Danny Dunn and the Anti-Gravity Paint Raymond Abrashkin, Jay Williams, 2015-12 Through a mishap in Professor Bulfinch's laboratory, Danny accidentally creates an anti-gravity paint. The natural use, of course, is for a spaceship -- the paint can replace rockets to get the ship into space. Unfortunately, the spaceship is launched prematurely after Danny and Joe follow Professor Bulfinch and Dr. Grimes on a tour of the ship. A mechanical failure dooms the four to a one-way trip out of the Solar System -- unless they can repair the spaceship in time!

UFOs and Anti-Gravity Leonard G. Cramp, 1997-03 Long out-of-print, Cramp's 1966 classic book on flying saucer propulsion and suppressed technology is available again. Cramp wrote *Space, Gravity and the Flying Saucer* in 1954 and was Vice-President of the British UFO Research Association (BUFORA). This is a highly technical look at the UFO phenomenon by a trained scientist. Cramp first introduces the idea of anti-gravity and introduces us to the various theories of gravitation. He then examines the technology necessary to build a flying saucer and examines in great detail the technical aspects of such a craft. Cramp's book is a wealth of material and diagrams on flying saucers, anti-gravity, suppressed technology, G-fields and UFOs.

The Anti-Gravity Files David Hatcher Childress, 2017-04-11 In the tradition of *The Anti-Gravity Handbook* and *the Time-Travel Handbook* comes this all-new compilation of material on anti-gravity, free energy, flying saucers and Tesla technology. With plenty of technical drawings and explanations, this suppressed technology will change the world in ways we can only dream of. Chapters on anti-gravity mercury gyros, the motionless electromagnet generator patent, the Tesla pyramid engine, anti-gravity patents, rare photos

of the machines in flight, and tons more. The book that finally blows the lid on suppressed technology and anti-gravity! Heavily illustrated.

Faster Than Light H. David Froning, Jr., 2019-11-12 An amazing book on faster than light flight! H. David Froning, a 30-year veteran engineer who worked on several designs for future space travel propulsion, gives us this exceptional compilation of his discoveries, struggles and experiences in the realm of faster than light space travel. Central to the concept of faster than light travel is that the vacuum of space itself (the spacetime metric) can be utilized in propulsion systems. "Engineering the vacuum," as this is called, involves discovering how space can be altered to provide energy/thrust for future spacecraft. Packed with diagrams, some of which show how, as a starship accelerates away from Earth, it disappears and reappears in only seconds. But during these seconds of disappearance, the ship, in effect, leaps high above space-time and over stupendous distances to reach speeds that are billions of times greater than light-speed. Lots of great material on quantum vacuum power, anti-gravity propulsion effects, the velocity of light in spacetime altered regions, effective mass in spacetime-altered regions, warp drives, and tons more!

Turbospace Jason Oneil, 2016-05-17 This novel is the third book in a trilogy about the impact an anti-gravity device on our civilization. In the first novel, *The Red Box*, the Flynn brothers, Matt and Murray, invent a toaster-size device that makes any host platform weightless. The first application is a seaplane call Baldie, named after the bald eagle, manufactured in partnership with Mercedes-Benz. In this Indiana Jones-type thriller, the Chinese attempt to steal the game-changing technology. But, in the end, the powerful Red Box rewards U.S. President Werner with his second term, a \$1

billion check to the Flynns, and the potential to create 1 million new high-tech jobs in America. The second novel, *Turbopod*, applies the Red Box to an innovative personal vehicle called a Turbopod, which, because it can operate as an automobile, aircraft, helicopter, and hydroplane boat, alters global transportation. Working again with Mercedes-Benz, the brothers perfect a weightless, all-electric, extremely safe flying machine. Foreign countries attempt to use this vehicle to collapse the U.S. currency, but are brought down in several tactical air battles. Turbospace is the application of the Red Box to the space industry. The Red Box overcomes the need for huge, expensive, and dangerous rockets to escape from the downward pull of gravity. The Red Box enables a cluster of Bald Eagle spacecraft to form a moon base for experiments to aid in the research of global warming. Again, in the Indiana Jones style, two astronauts disable a Chinese weapon clandestinely placed on the moon. This trilogy provides a glimpse into the future and how such an anti-gravity device could impact life on Earth and beyond.

Anti-Gravity and the Unified Field David Hatcher Childress, 1998-03 Explored here is how gravity, electricity, and magnetism manifest from a unified field around us; why artificial gravity is possible; secrets of UFO propulsion; free energy; Nikola Tesla and anti gravity airships of the 20s and 30s; flying saucers as superconducting whirls of plasma; anti-mass generators; vortex propulsion; government cover-ups; gravitational pulse drive; spacecraft; and more.

