World Investment Report 2019 United Nations Conference on Trade and Development, 2019-08-09 The 2019 edition of the World Investment Report focuses on special economic zones (SEZs) which are widely used across most developing and many developed economies. Although the performance of many zones remains below expectations, the rate of establishment of new zones is accelerating as governments increasingly compete for internationally mobile industrial activity. Policymakers face not only the traditional challenges to making SEZs succeed, including the need for strategic focus, sound governance models, and effective investment promotion tools, but also new challenges brought about by the sustainable development imperative, the new industrial revolution, and changing patterns of international production. The Report explores the place of SEZs in today's global investment landscape and provides guidance for policymakers on how to make SEZs work for sustainable development. It presents international investment trends and prospects at global, regional and national levels, as well as the evolution of international production and global value chains. It analyses the latest developments in new policy measures for investment promotion, facilitation and regulation around the world, as well as updates on investment treaties, their reform and investment dispute settlement cases.

Saving Human Lives Robert E. Allinson, 2006-05-20 This is a pioneering work. Recent disasters such as the tsunami disaster continue to demonstrate Professor Allinson's thesis that valuing human lives is the core of ethical management. His unique comparison of the ideas of the power of Fate and High Technology, his penetrating analysis of the very concept of an accident, demonstrate how concepts rule our lives. His wide-ranging investigation of court cases and government documents from the seventeenth through the twentieth centuries, and from places as diverse as the USA, UK and New Zealand provide ample supporting evidence for the universality and the power of explanation of his thesis. Saving Human Lives will have an impact beyond measurement on the field of management ethics.

Giants Jean van Hamme, 2013-05-02 In their island fortress, Kriss and Shaigan still reign over their band of pirates and raiders. But Shaigan is beginning to have doubts, and when a prisoner who knew him calls him Thorgal, the child of the stars begs the gods of Asgard to give him back his name and his destiny. In return, the gods require that Thorgal travel to the kingdom of giants and steal from their ruler... and then Thorgal will be Thorgal again. He's a child of the stars, beloved of the gods and touched by destiny, but also a reluctant hero, a simple man with simple dreams. Thorgal: an extraordinary Viking saga with strong elements of science fiction, by one of the master scriptwriters of Franco-Belgian comics. Already 13 volumes available from Cinebook!

Fair and Equitable Treatment United Nations Conference on Trade and Development, 2012 In recent years, the concept of fair and equitable treatment has assumed prominence in investment relations between States. While the earliest proposals that made reference to this standard of treatment for investment are contained in various multilateral efforts in the period immediately following World War II, the bulk of the State practice incorporating the standard is to be found in bilateral investment treaties which have become a central feature in international investment relations. In essence, the fair and equitable standard provides a yardstick by which relations between foreign direct investors and Governments of capital-importing countries may be assessed. It also acts as a signal from capital-importing countries, for it indicates, at the very least, a State's willingness to accommodate foreign capital on terms that take into account the interests of the investor in fairness and equity.-
