A Soul Remembers Lea Kapiteli, 2019-11-18 Three lives. One soul. One last chance to right the wrongs. The sun-raised desert is the judge, jury, executioner, betrayer, liberator and home. The black city of Giria has survived for millennia protected from the elements and beasts outside, but the Oracles were hellbent on protecting their power on the inside. Von-wratha once served her leaders. Von-wratha once served their Twin Serpent gods. Until one day, she chose to protect a life from her masters. The cost was her home, but it was to be paid in blood. In the centre of the roaring seas once sat the white city of Atlantia. The golden age of humankind, the empire that spawned across the world and into the stars. A civilisation that took eons to build; a civilisation that took mere moments to end. Delta was to witness the last decades of the empire's life, yet she did not know it. No one, but a few did. In the land of psychics, her mundanity forced her to peer behind the curtains to reveal the impending doom, yet she did not recognise it until it was too late. An enchanted forest is razed by war, childhoods stripped after watching family murdered and survivors on the search for someone to blame. For decades the Nalashi and Noszareli tribes fought each other and its first casualty was the truth. Arrazanal of the Nalashi tribe despised the race that killed her father, until the loss of her sister forced her to work with someone from the other tribe. What she discovers threatens to destroy the war machine, along with both tribes.

Still Sick, Volume 1 Akashi, 2019-11-15 Makoto Shimizu is just an ordinary office worker, blending in seamlessly with her colleagues on the job... That is, until her coworker Akane Maekawa discovers her well-hidden secret: in her spare time, she draws and sells girls' love comics! Akane is the last person Makoto would think of as a nerd, but as the two grow closer, it starts to seem like Akane may have a secret of her own...

Still Sick, Volume 2 Akashi, 2020-01-17 After finding out that her coworker Akane used to be a manga creator, Makoto encourages her new friend to recapture that dream. As an amateur comic artist herself, Makoto looks up to Akane and tries to help her overcome the difficulties that made her give up that profession in the past. Although Akane is often her own worst critic, Makoto inspires her to try reshaping her attitude toward her art. But matters become more complicated when Makoto realizes that, somewhere along the way, what started out as a professional friendship over a common interest has developed into... a serious crush!

New Perspectives on the Japanese Occupation in Malaya and Singapore, 1941-1945 Yōji Akashi, Mako Yoshimura, 2008-12-01 Information on the Japanese Occupation of Malaya and Singapore is sparse, and Japanese-language materials are particularly difficult to find because the Japanese military systematically destroyed war-related documents when the war ended. The contributors to this volume participated in a Forum that spent four years locating surviving materials relating to the Occupation of Malaya. The group has three objectives: to collect primary sources, to interview Japanese military and civilian officials who took part in the military administration and people in Malaysia and Singapore who experienced the period, and to publish the results of the studies. Based on interviews with Japanese, Malaysians and Singaporeans who lived through the war years and materials gathered from archives and libraries in Britain, Malaysia, Singapore, USA, Australia, and India, the Forum has produced a number of Japanese-language publications. This book makes available some of their research findings in English. Topics covered include the Watanabe Military Administration, Japanese research activities in Malaya, Japan's Economic Policies, Malayan Communist Party Leaders and the Anti-Japanese Resistance, the Massacre of Chinese in Singapore, Railway Transportation during the Japanese Occupation Period, The Singapore internment Camp for Allied Civilian Women, and the Japanese Surrender. This volume is a revised version of Akashi Yoji, ed., *Nippon Senryōka no Eiryō Maraya/Shingaporu* (Tokyo: Iwanami Shoten Publishers, 2001). Book jacket.

Diagnostic Methods in Time Series Fumiya Akashi, Masanobu Taniguchi, Anna Clara Monti, Tomoyuki Amano, 2021-06-08 This book contains new aspects of model diagnostics in time series analysis, including variable selection problems and higher-order asymptotics of tests. This is the first book to cover systematic approaches and widely applicable results for nonstandard models

including infinite variance processes. The book begins by introducing a unified view of a portmanteau-type test based on a likelihood ratio test, useful to test general parametric hypotheses inherent in statistical models. The conditions for the limit distribution of portmanteau-type tests to be asymptotically pivotal are given under general settings, and very clear implications for the relationships between the parameter of interest and the nuisance parameter are elucidated in terms of Fisher-information matrices. A robust testing procedure against heavy-tailed time series models is also constructed in the context of variable selection problems. The setting is very reasonable in the context of financial data analysis and econometrics, and the result is applicable to causality tests of heavy-tailed time series models. In the last two sections, Bartlett-type adjustments for a class of test statistics are discussed when the parameter of interest is on the boundary of the parameter space. A nonlinear adjustment procedure is proposed for a broad range of test statistics including the likelihood ratio, Wald and score statistics.

