The Red Box Jason O'Neil, 2015-04-29 This novel primarily takes place on the paradise island of Ambergris Caye off the coast of Belize in Central America. The Flynn bothers, Matt and Murray, have invented an antigravity device, the Red Box, which makes a host platform weightless. Their first application of the technology is a seaplane called "Baldie" after the American bald eagle. The Red Box is replete with attempts by thieves to steal this toaster-size device and reverse-engineer it to bolster national economies. As a result,

many action scenes from Paris to Hong Kong remind the reader of famous car chase scenes. Armed with patents and preliminary approval to operate in American airspace, the Flynns conclude a production agreement with a global transportation company headquartered in Stuttgart, Germany. While the first five Baldies are assembled in Homestead, Florida, so they can fly over the Everglades National Park en route to Belize for flight testing, Baldie 6 rolls off the production line in Vance, Alabama. The Red Box can create a million high-technology jobs within the American transportation systems and even in the space industry. A president running for reelection understands its impact and uses the Baldie to his advantage in a national barnstorming tour and the "1M" campaign. Congress authorizes an annual \$1 billion tax-free licensing fee required by the Flynns in hopes of gaining large tax revenues. The final chapter has an American-German team selecting the next applications after the Baldie. The rationale for the selections challenges the reader to draw his or her own conclusions. By the end of the story, the reader realizes that a Red Box, should it ever become a reality, could put a miniature Baldie in every garage.

The Gravity of Anti-Gravity Tim Blagge, 2012-09-10 Let's imagine you are a brilliant young scientist, just ready to graduate from Cal-Tech and you invent and build a machine that will fundamentally change the course of human history. You know your anti-gravity device will revolutionize industry; and the ripple effect will touch every person on the planet. So how do you get

your device to market without inciting economic chaos? This is exactly the dilemma faced by Bill Burton, our brilliant, yet down-to-earth young scientist. How does he navigate the web of good and evil entities who will stop at nothing to own his device and the science behind it? With the help of an enigmatic beautiful scientist, Dr. Stella Morton and her Private Investigator brother, Rolf, new author Tim Blagge, weaves a spellbinding story rife with betrayals and mysteries that involve both criminal organizations and the highest levels of the world's governments. Strong characters, humor, pulse pounding excitement and an ending like no other will satisfy even the most discerning fan of contemporary conspiracy novels.

Excerpt from Book: The next morning while I was still sleeping, the phone rang. It was Jerry and he sounded frantic. Bill, have you seen the news? You won't believe it. I think you might have, have been responsible. He stuttered. Jerry what are you talking about? Just turn on the news, buddy boy. Jerry said excitedly. I'll call you back. I said I turned on the news. The story was on every station. This is KFAJ reporting, the TV barked. Scientists are stunned and puzzled at a phenomenon that they have never before observed. About 7:57 P.M. Pacific Time last night, the earth lost seven tenths of a second of time. Now before you go and celebrate that you are younger now than you would have been, it has caused some huge problems. All the satellite navigation systems in the world must be recalibrated. This has affected all forms of transportation. Planes have been grounded, and ships, trains,

subways - all other forms of transportation have been stopped awaiting the fix to our global positioning satellites. The militaries of the world have been put on high alert. No one seems to know if this is a natural or accidental occurrence or if some terrorist or rogue nation is sending some kind of message. Until the satellites are recalibrated, most of our offensive and defensive rocket capabilities are also off-line. Scientists and technicians say they will have the GPS satellite systems adjusted in the next hour. Then we should see the world return to normal in a day or two. And it's a miracle, but so far, there are no reports of death or injury. Let's go to Norma Woodard who is with Dr. Franz Belter of MIT. Dr. Belter, can you explain what just happened and how the world suddenly lost time? Ms. Woodard, my colleagues and I have met all night and so far, even though we have some hypotheses on this strange phenomenon, we don't have any definitive answers yet. First we thought that it may have been a giant solar flare, but nothing unusual emanated from there. Then we checked to see if the earth was hit with a large burst of particle radiation from outer space. We have detected nothing like that. Does that mean you don't know what happened at all? Woodard questioned. Ms. Woodard, we have come only to two conclusions. The first is that something has briefly interrupted space-time. The second is that we think it originated here on earth!

Cal and the Amazing Anti-Gravity Machine Richard Hamilton, 2006-04-18 With his talking dog, Frankie, as a constant companion, ten-year-old Cal Barraclough investigates his wacky neighbor's unusual experiments.

