Crime, Violence and the State in Latin America Jonathan D. Rosen, Hanna Samir Kassab, 2020-08-03 In this succinct text, Jonathan D. Rosen and Hanna Samir Kassab explore the linkage between weak institutions and government policies designed to combat drug trafficking, organized crime, and violence in Latin America. Using quantitative analysis to examine criminal violence and publicly available survey data from the Latin American Public Opinion Project (LAPOP) to conduct regression analysis, individual case studies on Colombia, Mexico, El Salvador, and Nicaragua highlight the major challenges that governments face and how they have responded to various security issues. Rosen and Kassab later turn their attention to the role of external criminal actors in the region and offer policy recommendations and lessons learned. Questions explored include: What are the major trends in organized crime in this country? How has organized crime evolved over time? Who are the major criminal actors? How has state fragility contributed to organized crime and violence (and vice versa)? What has been the government's response to drug trafficking and organized crime? Have such policies contributed to violence? *Crime, Violence and the State in Latin America* is suitable to both undergraduate and graduate courses in criminal justice, international relations, political science, comparative politics, international political economy, organized crime, drug trafficking, and violence.

Idology in Transcultural Perspective Aoyagi Hiroshi,Patrick W. Galbraith,Mateja Kovacic,2021-12-10 This edited volume expands on what Aoyagi Hiroshi intended in the first decade of the new millennium to establish as a subfield of symbolic anthropology called “ideology.” It brings together case studies of popular idolatry in Japan, but goes further to provide a transcultural perspective to guide anthropological investigations in different places and times. In proposing an integrated paradigm for the growing body of literature on idols, the volume redirects recurrent questions to more fundamental points of sociocultural inquiry. Contributions from scholars conducting ethnographic fieldwork, as well as those engaged in theoretical and historical analyses, facilitate comparative reading and critical thought. Exceeding a narrow focus on human idols, the chapters shed new light on virtual idols and YouTubers, cartoon characters and voices, robot idols and cybernetic systems. Science and technology studies thus comes together with theories of animation and anthropological work on life in more-than-human worlds.