Still Sick, Volume 3 Akashi,2020-12-14 The anticipated final volume of the whirlwind office romance is here! Akane and Makoto grow closer, as Makoto is finally able to realize her dream with someone who loves her and believes in her by her side. Are the two women finally able to confess their feelings to one another?

The World's Least Interesting Master Swordsman: Volume 6 Rokuro Akashi,2021-06-07 I've spent three thousand years preparing to kill you-- Fukei has plunged the Kingdom into darkness using storm clouds under his command. An Immortal who has spent millennia training to defeat Suiboku, Fukei commands the heavens and earth and is nigh unkillable due to his Immortal Arts. Even wielding the power of the Legendary Sword Ecksachs, Saiga can do little against this overwhelming force. As Fukei threatens to destroy the Arcana Kingdom, Suiboku returns to the mortal world after thousands of years to save his apprentice's students and to apologize to Fukei. Apprentices who trained as brothers now face off, marshaling centuries of skill and power in a tragic and bitter fight to the death.

Empirical Likelihood and Quantile Methods for Time Series Yan Liu,Fumiya Akashi,Masanobu Taniguchi,2018-12-05 This book integrates the fundamentals of asymptotic theory of statistical inference for time series under nonstandard settings, e.g., infinite variance processes, not only from the point of view of efficiency but also from that of robustness and optimality by minimizing prediction error. This is the first book to consider the generalized empirical likelihood applied to time series models in frequency domain and also the estimation motivated by minimizing quantile prediction error without assumption of true model. It provides the reader with a new horizon for understanding the prediction problem that occurs in time series modeling and a contemporary approach of hypothesis testing by the generalized empirical likelihood method. Nonparametric aspects of the methods proposed in this book also satisfactorily address economic and financial problems without imposing redundantly strong restrictions on the model, which has been true until now. Dealing with infinite variance processes makes analysis of economic and financial data more accurate under the existing results from the demonstrative research. The scope of applications, however, is expected to apply to much broader academic fields. The methods are also sufficiently flexible in that they represent an advanced and unified development of prediction form including multiple-point extrapolation, interpolation, and other incomplete past forecastings. Consequently, they lead readers to a good combination of efficient and robust estimate and test, and discriminate pivotal quantities contained in realistic time series models.

Engineered Cell Manipulation for Biomedical Application Misturu Akashi,Takami Akagi,Michiya Matsusaki,2014-10-16 This book is the first to summarize new technologies for engineered cell manipulation. The contents focus on control of cellular functions by nanomaterials and control of three-dimensional cell-cell interactions. Control of cellular functions is important for cell differentiation, maturation, and activation, which generally are controlled by the addition of soluble cytokines or growth factors into cell culture dishes. Target antigen molecules can be efficiently delivered to the cytosol of the dendritic cells using the nanoparticle technique described here, and

cellular functions such as dendritic cell maturation can be controlled easily and with precision. This book describes basic preparation of the nanoparticles, activation control of dendritic cells, immune function control, and in vivo application for various vaccination systems. The second type of control, that of cell-cell interaction, is important for tissue engineering in order to develop three-dimensional cellular constructs. To achieve in vitro engineering of three-dimensional human tissue constructs, cell-cell interaction must be controlled in three dimensions, but typical biological cell manipulation technique cannot accomplish this task. An engineered cell manipulation technique is necessary. In this book the authors describe the fabrication of nanofilms onto cell surfaces, development of three-dimensional cellular multilayers, and various applications of the cellular multilayers as three-dimensional human models. This important work will be highly informative for researchers and students in the fields of materials science, polymer science, biomaterials, medicinal science, nanotechnology, biotechnology, and biology.
