Gilles Uzan, Jean-Luc Fournier, Monica Sabolo

Alpine Gilles Uzan, Jean-Luc Fournier, Monica Sabolo, 2018-03-06 In a graphic and artistic extension of the new model A110, this handsome volume celebrates the revival of the epic Alpine sports car. A veritable dialogue between the Alpine A110 sports car and the artists and writers who pay homage to it through photographs, art, and text, this book captures the model's sensual mechanics, masterful agility, and esprit de corps. The volume's exquisite binding features an exposed spine with blue stitching and a diagonal laser-cut window on the front cover. The guiding force behind Jean Rédélé's creation of the Alpine in 1955 was a love of the road and a passion for driving. Alpine's story is punctuated by competitions and the thrilling driving experience of this renowned car that was named after the sinuous roads of the Alps. After two decades of slumber, Alpine—fortified by its legendary backstory—was revived as the model A110 in the fall of 2017. Rooted in history but decidedly turned toward the future, the new Alpine embodies higher performance, is more compact and agile than ever, and deftly combines ultra-contemporary design with classic French elegance.

This book celebrates that important milestone and paints an exhaustively detailed picture of the people and personalities who have shaped this great sport. The Complete Book of the World Rally Champions provides a biographical account of the 65 men who have won at least one World Championship Rally since 1973. The biographies are compiled by the sport's leading writers and historians and complemented by stunning photography. The book includes a detailed and accurate statistical career record of each driver, plus highlights of all the significant cars.

This book brings to life the efforts, successes and failures of the engineers and drivers that worked with the cars, and explores the berlinettes' development and history in fascinating detail.

Inside the machine David Twohig, 2022-06-15 This book tells the story of the modern car industry from the inside. What is it really like to work for the carmakers – the industrial giants that influence the daily lives of millions? How are mass-production cars really designed, engineered, and manufactured? What does it take to engineer a successful vehicle? The story is told through the author's own journey around the globe – starting as a young graduate engineer working for Nissan in the UK, to working for Nissan in Japan and, finally, for Renault in France as Chief Engineer of its 'halo' sports-car, designed to relaunch the Alpine brand. It tells the behind-the-scenes story of three well-known vehicles, whose development teams were led by the author – the Nissan Qashqai, the Renault ZOE, and the Alpine A110 – revealing some of the fascinating stories of how these vehicles came into being. The book seeks to show the real work that goes on behind the glamour of the Motor Shows and the well-honed corporate press releases – work that is sometimes exciting, but often grindingly difficult.

365 Sports Cars You Must Drive John Lamm, Steve Sutcliffe, Larry Edsall, James Mann, Kris Palmer, 2020-10-27 365 Sports Cars You Must Drive puts you in the driver's seat of a century's worth of sports car legends (and a few rather less legendary), each presented with a fun and informative profile and fact-and-spec box. It's the ultimate gearhead's bucket list and poses the challenge: How many have you driven? Whoever coined the phrase getting there is half the fun must have owned a sports

car. And the wag who suggested that it's the journey not the destination? Probably driving a Lotus or MG at the time. From towering icons like Ferrari, Lamborghini, Porsche, and Corvette to everyman sportsters from Triumph, MG, Sunbeam, and Miata to oddballs like Crosley, Sabra, and DB, sports cars inspire passion and strong opinions as few other vehicles on the road can. In one beautiful book, long-time Road & Truck magazine chief photographer John Lamm, along with other top motoring contributors, gives the reader illustrated profiles of every sports car you've ever dreamed of driving! Now, imagine if you could drive a different sports car—any sports car—every single day for a year. Which would you choose?

The Art of the Classic Sports Car Stuart Codling, 2017-06-01 The Art of the Classic Sports Car offers a beautifully illustrated review of decades of high-performance cars from around the globe, all shot in the studio. Sports cars are the athletes of the automotive world. Always nimble and quick, often powerful, sports cars fly where other cars lumber, and dash where others plod. The definition of a sports car is somewhat fluid, still, most car fans feel that they know a sports car when they see one, and when asked to name a few will rattle off Jaguar, Corvette, Triumph, MG, Aston Martin, Ferrari, Lotus, Alfa-Romeo, BMW, and many others. Sports cars have offered road and track excitement for nearly 100 years. The original cars evolved for racing, but their appeal and popularity ensured that production versions were soon available for those whose sporting intents never left the boulevard or winding back road. The Art of the Classic Sports Car offers enthusiasts a beautifully illustrated review of several decades of high-performance cars, featuring cars from around the globe all shot in the studio to ensure a handsome book. Each featured car includes a profile discussing the car's place in sports car history along with technical and performance specs as well as a smattering of historical images and period ads.

