literature after the Second World War until the present. This literature consist fo answers given to questions about religious rules. The notion of the 'evil spirit' is strongly connected to the ritual of washing hands in the morning, but also before a meal, in connection with sexual relations and with visiting a graveyard. The washing of hands is supposed to be necessary to ward off bad influences. This ritual can be understood in between mysticism, gender studies, magic and embodied religion. This book analyses the meaning and role of the 'Ruakh Ra'ah' in a corpus of almost 200 rabbinic orthodox response from 1945-2000. What happens to the term Ruakh Ra'ah in these modern responsa? Does the ritual persist without being associated with the Ruakh Ra'ah, or does the term continue to be linked to the ritual, but reinterpreted in cause of the possible tension between the traditional rabbinic paradigm and the modern scientific knowledge paradigm. The connection between this ritual and the stratification of the (ultra) orthodox society and cosmological representations offers a clue to the rationale of this practice. Questions of identity, gender and community boundaries that divide insiders from outsiders (Jewish and non-Jewish) seem to be related to the discourse in the corpus on this ritual. As the Ruakh Ra'ah stands at the intersection between magical perceptions, religion (ritual), and premodern science (medicine) it is suitable as a possible test case for the way in which modern rabbinic responsa deal with other archaic terms and concepts that are related or comparable to the Ruakh Raah. This book is relevant to the debate on the relation of religion to the modern world as it provides insights into the ways contemporary believers deal with the modern world, and the various mechanisms to deal with potential discrepancies.

**Bird Kiss Volume 2** Eun Ah Park Or Eunah Park,2006-12-12 First published in Korea in 2003 by Haksan Pub. Co.--T.p. verso.

Introduction to the Science of Language A. H. Sayce,2019-07-23 First published in 1900, this is the second of two volumes of the magnum opus from pioneer assyriologist and linguist Rev. Archibald Sayce and continues directly from the first, providing an introduction to linguistic roots, inflectional families of speech, agglutinative, incorporating, polysynthetic and isolating languages, comparative mythology, the science of religion, the origin of language and the relation of language to ethnology, logic and education. In it, Sayce was the first to emphasize the principle of partial assimilation and the linguistic principle of analogy. This 4th edition, ten years after the first, reflected on the limitations of science revealed since 1890, in an era when languages, like other humanities subjects, still idealised scientific approaches. Archibald Henry Sayce was one of the greatest comparative linguists of the time, being proficient in Accadian, Arabic, Cuneiform, Chinese, Egyptian, Greek, Hebrew, Hittite, Japanese, Latin, Persian, Phoenician, Sanscrit and Sumerian. He had a good knowledge of every Semitic and Indo-European language and could write good prose in at least twenty languages. Sayce's first major contribution to scholarship was a highly significant translation of an Accadian seal, a 'bilingual text' from which to translate cuneiform, similar to the Rosetta Stone. Here then, no doubt, the reader learns from a master of comparative linguistics.
