Operation Lock and the War on Rhino Poaching John Hanks, 2015-05-08 The aggressive poaching of rhinos needs to be countered with equal aggression. So argued Prince Bernhard of the Netherlands, the founder president of the World Wide Fund for Nature (WWF), at a 1987 meeting with John Hanks, conservation expert and WWF's head in Africa. The result was Operation Lock, a secret initiative funded by Prince Bernhard and staffed by former SAS operatives. Operation Lock set up headquarters in Johannesburg and extended its reach into neighbouring states: Namibia, Zambia, Botswana, Swaziland and Mozambique. Its operatives planned to train game rangers, to pose as rhino horn traders in order to entrap buyers, and to expose the kingpins who were driving the trade. It was a controversial approach, all the more because it was working within apartheid South Africa in the late 1980s. When the existence of the project was finally leaked, WWF denied any involvement, and John Hanks took the fall. In *Operation Lock and the War on Rhino Poaching*, John Hanks finally tells the story of these explosive events from 25 years ago. As a leading international authority on conservation, he also deals with the scourge of rhino poaching up to the present, and gives powerful and controversial criticism of some of the current policies to curb poaching.

Situational Prevention of Poaching Andrew M Lemieux, 2014-03-05 For centuries, criminologists have looked for scientific ways to study, understand, and ultimately prevent crime. In this volume, a unique offense, poaching, is explored in various contexts to determine what opportunity structures favor this crime and how situational crime prevention may reduce its prevalence. The data sources used range from publically available secondary data about animal populations, to interviews with hunters, to actual law enforcement data collected inside protected areas. Various methods are utilized to look for patterns in poaching behaviour regarding where poachers strike, which species they target and their modus operandi. Collectively, the volume shows that principles of criminal opportunity theory and situational crime prevention are useful for studying and preventing poaching in a variety of contexts. The methods employed by each chapter are easily replicated and meant to stimulate empirical poaching research where data is available. While the theoretical grounding of this volume is drawn from criminology, it is written for a broad audience of academics, practitioners and those interested in wildlife conservation.

Poaching, Wildlife Trafficking and Security in Africa Cathy Haenlein, M L R Smith, 2017-07-06 A worldwide surge in poaching and wildlife trafficking is threatening to decimate endangered species. This crisis also threatens the security of human beings in ways ignored until recently by decision-makers slow to begin to treat what is typically viewed as a 'conservation issue' as serious crime. Over the past decade, as the scale and profitability of poaching and wildlife trafficking have grown, politicians, journalists and campaigners throughout the world have begun to take notice – they are offering striking appraisals of the threat posed not only to endangered species but also to human populations. Many of these appraisals, however, are made in the absence of a detailed body of empirical research and analysis to underpin them. The result is the growth of a range of myths and misperceptions around the security threats posed, particularly as they relate to Africa. *Poaching, Wildlife Trafficking and Security in Africa* examines the most common narratives on poaching, wildlife trafficking and security. It critically analyses the dominant discourses on poaching and wildlife trafficking as threats to human security, as drivers of conflict, as funders of terrorism and as a focus for organised crime. In doing so, it seeks to sort myth from reality, to clarify how poaching and wildlife trafficking, as much cited threats to security, can most accurately be conceived. Such a study is crucial to the efforts of stakeholders now rightly looking to respond not just to the threat posed to endangered species, but also

to the security and wellbeing of human beings.

Are the wildlife laws imposed strongly enough to fight poaching in Kenya? Ali Satar,2019-06-19 Bachelor Thesis from the year 2019 in the subject Law - Penology, , course: L.L.B, language: English, abstract: Kenya has set up a far-reaching administrative system that criminalizes wildlife poaching. Punishments for infringement of the substantive laws and required legal techniques comprise of fines, imprisonment and relinquishment of tools used to perpetuate a wrongdoing. While certain parts of implementing the substantive laws are shared over a few government foundations, it is the Kenya Wildlife Service (KWS), an organization with full prosecutorial powers that bears the essential duty regarding wildlife. The issue here arises on whether or not the new laws imposed are strong enough to fight poaching or whether the laws should be repealed or replaced again? The research will contain specific cases and statutes of the law regarding wildlife in Kenya and if they are strong enough to fight poaching and wildlife trade in Kenya. Further, the research shall converse and contrast the current wildlife act and the previous one to see if the laws amended are of any good, and if so, if they reduce poaching, and by how much. If not, it will be discussed whether any new laws can be proposed to do so. Kenya recently overhauled of the country's wildlife regulatory regime. In December 2013 Kenya enacted the Wildlife Conservation and Management Act (WCMA) 2013. The WCMA repealed and replaced the Wildlife (Conservation and Management) Act, 1976. The World Wildlife Fund (WWF) helped coordinate the input of environmental civil society organization views after the Wildlife Conservation and Management Act 2013 was passed. This law was a summit of endeavors spreading over more than 15 years to get a far reaching and comprehensive enactment set up.

