N Noddings

Flight to Freedom Ana Veciana-Suarez, 2002 First Person Fiction is dedicated to the immigrant experience in modern America. *Flight to Freedom* is closely based on Suarez's own story of leaving Cuba during the Freedom Flights of the 1960s. Yara Garcia and her family live a middle-class life in Havana, Cuba. But in 1967, as Communist ruler Fidel Castro tightens his hold on Cuba, the Garcias, who do not share the political beliefs of the Communist Party, are forced to flee to Miami, Florida. There, Yara encounters a strange land with foreign customs. She knows very little English, and she finds that the other students in her new school have much more freedom than she and her sisters. Tension develops between her parents, as Mami grows more independent and Papi joins a militant anti-Castro organization.

A New Approach for Disruption Management in Airline Operations Control
António J. M. Castro, Ana Paula Rocha, Eugénio Oliveira, 2014-06-19 Most of the research efforts dealing with airline scheduling have been done on off-line plan optimization. However, nowadays, with the increasingly complex and huge traffic at airports, the real challenge is how to react to unexpected events that may cause plan-disruptions, leading to flight delays. Moreover these disruptive events usually affect at least three different dimensions of the situation: the aircraft assigned to the flight, the crew assignment and often forgotten, the passengers' journey and satisfaction. This book includes answers to this challenge and proposes the use of the Multi-agent System paradigm to rapidly compose a multi-faceted solution to the disruptive event taking into consideration possible preferences of those three key aspects of the problem. Negotiation protocols taking place between agents that are experts in solving the different problem dimensions, combination of different utility functions and not less important, the inclusion of the human in the automatic decision-making loop make MASDIMA, the system described in this book, well suited for real-life plan-disruption management applications.

Objective Seed Science and Technology K. Vanangamudi, S. Kavitha, K. Raja, 2017-01-01 This book is based on the ICAR syllabus of Seed Science and Technology. It comprises of two major parts: 1. Seed Science and Technology and 2. Advances in Seed Science and Technology. The part 1 consists of eight units of Seed Science and Technology like seed biology, seed production, seed processing, seed quality control, seed storage, seed health, seed industry development and marketing and protection of plant varieties. The part 2 involves the advances in Seed Science and Technology on seed physiology and biochemistry. In this, the units such as seed development and maturation, seed dormancy and germination, and seed deterioration are included.

American Aviation , 1963
The Invention of Ana Mikkel Rosengaard, 2018-02-13 A New York Times Paperback Row Editor's Choice Combining the infectious narration of Nick Hornby's *Funny Girl*, the philosophical lyricism of Roberto Bolaño's *The Savage Detectives*, and the mesmerizing power of Anna North's *The Life and Death of Sophie Stark*, a breathtaking debut, brimming with youthful brio and irresistible humor, that chronicles a young man's friendship with a most peculiar artist. On a rooftop in Brooklyn on a spring night, a young intern and would-be writer, newly arrived from Copenhagen, meets the intriguing Ana

Ivan. Clever and funny, with an air of mystery and melancholia, Ana is a performance artist, a mathematician, and a self-proclaimed time traveler. She is also bad luck, she confesses; she is from a cursed Romanian lineage. Before long, the intern finds himself seduced by Ana's enthralling stories—of her unlucky countrymen; of her parents' romance during the worst years of Nicolae Ceaucescu's dictatorship; of a Daylight Savings switchover gone horribly wrong. Ana also introduces him to her latest artistic endeavor. Following the astronomical rather than the Gregorian calendar, she is trying to alter her sense of time—an experiment that will lead her to live in complete darkness for one month. Descending into the blackness with Ana, the intern slowly loses touch with his own existence, entangling himself in the lives of Ana, her starry-eyed mother Maria, and her raging math-prodigy father Ciprian. Peeling back the layers of her past, he eventually discovers the perverse tragedy that has haunted Ana's family for decades and shaped her journey from the streets of Bucharest to the Atlas Mountains of Morocco and finally to New York City. The Invention of Ana blurs the lines between narrative and memory, perception and reality, identity and authenticity. In his stunning debut novel, Mikkel Rosengaard illuminates the profound power of stories to alter the world around us—and the lives of the ones we love.

