Perception: How Artificial Intelligence Sees the World (Fun Picture Book for K-2, AI+ME Series) ReadyAI,2020-09-30 Is your child interested in sci-fi, robots, or video games? Is your kid fascinated by smart home assistants and the prospect of self-driving cars? Time to turn that enthusiasm into action and engage with the exciting world of artificial intelligence! AI+Me is a series designed to introduce the 5 Big Ideas of Artificial Intelligence to young learners. Students take a deep dive into the Five Big Ideas of AI (Perception, Representation and Reasoning, Learning, Natural Interaction, and Societal Impact). This is the first book in the AI+Me series focused on Perception. The series is recommended for K-2 students. Why should children be educated about AI? Learning AI opens up a world of opportunities. As the fastest growing area of computer science, AI will become the most important change force when our children grow up so it is critical they learn about it early. AI is fun! The field of AI started with scientists making computers learn to play games. AI is an incredibly fun way to introduce kids to programming and pique their interest in advanced topics like deep learning. Lastly, a topic like AI naturally opens up discussions about our humanity. In our curriculum, we dig deep into questions like “does AI positively or negatively impact society?” In doing so we aim to develop critical thinking skills and encourage students to reflect deeply. Benefits of AI education: - Gets children interested in #STEM education - Improves their problem-solving and critical-thinking skills - Builds their understanding of the tech tools that'll shape their future - Starts important conversations about the future of humanity What are educators saying: “I really love these books. I think they are absolutely beautiful and very visually engaging ways for students to learn about artificial intelligence. I like how they progress through the topic and terms related to artificial intelligence and help students to attach meaning to what they are learning by the different examples and step-by-step ways that students build their understanding through the book.” - Rachelle Dene Poth, Author of In Other Words, Unconventional, The Future is Now, and Chart a New Course. What are parents saying: “My 1st grader loves this book. She already is really interested in computers, but this book got her thinking about how we actually tell emotions. She started using her camera on her computer to record different expressions.” “My son learned ReadyAI courses before. I let his friend read AI+Me big idea 1. Surprisingly, both of them finished reading the book, with a lot of interest! I Will recommend this book for elementary school students.” “I have been looking for fun ways to introduce AI to my kid, and this definitely nailed it.”

Un Different "Je T'aime" Onipe,2009-12-29 Sous le coup de l'motion on n'arrive pas analyser immédiatement ce que peut causer le mouvement brutal ou non du sujet. Dirait un connaisseur que l'homme n'est pas autant analytique qu'il prétend l'être. C'est le fait de n'être pas maître de soi ; de se posséder que dans des moments et le contraire s'inscrit dans d'autres. Il est à croire que personne ne peut prétendre être le chef de soi, de ses gestes dans les bons et mauvais moments.

Scary Smart Mo Gawdat,2022-12-08 A Sunday Times Business Book of the Year. Scary Smart will teach you how to navigate the scary and inevitable intrusion of Artificial Intelligence, with an accessible blueprint for creating a harmonious future alongside AI. From Mo Gawdat, the former Chief Business Officer at Google [X] and bestselling author of Solve for Happy. Technology is putting our humanity at risk to an unprecedented degree. This book is not for engineers who write the code or the policy makers who claim they can regulate it. This is a book for you. Because, believe it or not, you are the only one that can fix it. - Mo Gawdat Artificial intelligence is smarter than humans. It can process information at lightning speed and remain focused on specific tasks without distraction. AI can see into the future, predict outcomes and even use sensors to see around physical and virtual corners. So why does AI frequently get it so wrong and cause harm? The answer is us: the human beings who write the code and teach AI to mimic our behaviour. Scary Smart explains how to fix the current trajectory now, to make sure that the AI of the future can preserve our species. This book offers a blueprint, pointing the way to what we can do to safeguard ourselves, those we love, and the planet itself. 'No one ever regrets reading anything Mo Gawdat has written.' - Emma Gannon, author of The Multi-Hyphen Method and host of the podcast Ctrl Alt Delete

Human-AI Interaction Readyai,2021-01-25 This picture book for kids talks about the interaction between Artificial Intelligence & humans.

Make It All about Me Rasmus Houliand,Colin Shearer,2019-06-20 The term omnichannel may be a marketing buzzword, but it also refers to a significant shift: marketers now need to provide a seamless experience, regardless of channel or device. Make It All About Me suggests how to work with omnichannel marketing and artificial intelligence without getting stuck in a certain channel or silo. Drawing on insights from global marketing experts, the book centers around the Omnichannel Hexagon, a framework to help gauge your omnichannel progress and prioritize your marketing efforts to ensure that every step you take is a step closer to the perfect, tailored customer experience - without sacrificing profitability. The authors provide the background for understanding the six main omnichannel disciplines and demonstrate how you can manage them in a more customer-centric manner. Readers will get a visual overview of how far along their organization is in working with omnichannel and what barriers might impede further progress.

J'aime Parler! Ann May,2008-06-05 J'aime Parler is an enjoyable way of introducing 5-7 year olds to French. The focus is very much on developing speaking and listening skills, and helping children to discover the joy of learning a foreign language. The lesson plans introduce children to simple vocabulary, with lots of opportunities for role play, songs and other activities. The versatile photocopiable sheets support the lessons and can be made into puppets or masks, flashcards, or used simply as colouring-in sheets. The accompanying CDs contain stories, one for each lesson, about Marvin, a young English kitten, who unexpectedly finds himself in France. Lulu, a French cat, befriends him. She helps him to learn to speak French and introduces him to French culture. Children will love practising their French as they listen to Marvin and Lulu's adventures. In addition there are five traditional French songs. We hope you and your pupils will enjoy using J'aime Parler! and that your pupils will experience a great sense of personal achievement and confidence in their expanding knowledge and understanding of French.
