*Antonov Jet Twins* E. Gordon,Yefim Gordon,Dmitrii Komissarov,2005 The need to provide a state-of-the-art jet successor to the ubiquitous An-26 led Antonov to develop a twin-turbo-fan tactical airlifter, the An-72, which made use of the Coanda effect, improving wing lift and field performance dramatically. The prototype flew in 1977, but it was not until the mid-1980s that production began in Khar'kov. The baseline military airlifter soon spawned a wide selection of derivatives. First was the An-74; originally conceived as a specialized version for Arctic and Antarctic support, it entered production as an ordinary civil transport. Concerted efforts by the Antonov OKB to enhance the capabilities of the An-72/An-74 family led to the development of the An-72P armed border patrol version, the convertible cargo/passenger An-747T and An-74TK, the An-74S flying hospital and the radically redesigned An-74TK-300 with engines on underwing pylons - an arrangement which improved the all-important economic efficiency. The most intriguing An-72 derivative was the unorthodox An-71 AEW aircraft; originally meant for shipboard operations, it was prevented from entering production by the political and economic situation.

*Wings Above the Planet* Andrii Sovenko,2019 The Ukraine based Antonov company had its origins in the Soviet era Antonov Design Bureau which latterly had been working on large transport aircraft. Created in the late 1980s in the turbulent post-Soviet era, the new company began to focus on this aspect of the international aviation market. Antonov Airlines was the first to offer the services of the most capable heavy-lift aircraft in serial production, the An-124 Ruslan, laying the foundations for a new sector of that market, the transportation of oversized and super-heavy cargoes. Since its formation, the enormous variety and types of cargoes that have been carried by the airline is extraordinary ranging from live chickens, tanks, railway locomotives, satellites, ostriches, generators, transformers and pressure vessels to boats and other aircraft. The list is almost endless and without the mighty An-124 Ruslan, many of these cargoes could never have travelled by air. This book provides many fascinating insights into a part of the aviation industry which is not often in the spotlight, the world of international heavy lift aviation. It also tells the story of challenging journey the airline company has made from being a subdivision of a secret Soviet enterprise to becoming one of the world leaders in a highly competitive sector of the aviation business. Illustrated throughout, the book contains a wealth of information on the design, production and operation of the An-12, An-74, An-124 and the giant An-225 aircraft.

*The Encyclopedia of Middle East Wars [5 volumes]* Spencer C. Tucker,2010-10-08 This in-depth study of U.S. involvement in the modern Middle East carefully weighs the interplay of domestic, cultural, religious, diplomatic, international, and military events in one of the world's most troubled regions. The monumental, five-volume The Encyclopedia of Middle East Wars: The United States in the Persian Gulf, Afghanistan, and Iraq Conflicts is a must-have resource for anyone seeking to comprehend U.S. actions in this volatile region. Under the expert editorship of Spencer C. Tucker, the encyclopedia traces 20th- and 21st-century U.S. involvement in the Middle East and south-central Asia, concentrating on the last three decades. Beginning with the 1980–1988 Iran-Iraq War, it covers the 1979–1989 Soviet occupation of Afghanistan, the 1991 Persian Gulf War, allied punitive actions against Iraq during the 1990s, the Afghanistan War, the Iraq War, and the Global War on Terror. Many smaller military actions against Iran, Iraq, Libya, Afghanistan, and other regimes that have been involved in international terrorism are also included. Diplomacy, religion as it pertains to Middle East conflict, and social/cultural developments are other key subjects of analysis, as is the interplay of politics with military policy in the United States and other nations involved in the region.

**Towards the Controllable Quantum States** Junsaku Nitta,Hideaki Takayanagi,2003 The realizations of physical systems whose quantum states can be directly manipulated have been pursued for experiments on fundamental problems in quantum mechanics and implementations of quantum information devices. Micro-fabricated superconducting systems and electronic spins are among the most promising candidates. This book contains the newest and most advanced research reports on such materials, called OC Mesoscopic SuperconductivityOCO and OC SpintronicsOCO. The former includes superconductor-semiconductor hybrid systems, very small Josephson junctions, and micron-size SQUIDs. The latter includes the control of spin transports in semiconductor heterostructures, nano-scale quantum dots, and spin injections. Superconductor-ferromagnetic metal hybrid structures are covered by both of the topics.The proceedings have been selected for coverage in: OCo Index to Scientific & Technical Proceedings (ISTP CDROM version / ISI Proceedings)

Addressing the U.S. conflicts in Iraq, Afghanistan, and the Global War on Terror from the year 2001 to the present, this comprehensive, three-volume encyclopedia covers the significant individuals, key events, and important places involved in these recent military events. Beginning with the rise of Al Qaeda in the 1990s and the attacks on September 11, 2001, and covering events through ISIS's dramatic surge in Iraq and Syria, the hundreds of detailed entries also examine historical trends; nations and ethnicities involved in the conflicts; influential figures and organizations; economic, political, diplomatic, and cultural influences; wars, campaigns, and battles; and important weapons systems. **Dissident Histories in the Soviet Union** Barbara Martin,2019-05-16 How was it possible to write history in the Soviet Union, under strict state control and without access to archives? What methods of research did these 'historians' - be they academic, that is based at formal institutions, or independent - rely on? And how was their work influenced by their complex and shifting relationships with the state? To answer these questions, Barbara Martin here tracks the careers of four bold and important dissidents: Aleksandr Solzhenitsyn, Roy Medvedev, Aleksandr Nekrich and Anton Antonov-Ovseenko. Based on extensive archival research and interviews (with some of the authors themselves, as well as those close to them), the result is a nuanced and very necessary history of Soviet dissident history writing, from the relative liberalisation of de-Stalinisation through increasing repression and persecution in the Brezhnev era to liberalisation once more during perestroika. In the process Martin sheds light onto late Soviet society and its relationship with the state, as well as the ways in which this dissidence participated in weakening the Soviet regime during Perestroika. This is important reading for all scholars working on late Soviet history and society.
