### **Antonov's Turboprop Twins** E. Gordon, Yefim

Gordon, Dmitriy Komissarov, Sergey Komissarov, 2003 8 x 11 128 pgs 200 color & b&w photos The An-24 was designed in the late 1950s as the Soviet counterpart of the Fokker F.27 in both appearance and capabilities. The twin-turboprop An-24 was produced by three Soviet aircraft factories; many remain in operation. The Soviet Air Force needed a modern turboprop tactical transport with parachuting capability. Thus the airliner evolved first into the quick fix An-24T and then into the An-26 which introduced a unique sliding cargo ramp developed by Antonov and protected by many international patents. This paved the way for the hot and high An-32 and the big head An-30, a specialized aerial photography machine. Antonov's twin-turboprop family has seen civil and military service in Europe, Asia, the Middle East, Africa, North, Central and South America, making it a best-seller among Soviet commercial designs. This book lists all known operators on a country-by-country basis and is richly illustrated with photos in the liveries of assorted civil and military operators.

Now That's Big! offers a high-interest introduction to the sizes, speeds, features, and purposes of some of the world's largest vehicles and machines. **Bandits and Partisans** Erik C. Landis, 2008-04-27 Beginning in the fall of 1920, Aleksandr Antonov led an insurgency that became the largest armed peasant revolt against the Soviets during the civil war. Yet by the summer of 1921, the revolt had been crushed, and popular support for the movement had all but disappeared. Until now, details of this conflict have remained hidden. Erik Landis mines recently opened provincial and central Soviet archives and international collections to provide a depth of detail and historical analysis never before possible in this definitive account of the uprising. Landis examines both sides of the conflict, probing the testimonies of the insurgents, their opponents, and those caught in between. We witness firsthand the frustrations, failures, and internal conflicts of the Bolsheviks and the spirit of rebellion that drove the insurgents and helped drive a localized dispute into a well-organized mass rebellion that struck fear in the hearts of Communist leaders. This political and military threat was influential in bringing about Lenin's conciliatory New Economic Policy, which allowed farmers and villages to sustain themselves in a quasi-market economy. *Bandits and Partisans* presents a gripping tale of brutality, domination, and revolt, placing readers at the frontlines of the complex and rich history of the Russian civil war and the consolidation of the new Soviet state.

**Postcards from Stanland** David H. Mould, 2016 Central Asia has long stood at the crossroads of history. It was the staging ground for the armies of the Mongol Empire, for the nineteenth-century struggle between the Russian and British empires, and for the NATO campaign in Afghanistan. Today, multinationals and nations compete for the oil and gas reserves of the Caspian Sea and for control of the pipelines. Yet Stanland is still, to many, a *terra incognita*, a geographical blank. Beginning in the mid-1990s, academic and journalist David Mould's career took him to the region on Fulbright Fellowships and contracts as a media trainer and consultant for UNESCO and USAID, among

others. In Postcards from Stanland, he takes readers along with him on his encounters with the people, landscapes, and customs of the diverse countries--Kazakhstan, Kyrgyzstan, Tajikistan, and Uzbekistan--he came to love. He talks with teachers, students, politicians, environmental activists, bloggers, cab drivers, merchants, Peace Corps volunteers, and more. Until now, few books for a nonspecialist readership have been written on the region, and while Mould brings his own considerable expertise to bear on his account--for example, he is one of the few scholars to have conducted research on post-Soviet media in the region--the book is above all a tapestry of place and a valuable contribution to our understanding of the post-Soviet world.

### The Ancient Greek Hero in 24 Hours Gregory

Nagy, 2020-01-10 What does it mean to be a hero? The ancient Greeks who gave us Achilles and Odysseus had a very different understanding of the term than we do today. Based on the legendary Harvard course that Gregory Nagy has taught for well over thirty years, *The Ancient Greek Hero in 24 Hours* explores the roots of Western civilization and offers a masterclass in classical Greek literature. We meet the epic heroes of Homer's *Iliad* and *Odyssey*, but Nagy also considers the tragedies of Aeschylus, Sophocles, and Euripides, the songs of Sappho and Pindar, and the dialogues of Plato. Herodotus once said that to read Homer was to be a civilized person. To discover Nagy's Homer is to be twice civilized. "Fascinating, often ingenious... A valuable synthesis of research finessed over thirty years." —*Times Literary Supplement* "Nagy exuberantly reminds his readers that heroes—mortal strivers against fate, against monsters, and...against death itself—form the heart of Greek literature... [He brings] in every variation on the Greek hero, from the wily Theseus to the brawny Hercules to the 'monolithic' Achilles to the valiantly conflicted Oedipus." —Steve Donoghue, *Open Letters Monthly*

### Encyclopedia of African Airlines Ben R. Guttery, 1998-01-01

The rainy season, terrain, and financial hardships have made the construction of highways and railroads nearly impossible in many parts of Africa. This lack of modern infrastructure has been overcome in some part by the development of air transportation. Hundreds of carriers--both small and large, government owned and private--have connected all parts of the continent. Together, they have had a tremendous impact on the African economy and

the people. Country-by-country, this comprehensive reference work provides brief histories of over 700 airlines in 54 African nations. Each entry has the years of operation of the carrier, along with information on its origin, growth, and route structure. Aircraft usage, including registration numbers and nicknames, is covered in many cases. Any crashes involving aircraft in the carrier's fleet are also noted. An appendix gives the location of all major African airports.

