The Multi-Million Dollar Treasure Randy Ivy Jones, 2022-05-06 JB became a self-made Billionaire by selling the huge Internet company he started 10 years earlier. He sold his company to the largest Internet search engine company in the world in exchange for \$18.8 billion. The initial investment JB made to create his company was less than \$7,000, so selling the company was a *no brainer*. After selling the company, JB increased his wealth to over 24 billion through some very wise investments. JB's current business is in investments. He buys and sells big time real estate. He also invests in young entrepreneurs and new startup companies. He is JB McGregor of the U.S. Virgin Islands. Specifically, *Papaya Island*, also known locally as *McGregor Island*, located in a small cluster of islands just to the north of St. Thomas and St. John. JB also has a cottage in Key West Florida, a multi-million dollar mansion on the waterway in Fort Lauderdale off of Bayview Drive, and a huge ocean-front mansion just outside Honomu, Hawaii. JB will be giving the cottage in Key West Florida to a former employee as a retirement gift as soon as the current cottage remodeling job is complete. JB is recognized in the media as one who helps and shares his wealth without hesitation. Most of JB's staff travel with him everywhere he goes. They are all paid very well and have excellent benefits. His employees are also extremely loyal to him. JB has provided each staff member with superb medical insurance along with an outstanding 401k plan. The age of most staff members is about 33 years old, the same age as JB. On Papaya Island, they all live in the bungalow's JB had built, which are nestled in the dense vegetation just out of sight of the main house on the island. When JB is in Hawaii, they have a similar setup. When in Fort Lauderdale, JB's staff members usually stay on the yacht where they each have their own cabin. JB and his staff maintain offices in the Papaya mansion, the Honomu mansion, and on his yacht. Since selling his company, JB has had several thrilling adventures. The adventures magically come his way, thanks to Sam Peters, his business partner and sometimes the adventures come from one of the entrepreneurs JB has invested in. Most of these adventures have paid off very well. Plus, the adventures are usually fun and exciting... JB McGregor is asked by two of his employees to help a man they had met at a yacht convention in Florida, David Wade. David wants to find some valuables that had been confiscated by dictators in Italy, Germany, and various other countries from families during between 1933 and 1945 World War II. David wants to return the valuables to the rightful owners or descendants. David Wade's father and his grandfather performed years of research and are almost certain that the valuables were being transported on a DC-3 airplane that crashed in the Sahara desert in 1953. An expedition to the Sahara desert is formed to try and find a DC-3 airplane that crashed in 1953. The airplane was transporting stolen family treasures by various dictators during World War 2. The airplane was heading from Johannesburg South Africa to the United States where the treasures would be sold off. The airplane crash is assumed to be in the vicinity of the Ahaggar Mountains (also known as Hoggar Mountains) near Tamanrasset, Algeria because the last radio transmission of the DC-3 was to the Tamanrasset airport. Unfortunately, a team of known criminals somehow got wind of the treasure and follow JB's expedition throughout the desert.

Which Way Nigeria? Victor Udo, FNSE, 2020-03-20 Nearly four decades after Sunny Okosun posited, *Which Way Nigeria?* Victor Udo serves up a geopolitical literary gem that should be required reading for Nigerian students, policy makers, and civil servants. *Which Way Nigeria?* navigates post-colonial political and diplomatic conditions, class structure and economic organization, Nigerian culture and the diversity of its ethnic groups, and the environment. Writing from a place of unrelenting patriotism for his homeland, Udo outlines his framework Comprehensive Sustainable Development Planning and Implementation (CSDPI) praxis, through which Nigeria's structural, leadership and development challenges can finally be overcome. Often referred to as the Giant of Africa, Nigeria is the most populous

country on the continent and the seventh most populous country in the world. With more than 90 million of its population under the age of eighteen and the world's eighth largest oil producer, Nigeria is on the precipice of becoming a dominant force in the global economy. But its success has been undermined in recent decades by ethnic and religious conflict, political instability, rampant corruption and an ailing economy. Udo relies on his expertise as a foremost authority on climate change mitigation as a path towards global sustainability, thoughtfully scrutinizing the critical interdependence of politics, society, technology and the environment. A collective call to action for fellow patriots, *Which Way Nigeria?* illuminates the resilience of nearly 200 million Nigerian citizens with incredible unrealized potential. Masterfully examining the geopolitical context of a fragmented contemporary Nigeria, Udo offers solutions for a path forward that will elevate his homeland and establish it as a unified global force in which all citizens can prosper.

The Role of Dual-Use Helicopters in the Security and Defence Field Alessandro Marrone, Michele Nones ,2015-07-21 In the current debate on military capabilities and defence industry, the term “dual-use” means those technologies that can be used to develop systems and equipment for both civilian and military purposes. Changes occurred in modes of technological innovation have brought about a growing interconnection between the civilian, security and defence sectors, especially from an industrial point of view. In this context, “dual-use helicopters” refer to platforms that have been designed in compliance with certain standards and are structurally built so that they can satisfy civilian, military or security users with only minimal adjustments or additions. This volume analyses the use of helicopters by armed forces, law enforcement agencies and emergency services, in three countries: Italy, France and the United Kingdom. Such landscape is diversified and fragmented, with different approaches and above all helicopter fleets made up of diverse platforms of subsequent generations – some with more than 30 years of life cycle behind them. In all three countries, national defence budget’s restrictions have demanded more efficient solutions for the necessary fleet renewal and management in the medium term – a renewal often coupled with a quantitative reduction. In this respect, the option of a dual-use helicopter becomes interesting in that it ensures greater security, effectiveness and efficiency in use by armed forces. This calls for a common and in-depth reflection on the problem by all actors in the defence and security field.