The Hunt for Zero Point Nick Cook, 2007-12-18 This riveting work of investigative reporting and history exposes classified government projects to build gravity-defying aircraft--which have an uncanny resemblance to flying saucers. The atomic bomb was not the only project to occupy government scientists in the 1940s. Antigravity technology, originally spearheaded by scientists in Nazi Germany, was another high priority, one that still may be in effect today. Now for the first time, a reporter with an unprecedented access to key sources in the intelligence and military communities reveals suppressed evidence that tells the story of a quest for a discovery that could prove as powerful as the A-bomb. The Hunt for Zero Point explores the scientific speculation that a zero point of gravity exists in the universe

and can be replicated here on Earth. The pressure to be the first nation to harness gravity is immense, as it means having the ability to build military planes of unlimited speed and range, along with the most deadly weaponry the world has ever seen. The ideal shape for a gravity-defying vehicle happens to be a perfect disk, making antigravity tests a possible explanation for the numerous UFO sightings of the past 50 years. Chronicling the origins of antigravity research in the world's most advanced research facility, which was operated by the Third Reich during World War II, *The Hunt for Zero Point* traces U.S. involvement in the project, beginning with the recruitment of former Nazi scientists after the war. Drawn from interviews with those involved with the research and who visited labs in Europe and the United States, *The Hunt for Zero Point* journeys to the heart of the twentieth century's most puzzling unexplained phenomena.

Danny Dunn and the Anti-Gravity Paint Jay Williams, Raymond

Abrashkin, 2014-11-15 Through a mishap in Professor Bulfinch's laboratory, Danny accidentally creates an anti-gravity paint. The natural use, of course, is for a spaceship -- the paint can replace rockets to get the ship into space. Unfortunately, the spaceship is launched prematurely after Danny and Joe follow Professor Bulfinch and Dr. Grimes on a tour of the ship. A mechanical failure dooms the four to a one-way trip out of the Solar System - unless they can repair the spaceship in time! This is the first of the 15-volume Danny Dunn series and features the original cover by acclaimed artist Ezra Jack Keats. Look for Danny Dunn on a Desert Island, the second volume of the series, coming soon from Wildside Press!

Force Fields Activated Deep Bora, 2012-01-04 You're correct professor. It is a fact. One, all our inter-planetary zero-gravity procedures are really, and totally collapsing. This procedure becomes markedly detectable few days before Pluto's second moon rise. Two, almost simultaneously we can determine the following via inter-planetary star fields computerized radio-light telescope-radars located upon earth stations:- That all our inter planetary magnetic laser fields - situated at almost every vital location in the solar system-- become reverted to disengaged status; by what external or internal force at work here.....we don't know. Therefore, direct implications signifying rational conclusions mean that all the habitable worlds in our ten planetary federation including earth, are open to deliberate attack. At least

that's what we, at the world council understand correctly. Our habited worlds possess negligible potential favoring inter-planetary back up or star-fields defense status. Here you will surely agree with the following; we require more than a dozen electronic maneuvers from earth space stations for commencing a total deactivating status-to negate the effects -- of all our earth based m-laser fields. Only thereafter, similar procedures operated from earth stations and the respective planets in question, can bring about deactivation of m-laser fields protecting the remaining planets, their moons, and satellites! *#Now, for an answer to the first query; At regular intersectional points all along our chartered and unchartered star-walks flight paths, we have stationed what are called anti-beacons. This term is suggestive of 'marker beacons' which extraterrestrials apply extensively, favoring deep space, hyper space, and unchartered space flights. Here, inter-galactic or inter-universal deep space flights may be classified as a more descriptive and an appropriate terminology. However, our anti-beacons have nothing to do with the extraterrestrials' marker beacons! Anti beacons are symmetrically and strategically installed upon all planets at every conceivably permitted angle. Now for that rational, practical explanation which you seek from me..... The ten planetary humanly habited space cities are suddenly faced with disastrous consequences. Join them as Earth Command - the highest organisation of humans governing this populated multi worlds' federation -- deliberates the latest furore of events. * Book 2 Travelling

Unconscious (A Suspended Animation Voyages Saga.) Travel with interplanetary voyagers while they explain suspended animation methods applied for hyper deep space voyages. Probe deeper and enrich your i.q. learning about time continuum matters and another dimensional world in an different dimensional universe! Science fiction.

Secrets of Antigravity Propulsion Paul A. LaViolette, 2008-07-10 A complete investigation of the development and suppression of antigravity and field propulsion technologies • Reveals advanced aerospace technologies capable of controlling gravity that could revolutionize air travel and energy production • Reviews numerous field propulsion devices that have thrust-to-power ratios thousands of times greater than a jet engine • Shows how NASA participates in a cover-up to block adoption of advanced technologies under military development In *Secrets of Antigravity Propulsion*, physicist Paul LaViolette reveals the secret history of antigravity experimentation--from Nikola Tesla and T. Townsend Brown to the B-2 Advanced Technology Bomber. He discloses the existence of advanced gravity-control technologies, under secret military development for decades, that could revolutionize air travel and energy production. Included among the secret projects he reveals is the research of Project Skyvault to develop an aerospace propulsion system using intense beams of microwave energy similar to that used by the strange crafts seen flying over Area 51. Using subquantum kinetics--the science behind antigravity technology--LaViolette reviews numerous field-propulsion devices

and technologies that have thrust-to-power ratios thousands of times greater than that of a jet engine and whose effects are not explained by conventional physics and relativity theory. He then presents controversial evidence about the NASA cover-up in adopting these advanced technologies. He also details ongoing Russian research to duplicate John Searl's self-propelled levitating disc and shows how the results of the Podkletnov gravity beam experiment could be harnessed to produce an interstellar spacecraft.