*Sexology* Vladimir Antonov, 2008-07-31 This book, written by Russian scientist Vladimir Antonov, Ph.D. (in biology), contains a scientific description of the mechanisms of development of the human reproductive system, including the embryonic period, childhood, and adolescence. The book also contains a thorough description of the mechanisms of formation of homosexuality in both sexes. Various results from experiments conducted on animals, in relation to this subject, are also described. Much attention is given to the methods of regulation of the sexual function: from choosing an appropriate diet - to the methods of psychic self-regulation, including work with chakras and meridians. A significant part of this book is dedicated to the bioenergetic aspect of sexual interaction, sexual psychology, and ethics. The author suggests viewing sexuality as an opportunity of spiritual growth through correct development of the emotional sphere, refinement of the consciousness, and ethical self-control. At the end of this book, there is a comprehensive bibliography. This book is intended for specialists-scientists, physicians, psychologists, and for the general public.

*Wings Above the Planet* Andrii Sovenko, 2019 The Ukraine based Antonov company had its origins in the Soviet era Antonov Design Bureau which latterly had been working on large transport aircraft. Created in the late 1980s in the turbulent post-Soviet era, the new company began to focus on this aspect of the international aviation market. Antonov Airlines was the first to offer the services of the most capable heavy-lift aircraft in serial production, the An-124 Ruslan, laying the foundations for a new sector of that market, the transportation of oversized and super-heavy cargoes. Since its formation, the enormous variety and types of cargoes that have been carried by the airline is extraordinary ranging from live chickens, tanks, railway locomotives, satellites, ostriches, generators, transformers and pressure vessels to boats and other aircraft. The list is almost endless and without the mighty An-124 Ruslan, many of these cargoes could never have travelled by air. This book provides many fascinating insights into a part of the aviation industry which is not often in the spotlight, the world of international heavy lift aviation. It also tells the story of challenging journey the airline company has made from being a subdivision of a secret Soviet enterprise to becoming one of the world leaders in a highly competitive sector of the aviation business. Illustrated throughout, the book contains a wealth of information on the design, production and operation of the An-12, An-74, An-124 and the giant An-225 aircraft.

### **The Russian Understanding of War** Oscar

Jonsson, 2019-11-01 This book analyzes the evolution of Russian military thought and how Russia's current thinking about war is reflected in recent crises. While other books describe current Russian practice, Oscar Jonsson provides the long view to show how Russian military strategic thinking has developed from the

Bolshevik Revolution to the present. He closely examines Russian primary sources including security doctrines and the writings and statements of Russian military theorists and political elites. What Jonsson reveals is that Russia's conception of the very nature of war is now changing, as Russian elites see information warfare and political subversion as the most important ways to conduct contemporary war. Since information warfare and political subversion are below the traditional threshold of armed violence, this has blurred the boundaries between war and peace. Jonsson also finds that Russian leaders have, particularly since 2011/12, considered themselves to be at war with the United States and its allies, albeit with non-violent means. This book provides much needed context and analysis to be able to understand recent Russian interventions in Crimea and eastern Ukraine, how to deter Russia on the eastern borders of NATO, and how the West must also learn to avoid inadvertent escalation.

*Ready for Takeoff* Roger Cliff, Chad J. R. Ohlandt, David Yang, 2011 This monograph assesses China's aerospace capabilities and the extent to which China's participation in commercial aerospace markets and supply chains is contributing to the improvement of those capabilities. It examines China's commercial aviation manufacturing capabilities, its commercial and military capabilities in space, Chinese government efforts to

encourage foreign participation in the development of China's aerospace industry, transfers of foreign aerospace technology to China, the extent to which U.S. and other foreign aerospace firms depend on supplies from China, and the implications of these issues for U.S. security interests. China's aerospace industry has advanced at an impressive rate over the past decade, partly due to the increasing participation of its aerospace industry in the global commercial aerospace market and the supply chains of the world's leading aerospace firms. China's current ability to meet demand with indigenous aircraft is limited, however, and much of the demand will be filled by imported aircraft. China's space capabilities have improved rapidly, on the other hand, and it has developed and deployed an increasingly wide range of satellites. China's growing civilian aerospace capabilities are unquestionably contributing to the development of its military aerospace capabilities, but whether the United States could significantly improve its security through alterations of its policy toward civil aerospace cooperation with China without having a significant negative effect on its own economic interests is unclear.
