

Airboat

William F Althoff

Airboat Dennis F. Bormann, 2011-07 Set in central Florida, *Airboat*, tells the story of Roland, a young man trying to discover his past. A victim of childhood abuse, Roland is taken in as a ward of the state after his grandfather goes missing. It is discovered that the young boy has been building sculptures of river wildlife from the discarded scrap metal of marine motors and propellers from his grandfather's boat repair business, and though he is socially and psychologically dysfunctional, his artwork is so impressive that the term autistic savant is applied to him. Through the care of a passionate psychiatrist, Dr. Michael Turner, Roland starts to make progress with communication. Unfortunately, his ability to create art is lost as the power of language grows. After almost ten years of institutional caretaking, and with the blessings of his doctor, Roland returns to Sanford, Florida to start a journey to try to trigger what little memory he has of his former self, into a fuller understanding of what he intuitively knows he has lost. Part of Roland's genetic heritage is of the Seminoles, the only indigenous North American tribe to never surrender to the United States government. With Dr. Turner at his side, Roland comes to learn of his own connection to the Seminoles through Thomas Fish Hawk, a charismatic, outlaw pot farmer, and Thomas' mother, Mary Fish Hawk. *Airboat* is a fiction imbued with Native American mythology, a journey of self discovery, and the redemptive nature of truth through art.

The Bamboo Shoot James Parker Wollner, 2004-09 In 1967 a new and unique unit was formed using airboats. This was a first for a regular Army Division. The Army asked for volunteers. These volunteers were draftees and regular army personnel. They were from all over the country and from all walks of life. This story is about how they coalesced into a fighting unit that did their very best in a war that was waged with the best intentions. The book is written on a timeline and through the use of vignettes describing life, events, people, flora and fauna and personal feelings. --BOOK JACKET

An Airboat on the Streets of New Orleans Bryan Sibley, Trent Angers, 2008 Millions of Americans watched in horror as New Orleans homes were flooded - some to the rooftops - as a result of Hurricane Katrina in the summer of 2005. The flood was part of the worst natural disaster in U.S. History. Many couldn't stand to be sitting around doing nothing but watching the story unfold on TV while people were dying. And so they acted. Two of those who stepped up were Doug Bienvenu and Drue LeBlanc, a couple from Breaux Bridge, Louisiana who hitched up their airboat and headed for New Orleans. Moved by compassion for their neighbors in need, Doug and Drue were determined to get into the city and start saving people - right away! Aggressive and impatient by nature, Doug felt strongly that waiting for the government to act simply was not an option. Drue - though suffering with kidney disease - was anxious to go as well. She was willing to risk her life to save others in need. After narrowly escaping death from kidney failure on more than one occasion in the past, Drue figured God had kept her alive for a reason. Now she believed she knew why -- inside cover.

Hydroplane Boats Jeff Savage, 2004 Describes the different types of jet-powered hydroplane boats, along with its history, its design, and some of the different competitions that these fast boats participate in.

Hydroplanes Denny Von Finn, 2006-08-01 Hydroplanes travel across the water toward the finish line at incredible speeds. One wrong move can send the vehicle into a serious crash. Students will learn about the history and construction of these lightweight speed-machines.

Hydroplanes Wendy Strobel Dieker, 2006-09 Describes jet-powered hydroplane boats, including information on their design and speed.

Kinetic Contraptions Curt Gabrielson, 2010 The two dozen contraptions found in this handy resource can move across the land, over the sea, and through the air and can be assembled primarily from low-cost or free recycled materials, batteries, and a single motor. Some of the projects include

constructing a hovercraft out of a Styrofoam plate, two corks, and binder clips; building a double-paddlewheeler out of paint stirrers, plastic bottles, and a pair of disposable knives; and turning bamboo skewers, checkers, and a drinking straw into a three-wheeled motorcycle. Each project is clearly explained through materials and tools lists, step-by-step instructions with photographs, and scientific background on the concepts being explored. Budding engineers will get experience working with tools, testing simple circuits, modifying and improving their designs, and building unique contraptions of their own.

The Madison Regatta Fred Farley, Ron Harsin, 2011-06-14 Each summer, a small miracle occurs in southern Indiana, when the little town of Madison becomes the hydroplane racing capital of the world as 100,000-plus people flock in for the Madison Regatta. The townsfolk, not merely content to host, also own the Miss Madison, one of the most successful hydroplanes on the circuit. In recent years, Miss Madison has emerged as the top hydroplane in the world, winning both the driver and hydroplane points standing multiple times. Roar down the Ohio with Fred Farley and Ron Harsin and revisit the long history of racing in this town and the sixty-plus years of the Madison Regatta.

Adventures on the Airboat Trail Ida Haskins, 1973 Stranded in the Florida Everglades during a hunting trip, three boys stumble across a group of gun runners.

Hydroplane Racing in Seattle David D. Williams, 2006 Hydroplane racing burst onto the Seattle scene in 1950, and local sports fans embraced it with a passion that is hard to imagine. Throughout the early 1950s, thousands of fans flocked to Lake Washington to watch classic races between Seattle's Slo-mo-shun boats and a fleet of East Coast challengers. For over 40 years, hydroplane racing was synonymous with summertime in Seattle. During its golden age, when hydro fever was at its height, drivers like Bill Muncey, Ron Musson, and Mira Slovak were sports heroes on par with today's Ken Griffey Jr. or Ichiro. Seattle became the hydro capital of the nation.