Starflake Aboard the Doomed Ships Nicola Cuti, 2017-08-04 The luxury passenger starship, Alpha Centuri, accidentally pulls a ship out of an antimatter universe and the ship, called the Beta Centuri, is linked to the Alpha. The two ships, a gravity ship and an anti-gravity ship, are held to

each other in perfect balance, but if either ship waivers even a hair from this unholy alliance then they will touch and annihilate each other. Hundreds of lives are at stake. Along comes Starflake in her Trog, taxi cyborg. She is a Cosmic Sprite, a pixyish creature who lives on radiation making it easy to bath her in either matter or antimatter radiation. As an ambassador between the two ships, she becomes the agent of hope, however, there are serious problems toward a peaceful solution in the guise of mutineers, madmen, doppelgangers, and hit men with the ability to see and travel through walls. All of them want to sabotage her mission or at least... kill her.

Danny Dunn and the Anti-Gravity Paint Jay Williams, Raymond Abrashkin, 2014-11-15 Through a mishap in Professor Bulfinch's laboratory, Danny accidentally creates an anti-gravity paint. The natural use, of course, is for a spaceship -- the paint can replace rockets to get the ship into space. Unfortunately, the spaceship is launched prematurely after Danny and Joe follow Professor Bulfinch and Dr. Grimes on a tour of the ship. A mechanical failure dooms the four to a one-way trip out of the Solar System -- unless they can repair the spaceship in time! This is the first of the 15-volume Danny Dunn series and features the original cover by acclaimed artist Ezra Jack Keats. Look for Danny Dunn on a Desert Island, the second volume of the series, coming soon from Wildside Press!

"And I was There" Edwin T. Layton, Roger Pineau, John Costello, 2006 The late Admiral Layton, who was the fleet intelligence officer for Admiral Nimitz through out World War II, describes the breakdown in the intelligence process prior to the bombing of Pearl Harbor, and shares his experiences witnessing feuding among high-level naval officers in Washington that contributed to Japan's successful attack. Secrets of Antigravity Propulsion Paul A. LaViolette, 2008-07-10 A complete investigation of the development and suppression of antigravity and field propulsion technologies • Reveals advanced aerospace technologies capable of controlling gravity that could revolutionize air travel and energy production • Reviews numerous field propulsion devices that have thrust-to-power ratios thousands of times greater than a jet engine • Shows how NASA participates in a cover-up to block adoption of advanced technologies under military development In Secrets of Antigravity Propulsion, physicist Paul LaViolette reveals the secret history of antigravity experimentation--from Nikola Tesla and T. Townsend Brown to the B-2 Advanced Technology Bomber. He discloses the existence of advanced gravity-control technologies, under secret military development for decades, that could revolutionize air travel and energy production. Included among the secret projects he reveals is the research of Project Skyvault to develop an aerospace propulsion system using intense beams of microwave energy similar to that used by the strange crafts seen flying over Area 51. Using subquantum kinetics--the science behind antigravity technology--LaViolette reviews numerous field-propulsion devices and technologies that have thrust-to-power ratios thousands of times greater than that of a jet engine and whose effects are not explained by conventional physics and relativity theory. He then presents controversial evidence about the NASA cover-up in adopting these advanced technologies. He also details ongoing Russian research to duplicate John Searl's self-propelled levitating disc and shows how the results of the Podkletnov gravity beam experiment could be harnessed to produce an interstellar spacecraft.

F+f=-f John Michael Wansor, 2008-07-17 Where the supernatural is normal.

When a group of aerospace workers build the first anti-gravity ship and refuge to give it to the warmonger governments, they choose to leave society and are dubbed terrorists. After ten years of peace during which time they built three space ships and travel to the outer portion of the solar system. John Faulkner contracts a strange illness that is altering his DNA. As he changes into a space alien he becomes the new missing link. Someone sends bounty hunters to apprehend him which starts to a fast moving series of enlightening events that unfold quickly at each turn of the page.

The Hunt for Zero Point Nick Cook, 2007-12-18 This riveting work of investigative reporting and history exposes classified government projects to build gravity-defying aircraft--which have an uncanny resemblance to flying saucers. The atomic bomb was not the only project to occupy government scientists in the 1940s. Antigravity technology, originally spearheaded by scientists in Nazi Germany, was another high priority, one that still may be in effect today. Now for the first time, a reporter with an unprecedented access to key sources in the intelligence and military communities reveals suppressed evidence that tells the story of a quest for a discovery that could prove as powerful as the A-bomb. The Hunt for Zero Point explores the scientific speculation that a zero point of gravity exists in the universe and can be replicated here on Earth. The pressure to be the first nation to harness gravity is immense, as it means having the ability to build military planes of unlimited speed and range, along with the most deadly weaponry the world has ever seen. The ideal shape for a gravity-defying vehicle happens to be a perfect disk, making antigravity tests a possible explanation for the numerous UFO sightings of the past 50 years. Chronicling the origins of antigravity research in the world's most advanced research facility, which

was operated by the Third Reich during World War II, The Hunt for Zero Point traces U.S. involvement in the project, beginning with the recruitment of former Nazi scientists after the war. Drawn from interviews with those involved with the research and who visited labs in Europe and the United States, The Hunt for Zero Point journeys to the heart of the twentieth century's most puzzling unexplained phenomena.

