**Open Skies for Africa** Charles E Schlumberger,2010-06-23 In Africa, where poor roads, ports, and railways often constrain efficient transportation, air transport holds great potential as a lever for economic growth and development. Yet Africa has suffered several decades of inefficient air services. Uncompetitive flag carriers, set up by newly independent African states, offered primarily intercontinental flights, while the domestic air service market remained underdeveloped and underserved. The 1999 pan-African treaty on liberalization of access to air transport markets, the Yamoussoukro Decision, attempted to address these shortcomings. Yet a decade later, only partial liberalization has been achieved. 'Open Skies for Africa: Implementing the Yamoussoukro Decision' reviews progress made in carrying out the treaty and suggests ways in which the liberalization process can be encouraged. The book analyzes the completed and still-pending steps toward implementation of the Yamoussoukro Decision, both on a pan-African level and within various regions. Special focus is given to the challenges posed by the poor aviation safety and security standards that exist in most African countries. Finally, the book measures the impact that certain policy steps of the Yamoussoukro Decision have had and evaluates the economic significance of air transportation and its full liberalization in Africa. The book concludes that the process of liberalizing African air services must continue, and provides policy recommendations for the way forward.

**Dissident Histories in the Soviet Union** Barbara Martin,2019-05-16 How was it possible to write history in the Soviet Union, under strict state control and without access to archives? What methods of research did these 'historians' - be they academic, that is based at formal institutions, or independent - rely on? And how was their work influenced by their complex and shifting relationships with the state? To answer these questions, Barbara Martin here tracks the careers of four bold and important dissidents: Aleksandr Solzhenitsyn, Roy Medvedev, Aleksandr Nekrich and Anton Antonov-Ovseenko. Based on

extensive archival research and interviews (with some of the authors themselves, as well as those close to them), the result is a nuanced and very necessary history of Soviet dissident history writing, from the relative liberalisation of de-Stalinisation through increasing repression and persecution in the Brezhnev era to liberalisation once more during perestroika. In the process Martin sheds light onto late Soviet society and its relationship with the state, as well as the ways in which this dissidence participated in weakening the Soviet regime during Perestroika. This is important reading for all scholars working on late Soviet history and society.

**Encyclopedia of African Airlines** Ben R. Guttery, 1998-01-01 The rainy season, terrain, and financial hardships have made the construction of highways and railroads nearly impossible in many parts of Africa. This lack of modern infrastructure has been overcome in some part by the development of air transportation. Hundreds of carriers--both small and large, government owned and private--have connected all parts of the continent. Together, they have had a tremendous impact on the African economy and the people. Country-by-country, this comprehensive reference work provides brief histories of over 700 airlines in 54 African nations. Each entry has the years of operation of the carrier, along with information on its origin, growth, and route structure. Aircraft usage, including registration numbers and nicknames, is covered in many cases. Any crashes involving aircraft in the carrier's fleet are also noted. An appendix gives the location of all major African airports.

**Automation Max** Peter H. Collins, 2020-05-01 Before there was Game of Thrones there was a sophisticated Arthurian romance replete with brave knights, noble ladies, temptation, seduction, blame, shame, and a memorable beheading game in an obscure Middle English dialect. This new edition is closely translated from the original, presenting the delightful and insightful story of a flawed hero, and a fascinating villain or two, with verve and vital energy.

**The Peptides** Eberhard Schröder, Klaus Lübke, 2014-05-12 The Peptides, Volume I: Methods of Peptide Synthesis focuses on detailed description of protecting groups, individual amino acids, and coupling reactions. The publication first offers information on amino-protecting and carboxyl-protecting groups, including carboxyl protection by salt formation, esterification, and amide formation and acyl-type, alkyl-type, and urethane protecting groups. The text then examines the formation of the peptide bond and amino acids. Discussions focus on amino acids with the alcoholic hydroxyl group, sulfur amino acids, basic and acidic amino acids, synthesis of peptides by activation of the amino group, and peptide synthesis by activation of the carboxyl group. The manuscript elaborates on the synthesis of cyclic peptides, depsipeptides, peptoids, and the plastein reaction. Topics include synthesis of plastein-active peptides, glycopeptides, phosphopeptides, and S-peptides. The publication is a dependable source of data for readers interested in the methods of peptide synthesis.

**The Secret of CAPE LISBURNE** Ron Monette, 2015-11-12 The Antonov 225, the largest plane in the world in 1988 is heading to Cape Lisburne, Alaska with scientists and cargo to find out why something like the red tide is happening at and around the Cape which is a U.S. Long Range Radar Station. The 2 pilots and 2 crew are ex F-14 combat aces from that flew off a carrier during Desert Storm. The plane is sabotaged to do a controlled crash short of Cape Lisburne. Everybody survives with some injuries. A medical officer, Kelly

is on board and she assists. There are a couple of confrontations with a surprise person on board who eventually dies. The whole group are rescued by the Cape Station by moving inland off the ice pack. The scientists eventually find what is causing the red tide effect with the help of a special coast guard sonar ship. Iron sulphate has been dumped in the coastal waters causing Domoic Acid poisoning. The base pilots and personnel get sick from eating the shell fish and fish and can't fly. The 4 F-14 (old dogs) has to fly and put on a real show. Kelly and Jim, a second seat radar man on the F-14s fall in love. Kelly lost pilot years earlier and hasn't let herself get close to anyone since. The culprit of the iron dumping is a communist country. When it is found out they are taken to a world court. They deny and blame others. There is no antidote to the poison so it has to work its way out of the sick and the water. At the end the four old dogs have a confrontation with a N. Korean ship that has entered restricted waters and what they do is surprising. It prevents a possible war. The last chapter is, Is it the end or is it the Beginning as everybody is summed up.