Ivory Keith Somerville,2019-10-30 Half of Tanzania's elephants have been killed for their ivory since 2007. A similar alarming story can be told of the herds in northern Mozambique and across swathes of central Africa, with forest elephants losing almost two-thirds of their numbers to the tusk trade. The huge rise in poaching and ivory smuggling in the new millennium has destroyed the hope that the 1989 ivory trade ban had capped poaching and would lead to a long-term fall in demand. But why the new upsurge? The answer is not simple. Since ancient times, large-scale killing of elephants for their tusks has been driven by demand outside Africa's elephant ranges - from the Egyptian pharaohs through Imperial Rome and industrialising Europe and North America to the new wealthy business class of China. And, who poaches and why do they do it? In recent years lurid press reports have blamed mass poaching on rebel movements and armed militias, especially Somalia's Al Shabaab, tying two together two evils - poaching and terrorism. But does this account stand up to scrutiny? This new and ground-breaking examination of the history and politics of ivory in Africa forensically examines why poaching happens in Africa and why it is corruption, crime and politics, rather than insurgency, that we should worry about.

Killing for Profit Julian Rademeyer,2012-11-08 A terrifying true story of greed, corruption, depravity and ruthless criminal enterprise ... On the black markets of Southeast Asia, rhino horn is worth more than gold, cocaine and heroin. This is the chilling story of a more than two-year-long investigation into a dangerous criminal underworld where merciless syndicates will stop at nothing to attain their prize. It is a tale of greed, folly and corruption, and of an increasingly desperate battle to save the rhino - which has survived for more

than 50 million years – from extinction. Killing for Profit is a meticulous, devastating and revelatory account of one of the world's most secretive trades. It exposes poachers, gangsters, con men, mercenaries, killers, gunrunners, diplomats, government officials and other key players behind the slaughter. And it follows the bloody trail from the front lines of the rhino wars in South Africa, Zimbabwe and Mozambique to the medicine markets of Vietnam and the lair of a wildlife-trafficking kingpin on the banks of the Mekong River in Laos ...

Nature Crime Rosaleen Duffy,2010-08-31 In this impressively researched, alarming book, Rosaleen Duffy investigates the world of nature conservation, arguing that the West's attitude to endangered wildlife is shallow, self-contradictory, and ultimately very damaging. Analyzing the workings of the black-market wildlife industry, Duffy points out that illegal trading is often the direct result of Western consumer desires, from coltan for cellular phones to exotic meats sold in London street markets. She looks at the role of ecotourism, showing how Western travelers contribute—often unwittingly—to the destruction of natural environments. Most strikingly, she argues that the imperatives of Western-style conservation often result in serious injustice to local people, who are branded as “problems” and subject to severe restrictions on their way of life and even extrajudicial killings.

Called By The Wild Conrad De Rosner,Elaine Bell,Graham Spence,2023-03-13 The thrilling story of a pioneering conservationist working with dogs to protect wildlife from poachers. Conrad de Rosner is one of the first game rangers to focus on working with specially trained dogs to protect wildlife from poachers – both ‘bushmeat’ poachers, who use cruel snares to trap animals, and criminal syndicates killing for rhinoceros horn and capturing critically endangered pangolins, the most trafficked animal in the world. Con's life – constantly at risk from poachers, wildlife and even his own fellow rangers – has been saved on numerous occasions by his devoted canine companions. His first dog, Zingela, a Weimaraner, saved Con from near certain death at the hands of two fellow rangers; on another occasion, Zingela alerted Con to a concealed wounded buffalo, one of Africa's most dangerous animals, about to charge. When Zingela was tragically killed, hit by a car while Con was away, the only meagre consolation was that Con had kept Landa, one of the nine puppies sired by Zingela. Landa followed in his father's footsteps as the leader of the canine anti-poaching team that is still operating today. Con's story is an epic of modern-day African wildlife conservation, filled with courage, adventure and romance.

