Confessions of a Phantom Pilot Tug Wilson,2021-12-02 'The Confessions of a Phantom Pilot' is the true story of a young RAF pilot who gets his dream to fly the old dirty workhorse fighter of the Cold War. From the first flight where he thought the jet was trying to kill him, through to his final trip of leading eight aeroplanes on a front line fighter squadron, you will relive his thoughts, feelings and anxieties as he stumbles his way through each flight relying on a bit of skill and a lot of blind luck. In essence, it is a love letter to the Phantom from a star-struck boy who felt like he was way out of his depth at the beginning of their affair. You will share stories of the outrageous drinking culture that was a major part of Cold War front-line operations, and marvel at how he didn't do himself some serious damage either in or out of the cockpit. This is how it feels to be a front-line fighter pilot – the triumphs and the disasters are all laid out here in a completely open and honest way as the author looks back with a certain sense of nostalgia and mild embarrassment. What a blast though!

Confessions of a Flying Instructor Tug Wilson,2023-04-16 After surviving three years flying the RAF's greatest and scariest fighter (the mighty Phantom), Tug Wilson tried his hand at teaching some of the flying skills he probably should have known when he was on the Cold War front-line. Despite being slightly more mature and having the responsibility of teaching, and looking after, trainee pilots and navigators in the cockpit of a Hawk fast-jet trainer, Wilson manages to almost kill himself (again) and at least one of his students. This book build on the insecurities, amazement, and pure unadulterated joy that the author felt while flying aircraft in his beloved RAF. It is an open and honest account of his professional and personal life, much in the style of his first book—'Confessions of a Phantom Pilot' (which has been described as a "Cracking good read" by Tug, his family, and all his mates from the Phantom that were happy to be mentioned in it. Ever wondered what a fast-jet pilot goes through while learning the intricacies of air-defence and low-level flying? Or even how to cheat in air combat? 'Confessions of a Flying Instructor' is a personal examination of an often overlooked aspect of the RAF.

Aerotowing Gliders John Marriott,2011-06-01 This is an extract from the main text) This book on aerotowing gliders was written because there is little reference material published about the subject worldwide. So because of the lack of published information, I thought it important to gather the wealth of knowledge that is out there on the subject, collate it and present it to our community in the interests of safety and efficiency The book is intended as a

comprehensive guide to glider towing operations, with that all important emphasis on safety. The intent is to provide all the relevant information in one straightforward, easy to read book. The notes are intended to be very generic and non-country specific. Even though local procedures differ, hopefully the information should be useful to any glider tug pilot, anywhere in the world. Each gliding organisation has its operating environment and problems, therefore should adapt, further or improve these suggestions to suit their own needs. It is fundamental that every tug pilot be a person who is both trustworthy and highly reliable as it is a flying task with huge responsibility placed on the pilot. Aerotowing is expensive, can be noisy and has its own special hazards. These factors have a bearing on the very existence of gliding and it is therefore essential that glider aerotowing be carried out safely, efficiently and thoughtfully, paying particular regard to our neighbours. Your particular aerotowing should of course be carried out in accordance with national laws, regulations, procedures and in conjunction with your organisations flying rules. As the pilots in command of an aircraft you are ultimately responsible for the safe conduct of the flight and the actions that you choose to take. The glider pilots requirements should of course be accommodated as far as possible. Glider aerotowing should be good for your general flying skills. As a flying and gliding instructor for over twenty five years, I have noticed that most glider tug pilots are often also glider pilots and have above average handling and situational awareness skills. Flying tugs should of course also be quite good fun! It is hoped that this comprehensive book will meet the ground school requirements of any current or future glider towing ratings.