Cool Rides in Water Tyler Omoth, 2020 People have been traveling over water to get from here to there for thousands of years, but not in these vehicles! Long ago, people could only dream of what modern technology would bring. Take a tour of some of the most unique and fascinating watercraft around. Find out how hydroplanes reach astonishing top speeds. Discover what it's like to dive into the ocean depths in a submersible or skim along the surface on an electric surfboard. A world of awesome watercraft awaits!--

The Great Airboat Ride! Joey Carter, 2018-03-30 Alligator attack! An early morning crawfishing trip within the dark swamps of Louisiana leads the Cantor kids to an airboat ride they'll not soon forget. The Cantors find themselves up against dangerous alligators, snakes, and thieves!

Turbine Racing in Seattle David D. Williams, 2007-07-18 Hydroplane racing captured the heart and soul of Seattle in the early 1950s and never let go. No Seahawks, Sonics, or Mariners game has come close to drawing one-quarter of the audience that watches the hydroplanes race. The unmistakable sound of the boats' huge motors was as big an attraction as the racing itself. In the mid-1980s, something began to change. The distinctive roar of the old Thunderboats gave way to the whoosh of the turbine. The old names like Muncey and Chenoweth were replaced by new names like Hanauer and Villwock.

The Story of the Airship Hugh Allen, 2008-09 Originally published by the Goodyear Tire and Rubber Co. as a promotional, *The Story of the Airship* chronicles the history and development of these great silver cruisers of the sky. Filled with photos and authoritative text, the book springs from an era when dirigibles, balloons and blimps competed against airplanes for public attention.

Sky Ships William F Althoff, 2016-02-15 Originally published in 1990, *Sky Ships* is easily the most comprehensive history of U.S. Navy airships ever written. The Naval Institute Press is releasing this new edition—complete with two hundred new photographs—to commemorate the twenty-fifth anniversary

of the book's publication. Impressed by Germany's commercial and military Zeppelins, the United States initiated its own airship program in 1915. Naval Air Station Lakehurst in New Jersey was homeport for several of the largest machines ever to navigate the air. The success of the commercial rigid airship peaked in 1936 with transatlantic round trips between Central Europe and the Americas by Hindenburg and by Graf Zeppelin— ending with the infamous fire in 1937. That setback, the onset of war, and the accelerated progress of heavier-than-air technology ended rigid airship development. The Navy continued to use blimps to protect Allied shipping during World War II. Following the war, the Navy persisted with efforts to integrate the airships, but the program was finally discontinued in the early 1960s.

Hydroplane Racing in the Tri-Cities David D. Williams, 2008-06-30 Pasco, Kennewick, and Richland sit along the banks of the Columbia River and form a large, vibrant community in Washington known as "the Tri-Cities." For over 40 years, tens of thousands of fans have come to the Columbia River to enjoy a day in the sun and watch the Columbia Cup Unlimited Hydroplane Race. Famous drivers like Bill Muncy, Dean Chenoweth, Chip Hanauer, and Dave Villwock have all come to Tri-Cities and battled deck-to-deck to win the Columbia Cup.

A Race to Freedom David Williams, 2018-04-28 Mira Slovak was born in Czechoslovakia and endured both the Nazi occupation and the brutal Russian liberation. He joined the Czech Air force, rising to Captain by the age of 21. When he could no longer tolerate life under the Communists, he hijacked an airliner and flew across the Iron Curtain to freedom. He went to work for the CIA and was eventually sent to the US and given a job as Bill Boeing, Jr's personal pilot. When Boeing began racing Hydroplanes in the late 1950s, Mira was his driver. During his ten year career as a hydroplane driver, he won many races and two national championships. He met Presidents and dated movie starlets. After a serious hydroplane accident, Slovak switched to airplanes where he won another national championship. When he retired from racing he became a stunt pilot and public speaker and talked about the value of freedom and how we should value it above everything else. He outlasted Communism and when it collapsed in 1990 he returned to his home, only to realize that his true home was, and always would, be the United States.

Motor Boats, Hydroplanes, Hydroaeroplanes, Construction and Operation, with Practical Notes on Propeller Calculation and Design Thomas Herbert Russell, 1917

Dirigible Dreams C. Michael Hiam, 2014-10-07 Here is the story of airships—manmade flying machines without wings—from their earliest beginnings to the modern era of blimps. In postcards and advertisements, the sleek, silver, cigar-shaped airships, or dirigibles, were the embodiment of futuristic visions of air travel. They immediately captivated the imaginations of people worldwide, but in less than fifty years dirigible—became a byword for doomed futurism, an Icarian figure of industrial hubris. *Dirigible Dreams* looks back on this bygone era, when the future of exploration, commercial travel, and warfare largely involved the prospect of wingless flight. In *Dirigible Dreams*, C. Michael Hiam celebrates the legendary figures of this promising technology in the late nineteenth and early twentieth centuries—the pioneering aviator Alberto Santos-Dumont, the doomed polar explorers S. A. Andr   and Walter Wellman, and the great Prussian inventor and promoter Count Ferdinand von Zeppelin, among other—pivotal figures—and recounts fascinating stories of exploration, transatlantic journeys, and floating armadas that rained death during World War I. While there were triumphs, such as the polar flight of the Norge, most of these tales are of disaster and woe, culminating in perhaps the most famous disaster of all time, the crash of the Hindenburg. This story of daring men and their flying machines, dreamers and adventurers who pushed modern technology to—and often beyond—its limitations, is an informative and exciting mix of history, technology, awe-inspiring exploits, and warfare that will captivate readers with its depiction of a lost golden age of air travel.

Readable and authoritative, enlivened by colorful characters and nail-biting drama, *Dirigible Dreams* will appeal to a new generation of general readers and scholars interested in the origins of modern aviation.