Powered by Porsche - the alternative race cars Roy P Smith, 2021-10-13 Powered by Porsche – the Alternative Race Cars is a thorough and fascinating account of the racing cars that were powered by Porsche engines, but where the chassis and development of the car was carried out by others. The Porsche company in Zuffenhausen, Germany, can probably be said to be the most successful marque ever for victories in the motor racing scene. Likewise many firsts in innovation have come with the name Porsche attached. Many major racing car producers such as Elva, Lotus, Lola, or March, as well as many smaller independents, at some time featured a Porsche engine in their chassis. Demand for the services and supply of cars, chassis, and parts from Porsche, often outstripped their ability to deliver during the late '70s to early '80s. With many new projects in the rapidly expanding Porsche organisation, race car projects had to be prioritised. This would lead to the creation of the replicas, as opposed to the factory-built works race cars, and even Porsche was building 'replica' 935s to supply to clients, continuing into the 962 era. In turn, a whole new, highly specialised, high quality industry grew up to meet the demand for Porsche-powered racers. In this fascinating book we meet the racing cars, the teams and the people who turned to Porsche to utilise the power from, perhaps, the greatest of all engine makers. This is thought to be first book on the subject, covering the entire history of Porsche engines, detailed engine specifications, non-Porsche chassis, and race details, as well as team histories with anecdotes from drivers. It is illustrated with many previously unpublished photos, and provides fascinating reading for all racing fans, as well as Porsche enthusiasts.

Porsche - The Racing 914s Roy Smith, 2016-10-01 Detailed study of a remarkable little car that, when it appeared in 1969, was considered a mish-mash of ideas, and not a 'proper' Porsche. It's also the story of the 'little' guys ... the privateers and dealer teams who did most of the development that turned the 914 into great little racer.

Amedee Gordini Roy Smith, 2013-04-05 This is a story of excitement, laughs, astonishment and anger - a story of the determination of a man with a dream and a passion for motor racing in the big leagues. It is the first time that the history of the always under-financed Gordini racing team has been documented in English, and the first complete story of Gordini himself in any language. This volume will appeal to new enthusiasts and old hands of Formula 1 and sports prototype racing, especially those who have owned a Gordini-badged high-performance Renault road car. It charts Gordini's early life and beginnings in motorsport, up to 1969 when Renault took over the Gordini company, keeping his name on all the racing engines until 1986, before finally resurrecting it for a performance version of the Renault Twingo and Clio in 2009. The book is packed with evocative period images from important collections, supplementary transcripts in English from many contemporary interviews, plus recollections from former employees remembering their time working with Gordini, and an exhaustive set of statistics. All the way it's a roller coaster of joy, despair, humour, and stunning images. The racing legend of 'Le Sorcier' lives on.

Fast Ladies Jean François Bouzanquet, 2009-07 It took a great deal of determination on the part of women to sweep aside male resistance from the inner circles of the motoring world. A veritable saga with a wealth of illustrations spanning almost a century of motor racing. Over forty unique portraits of daring, brave women who took part in speed records events, rallies and Grand Prix races.

Carbolics James May, 2022-11-03 Why does a man with a Ferrari and a Porsche drive a Fiat Panda? Is going fast really necessary? Is it your fault if you get run over? Why will electric cars really save the planet (possibly)? In Carbolics the UK's favourite petrol head (after Clarkson and Hammond) James May answers these questions and more. Across 80 essays, James gives his quirky, entertaining take on cars, motorbikes, trucks - and explains why the bicycle might just be the best invention of all. Written with James's characteristic wit and humour, Carbolics is the perfect Christmas gift for petrolheads.
