Discover unexpected ways to turn common materials into crafty contraptions that range from surprisingly simple to curiously complex. In vivid color photos, you'll be guided on how to create slingshot rockets, unique catapults, and even hydraulic-powered machines. Whether you build one or all 19 of these designs, you'll feel like an ingenious engineer when you're through. Best of all, you don't need to be an experienced tinkerer to make any of the projects! All you need are household tools and materials, such as paper clips, pencils, paint stirrers, and ice pop sticks. Grab your glue gun, pull out your pliers, track down your tape and paper clips, and get started on the challenging, fun, and rewarding journey toward becoming a rubber band engineer.

Start with duct tape basics that will aid in assembly: Learn cutting and tearing methods and taping techniques (yes, there's more to it than slapping it down). Discover how to make sturdy duct tape sheets that can be cut and shaped. Using easily accessible tools and supplies like a utility knife and heavy-duty cardboard boxes, try your hand at making a desk and desk chair. Grab some foam and make a backpack, or create a custom hammock. Build a geodesic dome, and go truly epic with a giant pyramid catapult. Every project includes step-by-step instructions and clear diagrams and photos. Don't miss Lance Akiyama's tips and suggestions for supplies, project variations, and material substitutions. Follow the solid construction techniques and you'll ensure that these DIY projects will become favorite classroom activities and family projects. Among the projects are: A lightweight bed frame and full-size dresser with working drawers Outdoor pieces like a hammock and garden swing A heavy-duty toolbox with pockets galore, and a stylish two-color messenger bag Ballistics, including a slingshot A kayak! These projects are real, they work, and are super fun. Roll up your sleeves and let the engineering begin!
