*Airbus A310* Günter G. Endres,2000 The tenth in this series of illustrated monographs on the key civil aircraft of today: this volume focuses upon the Airbus A310. It examines the design, production and in-service record of the Airbus, and details airline customers and aircraft attrition, as well as a full production list.

Airbus A300/310 Wolfgang Borgmann,2021-04-28 By producing the A300--the first twin-jet, wide-body airliner in the world--the European Airbus consortium succeeded in joining the league of leading aircraft makers. The path was both rocky and exciting. Filled with detailed text, including historical, technological, and flight information, as well as colorful photos, this volume provides a fascinating insight into the history of commercial aviation. The first aircraft designed, built, and sold by Airbus, the A300 airliner debuted in 1974 with Air France and was in constant service throughout the world. Among the many past and present airlines flying the A300/310 are Air Hong Kong, Air France, Air India, American, China Airlines, Eastern, EgyptAir, FedEx, Finnair, Iberia, Korean Air, Pan Am, SAS, UPS, and many others. Though it is no longer produced, examples of the aircraft still fly today.

Sustainability and Management Kıymet Çalıyurt,Ülkü Yüksel,2017-07-14 In the wake of the 1987 Brundtland Report, sustainable development has become key to the management systems within businesses, and a means by which companies can increase their long-term value. Being a 'sustainable company' increasingly means 'staying alive in business' and has become a necessity for all kinds of enterprises, from the micro-sized to global corporations. In more recent years, many companies, and indeed governments, have looked at sustainability as a means to combat the multiple challenges of environmental accidents, global warming, resource depletion, energy, poverty and pollution. However, being sustainable or maintaining sustainability is not an easy task for a company's management function. It needs continuous support and engagement from the board, the executive management, staff and other stakeholders alike. Additionally, it brings extra costs to the company in terms of hiring trained staff, organising continuous training in the company, publishing sustainability reports and subscribing to a rating system. Sustainability must be nourished by a company's board as well as by all of its departments, such as accounting, marketing and human

resources. By the same token, it is not enough for a company simply to declare itself a 'sustainable business' or rely on past measures and reputation; sustainability is an ongoing activity and one which has to be proved by periodically disclosing sustainability reports, according to international rating systems. In *Sustainability and Management: An International Perspective*, Kıymet Çalıyurt and Ülkü Yüksel bring together international authors from a variety of specialisations to discuss the development, aspects, problems, roadmap, trends and disclosure systems for sustainability in management. The result is a lively, insightful exposition of the field.

*Biomass, Biopolymer-Based Materials, and Bioenergy* Deepak Verma,Elena Fortunati,Siddharth Jain,Xiaolei Zhang,2019-01-12 *Biomass, Biopolymer-Based Materials and Bioenergy: Construction, Biomedical and Other Industrial Applications* covers a broad range of material types, including natural fiber reinforced polymer composites, particulate composites, fiberboard, wood fiber composites, and plywood composite that utilize natural, renewable and biodegradable agricultural biomass. In terms of bioenergy, the authors explore not only the well-known processing methods of biofuels, but also the kinetics of biofuels production pathways, a techno-economic analysis on biomass gasification, and biomass gasification with further upgrading into diesel additives and hybrid renewable energy systems for power generation. Further chapters discuss advanced techniques for the development of biomass-based composites, biopolymer-based composites, biomass gasification, thermal kinetic design and techno-economic analysis of biomass gasification. By introducing these topics, the book highlights a totally new research theme in biopolymer-based composite materials and bioenergy. Covers a broad range of different research fields, including biopolymer and natural fiber reinforcement used in the development of composites Demonstrates key

research themes in materials science and engineering, including materials processing, polymer science, biofuel processing, and thermal and kinetic studies Presents valuable information for those working in research and development departments, and for graduate students (Masters and PhDs)

*Air Cargo* Joachim G. Schäfer,2023-02-17 This book uses numerous examples to describe the current opportunities and risks of air freight against the backdrop of stagnating transport volumes since the financial crisis in 2008. It shows what impact these developments have had on those involved, in particular shippers, airlines, airports and freight forwarders. The application-oriented presentation also provides an insight into the design of complex supply chains and the areas of tension in which the players in air freight operate.

Encyclopedia of African Airlines Ben R. Guttery,1998 The rainy season, terrain, and financial hardships have made the construction of highways and railroads nearly impossible in many parts of Africa. This lack of modern infrastructure has been overcome in some part by the development of air transportation. Hundreds of carriers--both small and large, government owned and private--have connected all parts of the continent. Together, they have had a tremendous impact on the African economy and the people. Country-by-country, this comprehensive reference work provides brief histories of over 700 airlines in 54 African nations. Each entry has the years of operation of the carrier, along with information on its origin, growth, and route structure. Aircraft usage, including registration numbers and nicknames, is covered in many cases. Any crashes involving aircraft in the carrier's fleet are also noted. An appendix gives the location of all major African airports.