The World Air Power Guide David Wragg,2011-02-23 Compiled by the author of Janes Air Forces of the World, this book is a must for aviation experts. In one volume the reader will find the composition and details of all air elements of a staggering 169 nations air forces and, where they exist, army air, naval air and such paramilitary organizations as the US Coast Guard Service. By definition such a book must be regularly updated and David Wragg has researched his subject right up to the minute. This latest book supersedes the authors early book in the Jane series.

Helicopters Jim Winchester,2014-01-30 The helicopter has been aptly described as 'the toy that grew up'. It really did begin as a toy, for the first really successful helicopter was a model made by two Frenchmen in the 18th century. In this fact-filled guide, each aircraft is covered in detail, with annotated colour profile artworks, colour and black-&-white photographs, feature boxes outlining its development, technical specifications, performance data, and variants.

The International Directory of Military Aircraft 2002/03 Gerard Frawley,2002 The fourth edition of exhaustive reference directory includes approximately 310 entries, each one detailing the aircrafts' powerplants, performance crew number, weights, dimensions, armament, operators and history. Also included is a fleet inventory of the world's air arms, and major UAVs and aircraft carriers.

Gli elicotteri duali nel campo della sicurezza e difesa Alessandro Marrone, Michele Nones ,2014-10-23 Nell'odierno dibattito sulle

capacità militari e l'industria della difesa, per “duale” si intendono quelle tecnologie utilizzabili per sviluppare sistemi ed equipaggiamenti in grado di svolgere compiti sia civili che militari. I cambiamenti intercorsi nel modo in cui avviene l'innovazione tecnologica hanno infatti reso i settori civile, della sicurezza e difesa, sempre più interconnessi, specie dal punto di vista industriale. Nel caso degli elicotteri duali, ci si riferisce in particolare ad aeromobili che già in fase di design rispettano determinati standard e vengono predisposti strutturalmente in modo da poter essere usati da soggetti civili, militari o di pubblica sicurezza, attraverso limitate modifiche o integrazioni. Il Quaderno analizza l'uso degli elicotteri da parte sia delle Forze Armate che dei soggetti con compiti di pubblica sicurezza e soccorso in tre paesi: Italia, Francia e Regno Unito. Si tratta di un panorama diversificato e frammentato, con diversi approcci e soprattutto flotte elicotteristiche composte da più linee di aeromobili appartenenti a diverse generazioni – alcune con più di 30 anni di vita operativa alle spalle. In tutti e tre i paesi oggetto dello studio, i limiti posti negli ultimi anni ai bilanci della difesa nazionali spingono a ricercare soluzioni più efficienti per il necessario rinnovo della flotta – rinnovo che spesso si accompagna ad una sua riduzione quantitativa – e per la gestione del parco macchine in un'ottica di medio periodo. In questo ambito, l'opzione degli elicotteri duali rappresenta una prospettiva interessante per assicurare maggiore sicurezza, efficacia ed efficienza nell'uso degli assetti ad ala rotante da parte delle Forze Armate. Prospettiva che richiede una riflessione approfondita e comune da parte di tutti i soggetti coinvolti.

Metal Matrix Composites in Industry Alexander Evans, Christopher San Marchi, Andreas Mortensen, 2013-11-27 Metal matrix composites are making tangible inroads into the real world of engineering. They are used in engineering components such as brake rotors, aircraft parts, combustion engines, and heat sinks for electronic systems. Yet, outside a relatively limited circle of specialists, these materials are mostly unknown. Designers do not as a rule think of using these materials, in part because access to information is difficult as these materials have not really entered engineering handbooks. Metal Matrix Composites in Industry is thus useful to engineers who wish to gain introductory knowledge of these materials and who want to know where to find them. Additionally, it provides researchers and academics with a survey of current industrial activity in this area of technology.

Flap Internacional Ed. 585 - O Mundo dos Flight Checks Parte I Grupo Editorial Spagat, 2021-08-25 Nesta edição de agosto, trazemos como primeira matéria “O Mundo dos Flight Checks”. Trata-se de uma interessante compilação de voos ao longo do tempo, com 13 companhias aéreas avaliadas, sendo publicada aqui a primeira parte. Todos os trajetos foram feitos antes da pandemia e alguns dos serviços mostrados já não estão mais disponíveis, o que não tira a oportunidade de conhecer mais de perto o que cada companhia aérea oferecia. A segunda matéria, assinada por Daniel Cagnacci, mostra bem de perto como anda o segmento de asas rotativas no Brasil em tempos de crise. Uma síntese com os principais acontecimentos dos anos de 2020 e 2021 mostra como fabricantes, fornecedores de peças, operadores e helicentros estão enfrentando a crise. Claros sinais de recuperação já surgem no horizonte, projetando um 2022 de franca recuperação. O restante das páginas traz uma variedade de notícias dos mais variados segmentos da aviação mundial, com textos bastante informativos e fotos inéditas.
