Sidewinder Ron Westrum,2013-08-15 In the mid-1950s a small group of overworked, underpaid scientists and engineers on a remote base in the Mojave Desert developed a weapon no one had asked for but everyone in the weapons industry desired. This is the story of how that unorthodox team, led by visionary Bill McLean, overcame U.S. Navy bureaucracy and other more heavily funded projects to develop the world's best air-to-air missile. Author Ron Westrum examines that special time and place—when the old American work ethic and “can do” spirit were a vital part of U.S. weapons development—to discover how this dedicated team was able to create a simple and inexpensive missile. Today, many decades after its invention, the Sidewinder missile is still considered one of the best that America has to offer. In a time of billion-dollar weapons development contracts, astronomical cost overruns, and defense acquisitions scandals, this revealing, highly readable tale about one of the most successful weapons in history should be of interest to anyone concerned with national security.=

F-14 Tomcat Pilot's Flight Operating Manual Vol. 1 United States Navy,2009-10-19 PLEASE NOTE: THIS IS VOLUME 1 OF 2. YOU MUST PURCHASE BOTH BOOKS TO HAVE A COMPLETE SET. Developed as both an air superiority fighter and a long-range naval interceptor, Grumman's F-14 Tomcat was the U.S. Navy's primary fighter from 1974 until 2006. Over 700 were built. The F-14 flew its first combat missions shortly after its initial deployment in late 1974, flying in support of the American withdrawal from Saigon. In 1981 it drew first blood, as two F-14s from VF-41 downed two Libyan Su-22s. The plane compiled a notable combat record for the United States in both Gulf Wars and NATO actions in Bosnia. Planes sold to the Shah of Iran prior to his ouster remain the last F-14s in active service, as the U.S. Navy retired it in October 2006. This F-14 pilot's flight operating handbook was originally produced by the U.S. Navy. It has been slightly reformatted but is reproduced here in its entirety. It provides a fascinating view inside the cockpit of one of history's great planes.

US Navy F-4 Phantom II MiG Killers 1972-73 Brad Elward,Peter E. Davies,2012-11-20 The second of two books on the Navy's Phantom II MiG killers of the Vietnam War, this book covers the numerous actions fought out over North Vietnam during the Linebacker I and II operations of 1972-73. No fewer than 17 MiGs were downed during this period, five of them by the Navy's sole aces of the conflict, Lts Randy Cunningham and Willie Driscoll of VF-96. Drawing on primary sources such as surviving Phantom II aircrew and official navy documentation, the author has assembled the most precise appraisal of fighter operations involving US Navy Phantom II units and those elusive MiGs ever seen in print.

Implementation of Cost as an Independent Variable Don Gaddis,Naval Postgraduate School (U.S.),1998-12-01 This research is a single case study of the implementation of Department of Defense (DoD) Cost as an Independent Variable (CAIV) into the AIM- 9X

Sidewinder air to air missile program to determine if CAIV has the attributes of a strategic management control system. Environmental forces, budgetary pressures, modernization requirements, and military performance requirements have imposed upon DoD a need to change the way it conducts business, and implement an affordable, best value acquisition strategy through implementation of policies such as CAIV. However, there does not exist a managerial framework to assist the program manager in how to implement CAIV. There exist too many definitions of CAIV and priorities differ about what is the most important CAIV objective. This research uses DoD publications, memorandums, Internet websites, and published academic books and papers to review CAIV objectives, and the use of management control systems in commercial industry and DoD. After studying how the AIM-9X program implemented CAIV, this thesis analyzes and discusses CAW in terms of a strategic management control system. When control is used in the sense of implementing strategy, CAIV has the attributes of a strategic management control system. CAIV has the capability to control individual behavior and incentives that lead to decisions affecting higher costs. Viewing CAIV in this managerial framework may assist DoD in implementing its affordability strategy.

Military Avionics Systems Ian Moir,2019-02-12 Ian Moir and Allan Seabridge Military avionics is a complex and technically challenging field which requires a high level of competence from all those involved in the aircraft design and maintenance. As the various systems on board an aircraft evolve to become more and more inter-dependent and integrated, it is becoming increasingly important for designers to have a holistic view and knowledge of aircraft systems in order to produce an effective design for their individual components and effectively combine the systems involved. This book introduces the military roles expected of aircraft types and describes the avionics systems required to fulfil these roles. These range from technology and architectures through to navigations systems, sensors, computing architectures and the human-machine interface. It enables students to put together combinations of systems in order to perform specific military roles. Sister volume to the authors' previous successful title 'Civil Avionics Systems' Covers a wide range of military aircraft roles and systems applications Offers clear and concise system descriptions Includes case studies and examples from current projects Features full colour illustrations detailing aircraft display systems Military Avionics Systems will appeal to practitioners in the aerospace industry across many disciplines such as aerospace engineers, designers, pilots, aircrew, maintenance engineers, ground crew, navigation experts, weapons developers and instrumentation developers. It also provides a valuable reference source to students in the fields of systems and aerospace engineering and avionics.

Rolling Thunder 1965-68 Richard P. Hallion,2018-02-22 Operation Rolling Thunder was the campaign that was meant to keep

South Vietnam secure, and dissuade the North from arming and supplying the Viet Cong. It pitted the world's strongest air forces against the MiGs and missiles of a small Soviet client state. But the US airmen who flew Rolling Thunder missions were crippled by a badly thought-out strategy, rampant political interference in operational matters, and aircraft optimised for Cold War nuclear strikes rather than conventional warfare. Ironically, Rolling Thunder was one of the most influential episodes of the Cold War – its failure spurring the 1970s US renaissance in professionalism, fighter design, and combat pilot training. Dr Richard P. Hallion, one of America's most eminent air power experts, explains how Rolling Thunder was conceived and fought, and why it became shorthand for how not to fight an air campaign.

A Century of Air Power David Sloggett, 2013-07-18 No other technical development since the introduction of gunpowder has had as great an influence on warfare as the aircraft. From its early beginnings as simply a means of aerial reconnaissance to its utter supremacy on the battlefield, the aircraft has evolved into the most versatile and precise killing machine known to man.??In this wide-ranging and comprehensive study, David Sloggett, an internationally-respected defence analyst, investigates the changing role and increasing significance of air power over the course of the previous 100 years. This is accomplished by detailing every major conflict during that period including not only the two world wars and the recent conflicts in the Middle East but also the Korean War, the Cuban Missile Crisis, the Falklands War and Russian use of air power in Afghanistan. Air power's role in Malaya, Oman, Kenya and in Northern Ireland is also explained. ??A Century of Air Power is the most important study of the use of military aircraft ever undertaken and as such provides valuable lessons for the future – not only for the commanders who have to apply these all-powerful weapons but also for the politicians who have to determine its use.
