The Aesthetics and Affects of Cuteness Joshua Paul Dale, Joyce Goggin, Julia Leyda, Anthony P. McIntyre, Diane Negra, 2016-12-08 Cuteness is one of the most culturally pervasive aesthetics of the new millennium and its rapid social proliferation suggests that the affective responses it provokes find particular purchase in a contemporary era marked by intensive media saturation and spreading economic precarity. Rejecting superficial assessments that would deem the ever-expanding plethora of cute texts trivial, *The Aesthetics and Affects of Cuteness* directs serious scholarly attention from a variety of academic disciplines to this ubiquitous phenomenon. The sheer plasticity of this minor aesthetic is vividly on display in this collection which draws together analyses from around the world examining cuteness's fundamental role in cultural expressions stemming from such diverse sources as military cultures, high-end contemporary art worlds, and animal shelters. Pushing beyond prevailing understandings that associate cuteness solely with childhood or which posit an interpolated parental bond as its primary affective attachment, the essays in this collection variously draw connections between cuteness and the social, political, economic, and technological conditions of the early twenty-first century and in doing so generate fresh understandings of the central role cuteness plays in the recalibration of contemporary subjectivities.

Armed Robotic Systems Emergence Robert J. Bunker, 2017-11-18 Armed robotic systems-drones and droids-now emerging on the battlefield portend new strategic realities not only for U.S. forces but also for our allies and future potential belligerents. By drawing upon historical weapons systems life cycles case studies, focusing on the early 9th through the mid-16th-century knight, the mid-19th through the later 20th-century battleship, and the early 20th through the early 21st-century tank, the monograph provides military historical context related to their
