Evaluation of FAO's role and work on antimicrobial resistance (AMR) Food and Agriculture Organization of the United Nations, 2021-03-05 Antimicrobial resistance (AMR) is the ability of microorganisms to fight antimicrobial compounds, reducing the efficacy of treating diseases in humans, animals, and plants. AMR risk is outpacing human population growth, owing to misuse of antimicrobials in large quantities in food systems, and is a serious threat to food security and sustainable development. FAO, with the World Health Organization (WHO), the World Organization for Animal Health (OIE), and the United Nations Environment Programme (UNEP), is supporting countries in developing and implementing their One Health National Action Plans on AMR. The eventual aim is to ensure sustainable use of antimicrobials to minimize AMR risks, in alignment with the Global Action Plan on AMR. The scope of the evaluation covers FAO's entire work on AMR up to early 2020 and its role in the global AMR architecture. It examines FAO's organizational and institutional set-up for AMR work. FAO has a strong mandate to work on AMR, implementing activities in 45 countries and providing far-reaching support on AMR National Action Plans (NAPs). FAO's technical expertise is a key comparative advantage in its work on AMR. It is underpinned by the strong scientific grounding of FAO's work, engendered in its AMR working groups and supported by its collaboration with research centers, universities, and the Tripartite organizations. Nevertheless, the work is relatively recent and, given the long impact pathways, it has had limited results. A comprehensive strategic and programmatic approach would increase the likelihood of achieving results in combating AMR. FAO should prioritize its work in a long-term strategy on AMR that recognizes the seriousness of the threat and is fully integrated into the Organization's Strategic Framework. The strategy should set out FAO's long-term role in combating AMR and that of its divisions and offices, as well as its approach at the country and regional level. FAO should consolidate its work on AMR through a strong programmatic approach with a central coordination and management structure that links with the Regional Offices and is supported by dedicated core funding.

Monitoring global progress on antimicrobial resistance: tripartite AMR country self-assessment survey (TrACSS) 2019–2020 World Health Organization, Food and Agriculture Organization of the United Nations , World Organisation for Animal Health, 2021-03-22 The global analysis report of the annual Tripartite AMR country self-assessment survey (TrACSS) is a component of a broader approach for monitoring and evaluating the global action plan on antimicrobial resistance (GAP-AMR). This report summarizes global responses from the fourth round of the TrACSS, held from November 2019 to July 2020. Due to the COVID-19 pandemic, the response rates for the 2019–2020 TrACSS around were 11.8% lower than the previous year. A total of 136 (70.1%) countries out of 194 WHO Member States responded to the 2019–2020 TrACSS, compared to 159 out of 194 (81.9%) in 2018–2019.

'Abd al-Rahman b. 'Amr al-Awza'i Steven C. Judd,2019-11-07 'Abd al-Rahman b. 'Amr al-Awza'i (c.707–774) was Umayyad Syria's most influential jurist, part of a generation of scholars who began establishing the first formal structures for the preservation and dissemination of religious knowledge. Following the Abbasid revolution, they provided a point of stability in otherwise unstable times. Despite his close ties to the old regime, al-Awza'i continued to participate in legal and theological matters in the Abbasid era. Although his immediate impact would prove short-lived, his influence on aspects of Islamic law, particularly the laws of war, endures to this day.

Advanced Muscle Reconditioning Brian Bronk,Brian Bronk DC,2009-09 Simple. Complex. Sublime. AMR is a game-changer. A better way to treat muscles that re-writes our fundamental understanding and treatment of back and body pain. The world of spine medicine is overflowing with experts, gurus and opinions. Why? Because everything works some times. But what do you do when nothing works? When surgery is thought to be the only remaining option? This is the basis of AMR - fixing when all else has failed. It's not magic, rather technique and hard work. Results are earned, and in the end we get the holy grail - what doctors have been looking for in examination and tests like discography, the patient exclaiming, That's it! That's my problem. This is a watershed moment in spine medicine. The source of pain so often attributed to joints and discs is actually coming from your muscles, we just haven't been treating them correctly. Consider your muscles a patch of grass. You can lean on it, do log rolls on it, ice it, heat it, cut it, stretch it, pet it, talk to it, shine a white light on it - can we all agree they have a different effect than if we simply took a leaf rake to it? Thus many therapies claim to treat your muscles but they do not have the same effect. They may have the same intention, but they do not have the same effect, and this is why they don't work on tough cases. AMR will forever alter your concept of massage and deep muscle therapy. The more you've been around and tried everything else, the more you can appreciate AMR. This guide is intended for a wide audience, you need no prior experience, or background in anatomy. Only a desire to learn and do the work. This book is empowering. Principles to guide you in the various situations you will encounter, you have all the tools necessary to fix the tough cases that currently confound medical science. If you are going to do any soft tissue work at all, this is how you want to do it - it will amaze you.

Cleft Capitalism Amr Adly,2020-06-09 Egypt has undergone significant economic liberalization under the auspices of the International Monetary Fund, the World Bank, USAID, and the European Commission. Yet after more than four decades of economic reform, the Egyptian economy still fails to meet popular expectations for inclusive growth, better standards of living, and high-quality employment. While many analysts point to cronyism and corruption, Amr Adly finds the root causes of this stagnation in the underlying social and political conditions of economic development. Cleft Capitalism offers a new explanation for why market-based development can fail to meet expectations: small businesses in Egypt are not growing into medium and larger businesses. The practical outcome of this missing middle syndrome is the continuous erosion of the economic and social privileges once enjoyed by the middle classes and unionized labor, without creating enough winners from market making. This in turn set the stage for alienation, discontent, and, finally, revolt. With this book, Adly uncovers both an institutional explanation for Egypt's failed market making, and sheds light on the key factors of arrested economic development across the Global South.

Islamic Fundamentalism in the West Bank and Gaza Ziad Abu-Amr,1994-03-22 As the Palestinian Liberation Organization engages in negotiations with Israel toward an interim period of limited Palestinian self-rule, this timely book provides an insider's view of how the growing hold of Islamic fundamentalism in the West Bank and Gaza challenges the peace process. Working from interviews with leaders of the movement and from primary documents, Ziad Abu-Amr traces the origin and evolution of the fundamentalist organizations Muslim Brotherhood (Hamas) and Islamic Jihad and analyzes their ideologies, their political programs, their sources of support, and their impact on Palestinian society. With a solid grasp of the dynamics of these movements, Abu-Amr charts the struggle between the fundamentalists and the PLO to define the identity of Palestinian society, its direction, and its leadership.

The book also explores the use of omics approaches to gain insights into antibacterial resistance, and includes chapters on the potential benefits of a 'One Health approach' describing the environmental and zoonotic sources of resistant genes and their effects on the global resistance pool.