Flight ,1960

The Business of Aspiration Ana Andjelic,2020-10-26 The Business of Aspiration is about how consumers' shifting status symbols affect business and brand strategy. These changing status symbols, like taste, aesthetic innovation, curation or environmentalism create the modern aspirational economy. In the traditional economy, consumers signaled their status through collecting commodities, Instagram followers, airline miles, and busy back-to-back schedules. By contrast, in the aspirational economy, consumers increasingly convey status through collecting knowledge, taste, micro-communities, and influence. This new capital changes the way businesses and entire markets operate, and yet the modern aspirational economy is still an under-explored area in business and culture. The Business of Aspiration changes that. In this book, marketers will find examples, analyses and tools on how brands can successfully grow in the modern aspirational economy. The Business of Aspiration answers questions like, what is good for my brand long-term?, how is this business decision going to impact our culture? or what are the main objectives of our growth? Marketers will learn to shift their brand narrative and competitive strategy, to create and distribute new brand symbols, and to ensure that their brand's products and services create both monetary and social value.

Case Study Japan Airlines Svenja Stellmann,2010-12-07 Research Paper (undergraduate) from the year 2010 in the subject Business economics - Business Management, Corporate Governance, grade: 1,0, Northumbria University, course: Strategic Management and Leadership, language: English, abstract: Japan Airlines Corporation (JAL) is the leading full-service airline in Asia operating in the domestic and international passenger air-transport industry. However, in 2009 JAL's financial situation is alarming. 2009 was completed by a ¥51bn operating loss, representing a decrease of

¥140bn from previous year. In comparison, JAL's major competitor All Nippon Airways manages to stay in the black. This means JAL's competitive position is clearly in danger. Even worse - if JAL does not find a new strategic option immediately they are in danger of going bankrupt soon. This paper intends to find such a strategic option to guarantee future success of the airline. A thorough strategic analysis including an internal and external analysis is used to find out the key strategic issues. Afterwards three possible strategic options are discussed. The most promising option is put forward and its implementation issues are thoroughly discussed.

History of Air Training Command, 1943-1993 ,1993

FIRE WEATHER: Agriculture Handbook 360 U.S. Department of Agriculture □ Forest Service,2019-07-03 Weather is never static. It is always dynamic. Its interpretation is an art. The environment is in control in wildland firefighting. Free-burning fires are literally nourished by weather elements, atmospheric components, and atmospheric motion. Outguessing Mother Nature in order to win control is an extremely difficult task. We need to soothe her with understanding. We have attempted to present information in such a way that your daily and seasonal awareness of fire weather can begin with reliable basic knowledge. We have kept the use of technical terms to a minimum, but where it was necessary for clear and accurate presentation, we have introduced and defined the proper terms. Growing awareness of fire weather, when combined with related experience on fires, can develop into increasingly intuitive, rapid, and accurate applications. Toward this end, we have preceded each chapter with a paragraph or two on important points to look for in relating weather factors to fire control planning and action.

Asiaweek ,1987-09

Smile, Particularly in Bad Weather Prudence Black,2017 Air hostesses took to the skies in the 1930s, proud and excited to have the most glamorous job in the world, barely looking over their shoulders as they boarded aircraft. Air travel had created a new type of modern workplace - this was a job like no other - filled with adventure, shiny new technology and work that was thrilling, demanding and exhausting. Young women flocked in droves to be measured, weighed and squeezed into snappy uniforms. Smile, Particularly in Bad Weather tells a story about the development of this pioneering profession. It describes the shift from the 1930s, when the girl-next-door took to the air with a great degree of bravado, through to the 1960s and the 'coffee, tea or me?' stereotype where airlines sexualised the air hostess as a point of marketing difference, then on to a crucial period where the air hostess fought back, no longer wanting to be stereotyped nor discriminated against in terms of fair working conditions. This job shaped working women to become something more, it tested their independence, it encouraged self-enhancement and sophistication and it took them to places they hadn't dreamt about.

The Forgotten Giant of Australian Aviation Peter Yule,2001 This book tells the full story of ANA, the forgotten giant of Australian aviation. Told through the eyes of ANA's pilots, hostesses, engineers and other staff, there are many humorous and dramatic stories, including the pioneering Bass Strait flights of the early 1930s, submarine hunting in DC-3s in 1939-40, a unique courier service to Manila in 1945, some extraordinary migrant charters in the late 1940s, and evacuation flights ahead of the advancing Communists in 1949. As well as describing ANA's key role in the development of safe and reliable

intercapital routes, this book covers the airline's lesser known services including the 'Gulf run', the aerial ambulance out of Cairns, and the Riverina milk runs. Filling a major gap in Australian aviation history, this book will make fascinating reading for aviation enthusiasts, students of history and the general reader alike.