UF0s and Anti-Gravity Leonard G. Cramp, 1997-03 Long out-of-print, Cramp's 1966 classic book on flying saucer propulsion and suppressed technology is available again. Cramp wrote *Space, Gravity and the Flying Saucer* in 1954 and was Vice-President of the British UF0 Research Association (BUFORA). This is a highly technical look at the UF0 phenomenon by a trained scientist. Cramp first introduces the idea of anti-gravity and introduces us to the various theories of gravitation. He then examines the technology necessary to build a flying saucer and examines in great detail the technical aspects of such a craft. Cramp's book is a wealth of material and diagrams on flying saucers, anti-gravity, suppressed technology, G-fields and UF0s.

They All Told the Truth Richard P. Crandall, 2003 A vastly improved physics model authenticates the testimony of people who claimed deep involvement with anti-gravity projects. Includes instructions on how to build your own device.

Electrogravitics Systems Thomas Valone, 1993 Discovered in 1918 by a professor, electrogravitics has been put to the test decade after decade by

aviation industries and the military. It is an anomalous propulsion force from a high voltage capacitive charge, similar to an electrokinetic force. In the 1950s, T. Townsend Brown recommended a flying wing model to the Naval Research Lab for its implementation and years later, the B-2 bomber fulfilled this vision. Electrogravitics Systems includes historical documents, patents, and an exciting article by Dr. Paul LaViolette on how the B-2 uses such an energy-efficient, futuristic propulsion concept today.

UFOs and Anti-Gravity Leonard G. Cramp, 2016-04-15 Leonard G. Cramp's classic book on flying saucer propulsion and suppressed technology is back in print in this expanded edition. Now including material from his first book; *Space; Gravity & the Flying Saucer*; this book is a highly technical look at the UFO phenomena by a trained scientist. Cramp first introduces the idea of 'anti-gravity' and introduces us to the various theories of gravitation. He then examines the technology necessary to build a flying saucer and examines in great detail the technical aspects of such a craft. Cramp's book is a wealth of material and diagrams on flying saucers; anti-gravity; suppressed technology; G-fields and UFOs. Chapters include: Crossroads of Aerodynamic

Saucers; Limitations of Rocketry; Gravity and Magnetism; Gravitation and the Ether; The Present State of the Art; Gravitational Spaceships; The G-Field Theory; G-Field Lift Effects; Accompanying Phenomena; Analysis of Technically; Corroborative Evidence; Analysis of a Theory to Fit the Facts; The Bi-Field Theory; VTOL and Hovercraft; Analysis of UFO photos; tons more. The book that finally blew the lid on anti-gravity!

Astronaut Academy: Zero Gravity Dave Roman, 2021-04-06 Beautifully updated with fresh color, this new edition Astronaut Academy: Zero Gravity is the first volume of the middle-grade graphic novel series from Dave Roman. The most popular girl in school has it in for him. His best friend won't return his calls. And his new roommate is a complete jock who only cares about Fireball. Hakata just wants to make a fresh start. But how will he find time to study Anti-Gravity Gymnastics and Tactical Randomness when he's got a robot doppelganger on its way to kill him?

Anti-Gravity Propulsion Dynamics Paul Potter, 2016-03 This book introduces a brand new field of scientific research based upon analysis of artifacts retrieved from crashed and damaged UFOs that have come down in Russia and America. For the first time, it reveals the scientific principles behind UFO propulsion dynamics, and shows that these principles are known and recognized by today's physicists. Potter's analyses of these UFO mechanisms are

substantiated with references to a broad array of over 300 research papers published in scientific journals! Potter correlates many of the phenomena observed firsthand by close encounter witnesses and abductees and pinpoints the common themes reported, categorizing them according to known physical principles. He produces a comprehensive orchestration of energy dynamics used inside and around UFOs. His precise and lavish illustrations allow the reader to enter directly into the realm of the advanced technological engineer and to understand, quite straightforwardly, the aliens' methods of energy manipulation: their methods of electrical power generation; how they purposely designed their craft to employ the kinds of energy dynamics that are exclusive to space (discoverable in our astrophysics) in order that their craft may generate both attractive and repulsive gravitational forces; their control over the mass-density matrix surrounding their craft enabling them to alter their physical dimensions and even manufacture their own frame of reference in respect to time. Includes a 16-page color insert.