Rhino War Johan Jooste,Tony Park,2022-07-01 In 2012, retired South African general Johan Jooste was parachuted into the seemingly unwinnable war against rhino poaching in the Kruger National Park. With poaching spiralling out of control, Jooste was given the mandate to ‘go military’, to convert Kruger’s ranger corps into a paramilitary force capable of taking the fight to the poachers. Aged 60, white, and a veteran with 35 years’ military service, Jooste’s controversial appointment was immediately met with resentment and outright hostility by elements of South African National Parks, the police, and even the military with which he had served. With the media, government, conservationists, human-rights activists and the people of South Africa looking over his shoulder, Jooste had to battle opponents within and without to carry out his strategy for turning the tide on rhino poaching. *Rhino War* tells how Jooste, facing an unprecedented assault on a national park and a single species, turned a force of demoralised men and women into arguably the finest anti-poaching unit on the African continent. Told through his eyes, these stories of the courage and grit of rangers who risked their lives to protect wildlife in the face of a wily and determined foe are an account of heroism, sacrifice and determination. Humbly, honestly and decisively, Jooste tells of the successes and failures of his bold strategy, and shares his vision for the future.

Asian Rhinos Mohd. Khan bin Momin Khan,Nico J. van Strien,IUCN/SSC Asian Rhino Specialist Group,1997 There are currently three

species of Asian rhino: the Indian or greater one-horned Asian rhino, the Javan or lesser one-horned Asian rhino and the Sumatran or Asian two-horned rhino. Today, all three are threatened with extinction and two, the Sumatran rhino and Javan rhino, critically so. Although the Indian rhino is to be found in greater numbers than the other two, the threats to this species nevertheless remain significant. As in the case of the African rhinos, the threats to the Asian rhinos stem from poaching for the horn, the primary demand for which is in traditional Chinese medicine but which is also a speculator's commodity in several consumer nations. However, a further threat to these animals is also posed by the destruction of their habitat. Indeed, two of these species inhabit the tropical rainforest which is being destroyed. This action plan describes the major requirements for rhino conservation and describes some of the programmes which can and are being implemented to stem the threats to these species such as managed breeding and the in situ conservation of their habitats.

Asian Rhinos, 1989

Black Poachers, White Hunters Edward I. Steinhart, 2006 Three themes emerge: the importance of hunting to Kenyan farmers and herders; the attempt during the European colonization of Kenya to recreate on African soil the practices and values of nineteenth-century European aristocratic hunts, which both created and reinforced an image of African inferiority and subordination; the role of the conservationists, who came to claim sovereignty over the world of nature and wildlife, in completing the transformation of African hunters into criminal poachers and eliminating them from the hunting scene.

Heart of a Game Ranger Mario Cesare, 2017-02-10 MARIO CESARE, after decades as warden of Olifants River Game Reserve, has his feet firmly planted in this magnificent slice of Big Five country to the west of the Kruger Park. Cesare recounts some of the hair-raising, heartbreaking and heartwarming moments: a buffalo calf reunited with its pining mother, injured lions given second chances and rhinos lost, one by one, to poaching. Heart of a Game Ranger is a story of extremes, where spectacular days that end in exhausted satisfaction and achievement are balanced by those that leave behind only despair and frustration. Seen through his eyes and spoken from the heart, Cesare tells a deeply personal story – not only of a life lived wild, but of the joy of Africa's incredible natural world.

The Poacher's Moon Richard Peirce, 2014-09-01 When wildlife conservationist Richard Peirce learnt about the targeting of three private game reserves in the Western Cape in 2011 and the butchery of some of their rhinos, he embarked on a crusade to raise public awareness about the horrors of rhino poaching. This is the story of Higgins and Lady, two rhinos from the farm Fairy Glen that defied the odds by surviving a brutal attack. Peirce keeps the reader spellbound as he recounts the series of attacks and their aftermath in chilling detail: the unbearable savagery, suspect police work, shady characters, mysterious happenings and death threats. Reading like a crime thriller, this account of dogged survival, compassion and triumph – along with desperate strategising to outwit the poaching mafia – will have wide appeal. Colour images throughout, taken as the drama unfolded, bring the subject even more vividly to life.
