This illustrated chapter book features the cool Alola Pokémon from Nintendo's hit games for Nintendo DS, Pokémon Sun & Moon. Ash has learned a lot since he began attending Alola's Pokémon School. Now he can't wait to complete the next step of his journey. He's determined to win a Z-Ring and learn to do Z-Moves, special attacks that only Trainers who've passed the Island Challenge can use. That means Ash will need to go head-to-head with Hala, the kahuna of Melemele Island. But earning a Z-Ring isn't as simple as winning a Pokémon battle. First Ash has to prove his worth as a Trainer. Does he have what it takes to pass Hala's test? This illustrated chapter book is based on a thrilling three-part Pokémon Sun & Moon episode that can be seen on Netflix.

Persia Reframed Fereshteh Daftari, 2019 The modern and contemporary art of Iran has often been understood, and positioned by commercial institutions, as decorative or ethnic--hence the focus on calligraphy and veiled women. While at a scholarly level it has been characterised as a comment on the socio-political context of the country: repressed inside Iran and, among artists in diaspora, as a focus for a complex identity discourse. Viewing Iranian art as neither a commodity, nor an illustration of theory, Fereshteh Daftari approaches the modern art of Iran as a democratic space where pluralism--a range of different styles and ideas--can thrive. This art historical exploration offers new insights into Iranian art, from the late 19th century Qajar period, via the Saqqakhaneh movement of the 1960s and into the contemporary world. In the process the author comments on the concept of modernism in a non-Western environment. She takes both a specific and a panoramic view of Iranian art to expose new themes like the subversive appropriation of traditional art, whilst also tackling more perennial issues like gender. With experience as an international curator, Daftari analyses the way Iranian artists have been represented outside the country and discusses the different routes by which modern Iranian art has been introduced to a Western audience, explaining the process by which Iranian art has developed and how it navigates between the individual and the political.

Persian Without Rules Layla Faridani, 2023-12-05 About the Book Persian is spoken by more than 100 million people worldwide. However, its script and sounds can make it hard for foreigners to realize how easy Persian and its alphabet is to learn! This book cuts out all the pages and pages of rules and gets directly to practicing Persian. The Latin form will guide students with diacritics and the global system released in 2022. About the Author Persian

Without Rules is Layla Faridani's third book published. She is a student of languages and loves to study them without the rules, which she believes are a waste of time and paper. After all, when native students learn their mother tongue, they do not cover the rules. Instead, they get directly to practice and reading by playing games and solving puzzles. Faridani believes rules make learning another language harder to the point that someone may regret even having attempted to start. She hopes to make learning Persian easy and fun.
