NGÔ TÔN LONG

Soviet-Russian AWACS Aircraft Yefim Gordon, Dmitriy Komissarov, 2010 The need to ensure effective protection of the Soviet airspace in areas lacking adequate cover by ground radars led the nation's aircraft designers to start working on airborne early warning systems. The Tupolev OKB was the first among the nation's aircraft design bureaus to create an 'eye in the sky', evolving the Tu-126 AEW aircraft from the Tu-114 long-haul turboprop airliner. The aircraft entered service in 1961, filling an important role with the Soviet Air Force until replaced in the early 1980s by the Ilyushin/ Beriyev A-50 AWACS based on the IL-76MD transport. In addition to these two types, the book describes the highly unorthodox Antonov An-71 with its tail-mounted rotodome (intended for operations from a large aircraft carrier which eventually never materialized) and the Kamov Ka-31 shipboard AEW helicopter. Due mention is also made of projects that never got off the drawing board the Tu-156, IL-150 and Yakovlev Yak-44.

Advanced Calculus John Srdjan Petrovic, 2013-11-01 Suitable for a one- or two-semester course, *Advanced Calculus: Theory and Practice* expands on the material covered in elementary calculus and presents this material in a rigorous manner. The text improves students' problem-solving and proof-writing skills, familiarizes them with the historical development of calculus concepts, and helps them understand the connections among different topics. The book takes a motivating approach that makes ideas less abstract to students. It explains how various topics in calculus may seem unrelated but in reality have common roots. Emphasizing historical perspectives, the text gives students a glimpse into the development of calculus and its ideas from the age of Newton and Leibniz to the twentieth century. Nearly 300 examples lead to important theorems as well as help students develop the necessary skills to closely examine the theorems. Proofs are also presented in an accessible way to students. By strengthening skills gained through elementary calculus, this textbook leads students toward mastering calculus techniques. It will help them succeed in their future mathematical or engineering studies.

TUY?N T?P M?T ??I NGÔ TÔN LONG, 2014 About the Book: The third millennium of the Christian era came with wars, one against infidels and another on terrorism, which were more than enough for a miserable Vietnamese, Ngô Tôn-Long—former lecturer on pedagogy and philosophy at Dalat University, 1968-1975, born in the beginning of the Second World War, grown up during the French revived colonial war, and terminated at the end of the American anticommunist war. Born again neither by might nor by power and having lived his faith for thirty years now, he was moved to study scriptures ancient and not so ancient and has been enabled to have his studies printed (on demand)—a dozen or so of the titles

are dedicated to the uprooted, displaced, and dispersed people like him as well as peoples like his-yet not so appropriately published that most of his old acquaintances scattered to North America actually know only of his death forty years ago. Being no native speaker of English, he had never thought of writing anything whatsoever in this language till the day he was planted in the capital Adelaide of South Australia. Neither religions nor theology had been of his studies; instead, it was mathematics and physics, pedagogy and philosophy. Better read no books than believe only one, he used to seriously study every of all the books that happened to fall into his hands or to run on to himself-the written whatsoever and the living whomsoever. Years ago, he was kept on an island of refuge in a time just enough for him to study the accusation bold and public Christians and Jews are infidels; People of the Book, they have distorted their Scripture! Twenty years of self-incarceration inside Adelaide assured him of his in-depth studies on the books of each people-the Holy 22 or 24 (scriptures) and the Holy 46 or 39 (of a dozen bibles) plus dozens of not-so-holy books. Then he was brought on the eagles' wings-from a southeastern island of the old world-across the ocean Pacific and crossing both the International Time Line and the Equator at about a same night time (so that he could see nothing down there, Pacific or not) to some northwestern lands of the new world (of names like Angels and Real-Mount). There, in the spirit of Yeh-Vah, he was set down amidst very many bones that were indeed very dry, as they themselves acknowledged it, saying, Our bones are dry, our hope is lost, and we are cut off. They were actually eating and drinking and enjoying their death on the day of their independence from Yeh-Vah while he was standing on level 102 of the Empire State Building with a Holy Scripture . . . comparable to the Bible . . . the Most Correct . . . containing the Fullness of the Everlasting Gospel.

The Orbital Perspective Astronaut Ron Garan,2015-02-02 For astronaut Ron Garan, living on the International Space Station was a powerful, transformative experience—one that he believes holds the key to solving our problems here on Earth. On space walks and through windows, Garan was struck by the stunning beauty of the Earth from space but sobered by knowing how much needed to be done to help this troubled planet. And yet on the International Space Station, Garan, a former fighter pilot, was working work side by side with Russians, who only a few years before were “the enemy.” If fifteen nationalities could collaborate on one of the most ambitious, technologically complicated undertakings in history, surely we can apply that kind of cooperation and innovation toward creating a better world. That spirit is what Garan calls the “orbital perspective.” Garan vividly conveys what it was like learning to work with a diverse group of people in an environment only a handful of human beings have ever known. But more importantly, he describes how he and others are working to apply the orbital perspective here at home, embracing new partnerships and processes to promote peace and combat hunger, thirst, poverty, and environmental destruction. This book is a call to action for each of us to care for the most important space station of all: planet Earth. You don't need to be an astronaut to have the orbital perspective. Garan's message of elevated empathy is an inspiration to all who seek a better world.
