The Dawn Cluster II Mark J. Schultis, 2018-08-21 Finding their footing has been no easy task for the few remaining survivors of the Sacramento. Melina Beetary's brother Ethan has been missing for months, and Terik Donato, still haunted by sins of the past, is reluctant to lead the men and women he helped save. Both Melina and Terik find themselves surrounded by conflicting loyalties, including a man who has been both a friend and an enemy, and a mysterious warrior who is more than meets the eye. To survive, they must brave enemy lines in a gamble to procure powerful allies - a reconnaissance mission that could change everything. But Garrett Soness seeks revenge. Warlord Favan of the Fokot has given him resource and opportunity to hunt down his former crew and bring them to justice. If he is not quick, an alien blood feud and a power hungry face from the past may just do the job for him. Bonds are shattered in this second volume of The Dawn Cluster.

The Dawn Cluster III Mark J. Schultis, 2018-10-30 They escaped planetary annihilation, helped end a centuries old civil war, and joined a defeated militia to their cause. Terik Donato and Melina Beetary's chances of bringing down the oppressive Fokot army were prospering until a cunning betrayal and a lone shot ripped apart their coalition. But as relics of the past begin to appear, transforming despair into determination, Terik and Melina now have a plan to engage the Fokot in all-out war. To stand a fighting chance they will need to rely on the only thing they have left: their resolve. The hardest task Terik and Melina must face is letting go - of each other, of their past, and any chance of saving Garrett Soness. Because all fates lead to the planet Opus, and its caretakers, the last Azonka Mah, who may be the key to the Sacramento crew getting home. It may also be the key to many of Terik's

questions, as well as the key to Warlord Favan's endgame, ultimately positioning Opus to be either the crux of their triumph or the catalyst of their defeat. All questions will be answered in this final volume of The Dawn Cluster.

Handbook of Optical Metrology Toru Yoshizawa,2009-02-25 The field of optical metrology offers a wealth of both practical and theoretical accomplishments, and can cite any number of academic papers recording such. However, while several books covering specific areas of optical metrology do exist, until the pages herein were researched, written, and compiled, the field lacked for a comprehensive handbook, one providing an overview of optical metrology that covers practical applications as well as fundamentals. Carefully designed to make information accessible to beginners without sacrificing academic rigor, the Handbook of Optical Metrology: Principles and Applications discusses fundamental principles and techniques before exploring practical applications. With contributions from veterans in the field, as well as from up-and-coming researchers, the Handbook offers 30 substantial and well-referenced chapters. In addition to the introductory matter, forward-thinking descriptions are included in every chapter that make this a valuable reference for all those involved with optical metrology.

Opticalman 3 & 2 United States. Bureau of Naval Personnel,1970 Theories and practical skills for use in optical shops are presented in this rate training

manual, prepared for regular navy and naval reserve personnel. Light theories are analyzed in connection with mirrors, prisms, lenses, and basic optical systems. Following fundamentals of mechanical design and construction, maintenance procedures are studied to give a general knowledge of optical repair. Special descriptions are made of such instruments as spyglasses, telescopes, magnetic compasses, azimuth and bearing circles, sextants, stadimeters, telescopic alidades, binoculars, submarine periscopes, and night vision sights. To give enough background for readers, operations of lathes, grinders, milling machines, and drill presses are also discussed. Besides illustrations for explanation purposes, information on the opticalman rating structure is also provided.

The Binocular Handbook Holger Merlitz, 2023-11-07 This book is a comprehensive technical treatise on binoculars as visual optical instruments. The author begins by discussing the function of binoculars and the properties of human visual perception. Theoretical models for the synthesis of binoculars and the complex interplay of the different components of binoculars are described. Subsequently, the performance limits, as experienced by the observer in a variety of external conditions, are derived. In the concluding section, the book takes the reader outdoors, where they learn to evaluate the properties and limitations of their binoculars in the field, and to recognize possible problems that may be due to manufacturing errors or accidental damages. Thus, a level of knowledge is provided that will enable the reader to fully exploit the capacities of their binoculars.

This book is written for those who work professionally with binoculars and are technically interested, but it is equally useful for professional staff working in the optical industry and the distribution of optical instruments. It includes recent discoveries and is easily accessible to anyone who is seriously interested in learning about binocular function. High school level math is useful to understand the derivations, but not needed to comprehend the results, which are discussed and displayed graphically.

The Dawn Cluster I Mark J. Schultis,2018-06-26 Terik Donato has lost his place in the universe. Casting aside a promising career, years spent in fleeting pursuit of truth has left him with nothing. But a surprise offer to interrogate the man whom he holds accountable for his father's death could change everything. Garrett Soness is less than enthusiastic about having a MAKO-6 agent on board the Sacramento- especially when that agent is Terik Donato. But for a space vessel past her prime, the agent's arrival is just the first of several unwelcome developments. When both a terrorist attack and a bizarre anomaly catch the skeleton crew off guard, the surviving crew members of the Sacramento find themselves halfway across the galaxy, stranded on a planet where humans are not as alien as the crew would think. Their stay may be brief, as a brutal species seeks to enslave all in its path and kill those that resist. Terik Donato and Garrett Soness will find themselves tested in the face of death, forced to become the men they were meant to be - or the monsters they always feared they were. Survival takes its toll in this first

chapter of The Dawn Cluster.