The Gravity of Anti-Gravity Tim Blagge, 2012-09-10 Let's imagine you are a brilliant young scientist, just ready to graduate from Cal-Tech and you invent and build a machine that will fundamentally change the course of human history. You know your anti-gravity device will revolutionize industry; and the ripple effect will touch every person on the planet. So how do you get your device to market without inciting economic chaos? This is exactly the dilemma faced by Bill Burton, our brilliant, yet down-to-earth young scientist. How does he navigate the web of good and evil entities who will stop at nothing to own his device and the science behind it? With the help of an enigmatic beautiful scientist, Dr. Stella Morton and her Private Investigator brother, Rolf, new author Tim Blagge, weaves a spellbinding story rife with betrayals and mysteries that involve both criminal organizations and the highest levels of the world's governments. Strong characters, humor, pulse pounding excitement and an ending like no other will satisfy even the most discerning fan of contemporary conspiracy novels. Excerpt from Book: The next morning while I was still sleeping, the phone rang. It was Jerry and he sounded frantic. Bill, have you seen the news? You won't believe it. I think you might have, have been responsible. He stuttered. Jerry what are you talking about? Just turn on the news, buddy boy. Jerry said excitedly. I'll call you back. I said I turned on the news. The story was on every station. This is KFAJ reporting, the TV barked. Scientists are stunned and puzzled at a phenomenon that they have never before observed.

About 7:57 P.M. Pacific Time last night, the earth lost seven tenths of a second of time. Now before you go and celebrate that you are younger now than you would have been, it has caused some huge problems. All the satellite navigation systems in the world must be recalibrated. This has affected all forms of transportation. Planes have been grounded, and ships, trains, subways - all other forms of transportation have been stopped awaiting the fix to our global positioning satellites. The militaries of the world have been put on high alert. No one seems to know if this is a natural or accidental occurrence or if some terrorist or rogue nation is sending some kind of message. Until the satellites are recalibrated, most of our offensive and defensive rocket capabilities are also off-line. Scientists and technicians say they will have the GPS satellite systems adjusted in the next hour. Then we should see the world return to normal in a day or two. And it's a miracle, but so far, there are no reports of death or injury. Let's go to Norma Woodard who is with Dr. Franz Belter of MIT. Dr. Belter, can you explain what just happened and how the world suddenly lost time? Ms. Woodard, my colleagues and I have met all night and so far, even though we have some hypotheses on this strange phenomenon, we don't have any definitive answers yet. First we thought that it may have been a giant solar flare, but nothing unusual emanated from there. Then we checked to see if the earth was hit with a large burst of particle radiation from outer space. We have detected nothing like that. Does that mean you don't know what happened at all? Woodard questioned. Ms. Woodard, we have come only to two conclusions. The first is that something has briefly interrupted space-time. The second is that we think it originated here on earth!

Gravitational Manipulation of Domed Craft Paul E. Potter, 2011-03-10 This book introduces a brand new field of scientific research based upon analysis of artifacts retrieved from crashed and damaged UFOs that have come down in Russia and America. For the first time, it reveals the scientific principles behind UFO propulsion dynamics, and shows that these principles are known and recognized by today's physicists. Potter's analyses of these UFO mechanisms are substantiated with references to a broad array of over 300 research papers published in scientific journals! Potter correlates many of the phenomena observed firsthand by close encounter witnesses and abductees and

pinpoints the common themes reported, categorizing them according to known physical principles. He produces a comprehensive orchestration of energy dynamics used inside and around UFOs. His precise and lavish illustrations allow the reader to enter directly into the realm of the advanced technological engineer and to understand, quite straightforwardly, the aliens' methods of energy manipulation: their methods of electrical power generation; how they purposely designed their craft to employ the kinds of energy dynamics that are exclusive to space (discoverable in our astrophysics) in order that their craft may generate both attractive and repulsive gravitational forces; their control over the mass-density matrix surrounding their craft enabling them to alter their physical dimensions and even manufacture their own frame of reference in respect to time.

Hayden's Realm Joe Gillespie, 2016-10-10 Hayden's realm is a voyage into space and time like no other, crammed with twists that will keep you questioning what will happen next. It is a journey of a man (Max Hayden) who finds himself trapped in an alternative realm - like another dimension, where everything he knows is not quite as it was. Max is able to pilot a newly developed anti-gravity ship, but this technology attracts the attention of an advanced alien intelligence. Thus begins an adventure that catapults Max on a quest to return home, but before he gets there he faces the impending colonisation of planet Earth by a seemingly far more sinister entity.
